Deloitte's IAS Plus (www.iasplus.com) is one of the most comprehensive sources of global financial reporting news on the web. It is a central repository for information about International Financial Reporting Standards (IFRS) as well as the activities of the International Accounting Standards Board (Board). The site, which is also available in German, includes portals tailored to the United Kingdom and Canada (available in English and French), each with a focus on local GAAP and jurisdiction-specific corporate reporting requirements.

#### IAS Plus features:

- News about global financial reporting developments, presented intuitively with related news, publications, events and more, including a resource page for accounting considerations in relation to COVID-19
- <u>Summaries of all Standards</u>, Interpretations and projects, with complete histories of developments and standard-setter discussions together with related news and publications
- <u>Rich jurisdiction-specific information</u>, including background and financial reporting requirements, links to country-specific resources, related news and publications and a comprehensive history of the adoption of IFRS Standards around the world
- Detailed personalisation of the site, which is available by selecting particular topics of interest and tailored views of the site
- <u>Dedicated resource pages</u> for research and education, sustainability and integrated reporting, accounting developments in Europe, global financial crisis, XBRL and Islamic accounting
- Important dates highlighted throughout the site for upcoming meetings, deadlines and more
- <u>A library of IFRS-related publications</u> available for download and subscription including our popular *IFRS in Focus* newsletters and other publications
- <u>IFRS Model Financial Statements and Presentation and Disclosure Checklists</u>, with many versions available tailored to specific jurisdictions
- An extensive electronic library of both global and jurisdiction-specific IFRS resources
- Expert analysis and commentary from Deloitte subject matter experts, including webcasts, podcasts and interviews
- E-learning modules for most IFRS Standards
- Enhanced search functionality, allowing easy access to topics of interest by tags, categories or free text searches, with search results intuitively presented by category with further filtering options
- <u>Deloitte comment letters</u> to the Board and numerous other bodies
- A mobile-friendly interface and updates through Twitter and RSS feeds

The model financial statements of International GAAP Holdings Limited for the year ended 31 December 2021 are intended to illustrate the presentation and disclosure requirements of IFRS Standards without the use of any actual numbers. They also contain additional disclosures that are considered to be best practice, particularly where such disclosures are included in illustrative examples provided within a specific Standard.

International GAAP Holdings Limited is assumed to have presented financial statements in accordance with IFRS Standards for a number of years. Therefore, it is not a first-time adopter of IFRS Standards. Readers should refer to IFRS 1 for specific requirements regarding an entity's first IFRS financial statements.

It is further assumed that International GAAP Holdings Limited does not qualify as an investment entity as defined in IFRS 10.

The model financial statements illustrate the impact of the application of the amendments to IFRS Standards that were issued on or before 30 September 2021 and are mandatorily effective for the annual period beginning on 1 January 2021. Accordingly, the model financial statements do not illustrate the impact of the application of new and revised IFRS Standards that are not yet mandatorily effective on 1 January 2021.

The model financial statements do not include separate financial statements for the parent, which may be required by local laws or regulations, or may be prepared voluntarily. Where an entity presents separate financial statements that comply with IFRS Standards, the requirements of IAS 27 will apply. Separate statements of profit or loss and other comprehensive income, financial position, changes in equity and cash flows for the parent will generally be required, together with supporting notes.

Further, these model financial statements assume that neither the parent company nor its subsidiaries are entities whose functional currency is the currency of a hyperinflationary economy.

In addition, the model financial statements have been presented without regard to local laws or regulations. Preparers of financial statements will need to ensure that the options selected under IFRS Standards do not conflict with such sources of regulation (e.g. the revaluation of assets is not permitted under certain reporting regimes – but these financial statements illustrate the presentation and disclosures required when an entity adopts the revaluation model under IAS 16). In addition, local laws or securities regulations may specify disclosures in addition to those required by IFRS Standards (e.g. in relation to directors' remuneration). Preparers of financial statements will consequently need to adapt the model financial statements to comply with such additional local requirements.

Suggested disclosures are cross-referenced to the underlying requirements in the texts of the relevant Standards and Interpretations.

For the purposes of presenting the statements of profit or loss and other comprehensive income and cash flows, the alternatives allowed under IFRS Standards for those statements have been illustrated. Preparers should select the alternatives most appropriate to their circumstances and apply the chosen presentation method consistently.

Note that in these model financial statements, we have frequently included line items that are not applicable to International GAAP Holdings Limited, so as to illustrate items that are commonly encountered in practice. This does not mean that we have illustrated all possible disclosures, nor should it be taken to mean that entities are required to display such line items in practice.

Areas that could be affected by climate change or COVID-19 are marked with symbols in the margin. The

indicates that the model financial statements could be impacted by the effects of the COVID-19 pandemic. The

indicates that disclosures might need to be adapted to explain how the group affects or/and is affected by climate change. The tables in Appendix 1 give an overview of all areas affected by climate change and/or COVID-19.

To see in more detail how areas of the financial statements can be affected by COVID-19, please see our <u>IFRS in Focus</u> newsletter 'Accounting Considerations related to the Coronavirus 2019 <u>Disease</u>'.

#### One statement vs. two statements

IAS 1 permits an entity to present profit or loss and other comprehensive income (OCI) in either a single statement or in two separate but consecutive statements. The alternative above illustrates the presentation of profit or loss and OCI in two separate but consecutive statements with expenses analysed by function. The alternative presented on the following pages illustrates the presentation of profit or loss and OCI in one statement with expenses analysed by nature.

Whichever presentation approach is adopted, the distinction is retained between items recognised in profit or loss and items recognised in OCI. Under both approaches, profit or loss, total OCI, as well as comprehensive income for the period (being the total of profit or loss and OCI) should be presented. Under the two-statement approach, the separate statement of profit or loss ends at 'profit for the year', and this 'profit for the year' is then the starting point for the statement of comprehensive income. In addition, the analysis of 'profit for the year' between the amount attributable to the owners of the Company and the amount attributable to non-controlling interests is presented as part of the separate statement of profit or loss.

Note that where the two-statement approach is adopted (as above), as required by IAS 1:10A, the statement of profit or loss must be displayed immediately before the statement of comprehensive income.

#### Source International GAAP Holdings Limited

#### **Commentary:**

#### OCI: items that may or may not be reclassified

Irrespective of whether the one-statement or the two-statement approach is followed, the items of OCI should be classified by nature and grouped into those that, in accordance with other IFRS Standards: (a) will not be reclassified subsequently to profit or loss; and (b) may be reclassified subsequently to profit or loss when specific conditions are met. An entity should present its share of OCI of associates and joint ventures accounted for using the equity method separately from those arising from the Group.

#### Presentation options for reclassification adjustments

In addition, in accordance with IAS 1:94, an entity may present reclassification adjustments in the statement of profit or loss and other comprehensive income or in the notes. In these model financial statements the reclassification adjustments have been presented in the notes.

#### Presentation options for income tax relating to items of OCI

Furthermore, for items of OCI, additional presentation options are available as follows: the individual items of OCI may be presented net of tax in the statement of profit or loss and other comprehensive income, or they may be presented gross with a single line deduction for tax relating to those items by allocating the tax between the items that may be reclassified subsequently to the profit or loss section and those that will not be reclassified subsequently to profit or loss section as presented in these model financial statements. Whichever option is selected, the income tax relating to each item of OCI must be disclosed, either in the statement of profit or loss and other comprehensive income or in the notes (see Note 13).

#### **Subtotals**

When an entity presents subtotals, IAS 1:85A requires that those subtotals:

- Comprise of line items made up of amounts recognised and measured in accordance with IFRS Standards
- Be presented and labelled in a manner that makes the line items that constitute the subtotal clear and understandable
- Be consistent from period to period
- Not be displayed with more prominence than the subtotals and totals required in IFRS Standards

#### **Immaterial items**

An entity need not provide a specific disclosure required by an IFRS Standard if the information resulting from that disclosure is not material. This is the case even if the IFRS Standard contains a list of specific requirements or describes them as minimum requirements.

IAS 1:40A requires an entity to present a statement of financial position as at the beginning of the preceding period (third statement of financial position) if:

- It applies an accounting policy retrospectively, makes a retrospective restatement of items in its financial statements or reclassifies items in its financial statements
- The retrospective application, retrospective restatement or the reclassification has a material effect on the information in the third statement of financial position

Other than disclosures of certain specified information as required by IAS 1:41–44 and IAS 8 the related notes to the third statement of financial position are not required to be disclosed.

#### **International GAAP Holdings Limited**

IAS 8:28

#### ${\it New \ and \ amended \ IFRS \ Standards \ that \ are \ effective \ for \ the \ current \ year}$

#### Impact of the initial application of Interest Rate Benchmark Reform

In the prior year, the Group adopted the Phase 1 amendments *Interest Rate Benchmark Reform—Amendments* to *IFRS 9/IAS 39 and IFRS 7*. These amendments modify specific hedge accounting requirements to allow hedge accounting to continue for affected hedges during the period of uncertainty before the hedged items or hedging instruments are amended as a result of the interest rate benchmark reform.

In the current year, the Group adopted the Phase 2 amendments *Interest Rate Benchmark Reform—Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16.* Adopting these amendments enables the Group to reflect the effects of transitioning from interbank offered rates (IBOR) to alternative benchmark interest rates (also referred to as 'risk free rates' or RFRs) without giving rise to accounting impacts that would not provide useful information to users of financial statements. The Group has not restated the prior period. Instead, the amendments have been applied retrospectively with any adjustments recognised in the appropriate components of equity as at 1 January 2021.

Both the Phase 1 and Phase 2 amendments are relevant to the Group because it applies hedge accounting to its interest rate benchmark exposures, and in the current period modifications in response to the reform have been made to some (but not all) of the Group's derivative and non-derivative financial instruments that mature post 2021 (the date by which the reform is expected to be implemented).

Details of the derivative and non-derivative financial instruments affected by the interest rate benchmark reform together with a summary of the actions taken by the Group to manage the risks relating to the reform and the accounting impact, including the impact on hedge accounting relationships, appear in Note 62.

The amendments are relevant for the following types of hedging relationships and financial instruments of the Group, all of which extend beyond 2021:

- Fair value hedges where LIBOR-linked derivatives are designated as a fair value hedge of fixed rate debt in respect of the GBP LIBOR risk component
- Cash flow hedges where IBOR-linked derivatives are designated as a cash flow hedge of IBOR-linked bank borrowings
- Bills of exchange and lease liabilities which reference LIBORs and are subject to the interest rate benchmark reform

The application of the amendments affects the Group's accounting in the following ways:

• The Group has issued CU-denominated fixed rate debt that is subject to a fair value hedge using CU fixed to CU LIBOR interest rate swaps. The amendments permit continuation of hedge accounting even if in the future the hedged benchmark interest rate, CU LIBOR, may no longer be separately identifiable and there is uncertainty about the replacement of the floating interest rates included in the interest rate swaps. However, this relief does not extend to the requirement that the designated interest rate risk component must continue to be reliably measurable. If the risk component is no longer reliably measurable, the hedging relationship will be discontinued.

[For those entities that apply the hedge accounting requirements in IAS 39, the following paragraph would be relevant.]

• The Group will not discontinue hedge accounting should the retrospective assessment of hedge effectiveness fall outside the 80-125 per cent range and the hedging relationship is subject to interest rate benchmark reforms. For those hedging relationships that are not subject to the interest rate benchmark reforms the entity continues to cease hedge accounting if retrospective effectiveness is outside the 80-125 per cent range.

The Group will continue to apply the Phase 1 amendments to IFRS 9/IAS 39 until the uncertainty arising from the interest rate benchmark reform with respect to the timing and the amount of the underlying cash flows to which the Group is exposed ends. The Group expects this uncertainty will continue until the Group's contracts that reference IBORs are amended to specify the date on which the interest rate benchmark will be replaced and the basis for the cash flows of the alternative benchmark rate are determined including any fixed spread.

#### **International GAAP Holdings Limited**

As a result of the Phase 2 amendments:

- When the contractual terms of the Group's bank borrowings are amended as a direct consequence of the
  interest rate benchmark reform and the new basis for determining the contractual cash flows is economically
  equivalent to the basis immediately preceding the change, the Group changes the basis for determining the
  contractual cash flows prospectively by revising the effective interest rate. If additional changes are made, which
  are not directly related to the reform, the applicable requirements of IFRS 9 are applied to the other changes. See
  note 32 for further details regarding changes made to the LIBOR-linked bank borrowings
- When a lease is modified as a direct consequence of the interest rate benchmark reform and the new basis for determining the lease payments is economically equivalent to the previous basis, the Group remeasures the lease liability to reflect the revised lease payments discounted using a revised discount rate that reflects the change in the basis for determining the contractual cash flows
- When changes are made to the hedging instruments, hedged item and hedged risk as a result of the interest rate benchmark reform, the Group updates the hedge documentation without discontinuing the hedging relationship and, in the case of a cash flow hedge, the amount accumulated in the cash flow hedge reserve is deemed to be based on SONIA (see note 62)
- For the Group's fair value hedges of a non-contractually specified benchmark component of interest rate risk, on transition to the alternative benchmark rate, if that risk rate is not separately identifiable at the date of designation, it will be deemed to have met the separately identifiable requirement at that date, if the Group reasonably expects the term specific interest rate component will be separately identifiable within a period of 24 months from the date the alternative benchmark rate is first designated, regardless of the term for which the risk is designated in that hedge. The 24-month period applies on a rate-by-rate basis

Note 62 provides the required disclosures related to these amendments.

## Impact of the initial application of COVID-19-Related Rent Concessions beyond 30 June 2021—Amendment to IFRS 16

In the prior year, the Group early adopted *Covid-19-Related Rent Concessions* (*Amendment to IFRS 16*) that provided practical relief to lessees in accounting for rent concessions occurring as a direct consequence of COVID-19, by introducing a practical expedient to IFRS 16. This practical expedient was available to rent concessions for which any reduction in lease payments affected payments originally due on or before 30 June 2021.

In March 2021, the Board issued *Covid-19-Related Rent Concessions beyond 30 June 2021 (Amendment to IFRS 16)* that extends the practical expedient to apply to reduction in lease payments originally due on or before 30 June 2022.

IAS 8:28(a)-(c); IFRS 16:C1C IFRS 16:46A In the current financial year, the Group has applied the amendment to IFRS 16 (as issued by the Board in May 2021) in advance of its effective date.

The practical expedient permits a lessee to elect not to assess whether a COVID-19-related rent concession is a lease modification. A lessee that makes this election shall account for any change in lease payments resulting from the COVID-19-related rent concession applying IFRS 16 as if the change were not a lease modification.

IFRS 16:46B

The practical expedient applies only to rent concessions occurring as a direct consequence of COVID-19 and only if all of the following conditions are met:

- The change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change
- Any reduction in lease payments affects only payments originally due on or before 30 June 2022 (a rent concession meets this condition if it results in reduced lease payments on or before 30 June 2022 and increased lease payments that extend beyond 30 June 2022)
- There is no substantive change to other terms and conditions of the lease

#### Source International GAAP Holdings Limited

Impact on accounting for changes in lease payments applying the exemption

IFRS 16:60A(a)

IFRS 16:C20A; IFRS 16:C20BA; IFRS 16:BC205J The Group has applied the practical expedient retrospectively to all rent concessions that became eligible for the practical expedient as a result of the March 2021 amendment. The Group has not restated prior period figures, and the difference arising on initial application of the March 2021 amendment has been recognised in the opening balance of retained earnings at 1 January 2021. The Group has, in total, benefited from a \_\_ month waiver of lease payments on buildings in [A Land], where those payments originally included amounts due after 30 June 2021 but before 30 June 2022. The waiver of lease payments which total CU\_\_ has been accounted for as a negative variable lease payment in profit or loss of CU\_\_ for lease payments waived in 2021 and an adjustment to the opening balance of retained earnings at 1 January 2021 of CU \_\_ for lease payments waived in 2020. The Group has derecognised the part of the lease liability that has been extinguished by the forgiveness of lease payments, consistent with the requirements of IFRS 9:3.3.1.

In the current period, the Group has benefited from a \_\_ month lease payment holiday on buildings in [*B Land*]. The payment holiday reduces payments in the period to [*date*] by CU\_\_, and increases payments in the period to [*date*] by CU\_\_. The Group has remeasured the lease liability using the revised lease payments and the discount rate originally applied to the lease, resulting in a decrease in the lease liability of CU\_\_ (2020: CU\_\_), which has been recognised as a negative variable lease payment in profit or loss. The Group continues to recognise interest expense on the lease liability.

IAS 8:30 - 31

#### New and revised IFRS Standards in issue but not yet effective

#### **Commentary:**

Entities are required to disclose in their financial statements the potential impact of new and revised IFRS Standards that have been issued but are not yet effective. The disclosures below reflect a cut off date of 30 September 2021. The potential impact of the application of any new and revised IFRS Standard issued by the Board after 30 September 2021, but before the financial statements are issued should also be considered and disclosed. The impact of the application of the new and revised IFRS Standards (see below) is for illustrative purposes only. Entities should analyse the impact based on their specific facts and circumstances.

At the date of authorisation of these financial statements, the Group has not applied the following new and revised IFRS Standards that have been issued but are not yet effective [and [in some cases] had not yet been adopted by the [relevant body]]:

#### Commentary:

The above statement should be tailored to be specific to the entity.

Most jurisdictions have a mechanism for incorporating IFRS Standards into their financial reporting system. These mechanisms range from direct adoption of 'IFRS Standards as issued by the Board', through adopting local standards that are 'equivalent to IFRS Standards', to the extensive endorsement mechanism used in the European Union and the United Kingdom.

The impact of the application of the new and revised IFRS Standards below is for illustrative purposes only. Entities should analyse the impact of these new or revised IFRS Standards on their financial statements based on their specific facts and circumstances and make appropriate disclosures.

Disclosure of Accounting Policies

Amendments to IAS 8 Definition of Accounting Estimates

Amendments to IAS 12 Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The directors do not expect that the adoption of the Standards listed above will have a material impact on the financial statements of the Group in future periods, except as noted below:

#### **IFRS 17 Insurance Contracts**

IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes IFRS 4 *Insurance Contracts*.

IFRS 17 outlines a general model, which is modified for insurance contracts with direct participation features, described as the variable fee approach. The general model is simplified if certain criteria are met by measuring the liability for remaining coverage using the premium allocation approach.

The general model uses current assumptions to estimate the amount, timing and uncertainty of future cash flows and it explicitly measures the cost of that uncertainty. It takes into account market interest rates and the impact of policyholders' options and guarantees.

In June 2020, the Board issued *Amendments to IFRS 17* to address concerns and implementation challenges that were identified after IFRS 17 was published. The amendments defer the date of initial application of IFRS 17 (incorporating the amendments) to annual reporting periods beginning on or after 1 January 2023. At the same time, the Board issued *Extension of the Temporary Exemption from Applying IFRS 9 (Amendments to IFRS 4)* that extends the fixed expiry date of the temporary exemption from applying IFRS 9 in IFRS 4 to annual reporting periods beginning on or after 1 January 2023.

IFRS 17 must be applied retrospectively unless impracticable, in which case the modified retrospective approach or the fair value approach is applied.

For the purpose of the transition requirements, the date of initial application is the start of the annual reporting period in which the entity first applies the Standard, and the transition date is the beginning of the period immediately preceding the date of initial application.

## Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures—Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.

The effective date of the amendments has yet to be set by the Board; however, earlier application of the amendments is permitted. The directors of the Company anticipate that the application of these amendments may have an impact on the Group's consolidated financial statements in future periods should such transactions arise.

#### **International GAAP Holdings Limited**

#### Amendments to IAS 1 Presentation of Financial Statements—Classification of Liabilities as Current or Noncurrent

The amendments to IAS 1 affect only the presentation of liabilities as current or non-current in the statement of financial position and not the amount or timing of recognition of any asset, liability, income or expenses, or the information disclosed about those items.

The amendments clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period, specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability, explain that rights are in existence if covenants are complied with at the end of the reporting period, and introduce a definition of 'settlement' to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services.

The amendments are applied retrospectively for annual periods beginning on or after 1 January 2023, with early application permitted.

#### Amendments to IFRS 3 Business Combinations—Reference to the Conceptual Framework

The amendments update IFRS 3 so that it refers to the 2018 *Conceptual Framework* instead of the 1989 *Framework*. They also add to IFRS 3 a requirement that, for obligations within the scope of IAS 37, an acquirer applies IAS 37 to determine whether at the acquisition date a present obligation exists as a result of past events. For a levy that would be within the scope of IFRIC 21 *Levies*, the acquirer applies IFRIC 21 to determine whether the obligating event that gives rise to a liability to pay the levy has occurred by the acquisition date.

Finally, the amendments add an explicit statement that an acquirer does not recognise contingent assets acquired in a business combination.

The amendments are effective for business combinations for which the date of acquisition is on or after the beginning of the first annual period beginning on or after 1 January 2022. Early application is permitted if an entity also applies all other updated references (published together with the updated *Conceptual Framework*) at the same time or earlier.

#### Amendments to IAS 16 Property, Plant and Equipment—Proceeds before Intended Use

The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced before that asset is available for use, i.e. proceeds while bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Consequently, an entity recognises such sales proceeds and related costs in profit or loss. The entity measures the cost of those items in accordance with IAS 2 *Inventories*.

The amendments also clarify the meaning of 'testing whether an asset is functioning properly'. IAS 16 now specifies this as assessing whether the technical and physical performance of the asset is such that it is capable of being used in the production or supply of goods or services, for rental to others, or for administrative purposes.

If not presented separately in the statement of comprehensive income, the financial statements shall disclose the amounts of proceeds and cost included in profit or loss that relate to items produced that are not an output of the entity's ordinary activities, and which line item(s) in the statement of comprehensive income include(s) such proceeds and cost.

The amendments are applied retrospectively, but only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the beginning of the earliest period presented in the financial statements in which the entity first applies the amendments.

The entity shall recognise the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at the beginning of that earliest period presented.

The amendments are effective for annual periods beginning on or after 1 January 2022, with early application permitted.

#### **International GAAP Holdings Limited**

## Amendments to IAS 37 Provisions, Contingent Liabilities and Contingent Assets—Onerous Contracts—Cost of Fulfilling a Contract

The amendments specify that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate directly to a contract consist of both the incremental costs of fulfilling that contract (examples would be direct labour or materials) and an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract).

The amendments apply to contracts for which the entity has not yet fulfilled all its obligations at the beginning of the annual reporting period in which the entity first applies the amendments. Comparatives are not restated. Instead, the entity shall recognise the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings or other component of equity, as appropriate, at the date of initial application.

The amendments are effective for annual periods beginning on or after 1 January 2022, with early application permitted.

## Annual Improvements to IFRS Standards 2018-2020—Amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IFRS 16 Leases, and IAS 41 Agriculture

The Annual Improvements include amendments to four Standards:

IFRS 1 First-time Adoption of International Financial Reporting Standards

The amendment provides additional relief to a subsidiary which becomes a first-time adopter later than its parent in respect of accounting for cumulative translation differences. As a result of the amendment, a subsidiary that uses the exemption in IFRS 1:D16(a) can now also elect to measure cumulative translation differences for all foreign operations at the carrying amount that would be included in the parent's consolidated financial statements, based on the parent's date of transition to IFRS Standards, if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary. A similar election is available to an associate or joint venture that uses the exemption in IFRS 1:D16(a).

The amendment is effective for annual periods beginning on or after 1 January 2022, with early application permitted.

#### IFRS 9 Financial Instruments

The amendment clarifies that in applying the '10 per cent' test to assess whether to derecognise a financial liability, an entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf.

The amendment is applied prospectively to modifications and exchanges that occur on or after the date the entity first applies the amendment.

The amendment is effective for annual periods beginning on or after 1 January 2022, with early application permitted.

#### IFRS 16 Leases

The amendment removes the illustration of the reimbursement of leasehold improvements.

As the amendment to IFRS 16 only regards an illustrative example, no effective date is stated.

#### IAS 41 Agriculture

The amendment removes the requirement in IAS 41 for entities to exclude cash flows for taxation when measuring fair value. This aligns the fair value measurement in IAS 41 with the requirements of IFRS 13 *Fair Value Measurement* to use internally consistent cash flows and discount rates and enables preparers to determine whether to use pretax or post-tax cash flows and discount rates for the most appropriate fair value measurement.

The amendment is applied prospectively, i.e. for fair value measurements on or after the date an entity initially applies the amendment.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022, with earlier application permitted.

#### **International GAAP Holdings Limited**

## Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgements—Disclosure of Accounting Policies

The amendments change the requirements in IAS 1 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information'. Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

The supporting paragraphs in IAS 1 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material.

The Board has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice Statement 2.

The amendments to IAS 1 are effective for annual periods beginning on or after 1 January 2023, with earlier application permitted and are applied prospectively. The amendments to IFRS Practice Statement 2 do not contain an effective date or transition requirements.

## Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors—Definition of Accounting Estimates

The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty".

The definition of a change in accounting estimates was deleted. However, the Board retained the concept of changes in accounting estimates in the Standard with the following clarifications:

- A change in accounting estimate that results from new information or new developments is not the correction of an error
- The effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors

The Board added two examples (Examples 4-5) to the Guidance on implementing IAS 8, which accompanies the Standard. The Board has deleted one example (Example 3) as it could cause confusion in light of the amendments.

The amendments are effective for annual periods beginning on or after 1 January 2023 to changes in accounting policies and changes in accounting estimates that occur on or after the beginning of that period, with earlier application permitted.

### Amendments to IAS 12 Income Taxes—Deferred Tax related to Assets and Liabilities arising from a Single Transaction

The amendments introduce a further exception from the initial recognition exemption. Under the amendments, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences.

Depending on the applicable tax law, equal taxable and deductible temporary differences may arise on initial recognition of an asset and liability in a transaction that is not a business combination and affects neither accounting nor taxable profit. For example, this may arise upon recognition of a lease liability and the corresponding right-of-use asset applying IFRS 16 at the commencement date of a lease.

Following the amendments to IAS 12, an entity is required to recognise the related deferred tax asset and liability, with the recognition of any deferred tax asset being subject to the recoverability criteria in IAS 12.

The Board also adds an illustrative example to IAS 12 that explains how the amendments are applied.

## **International GAAP Holdings Limited**

The amendments apply to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, at the beginning of the earliest comparative period an entity recognises:

- A deferred tax asset (to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised) and a deferred tax liability for all deductible and taxable temporary differences associated with:
  - Right-of-use assets and lease liabilities
  - Decommissioning, restoration and similar liabilities and the corresponding amounts recognised as part of the cost of the related asset
- The cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at that date

The amendments are effective for annual reporting periods beginning on or after 1 January 2023, with earlier application permitted.

## Commentary:

IAS 8:30 requires entities to give known or reasonably estimable information relevant to assessing the possible impact that the application of any new or revised IFRS Standard will have on the entity's financial statements in the period of initial application. The regulatory requirements in the various jurisdictions may differ as to how detailed the disclosures need to be; some regulators may require both qualitative and quantitative information to be disclosed whereas others may consider that qualitative information (e.g. key areas that may be affected by the new or revised IFRS Standard) suffices in many circumstances. For this reason, relevant regulatory guidance should also be taken into account in preparing the disclosure.

This applies to all new or revised IFRS Standards that have been issued but are not yet effective.

IAS 1:112(a); IAS 1:119 - 121

## 3. Significant accounting policies

## Commentary:

The following are examples of the types of accounting policies that might be disclosed in this entity's financial statements. Entities are required to disclose in the summary of significant accounting policies the measurement basis (or bases) used in preparing the financial statements and the other accounting policies used that are relevant to an understanding of the financial statements. An accounting policy may be significant because of the nature of the entity's operations even if amounts for the current and prior periods are not material.

In deciding whether a particular accounting policy should be disclosed, management considers whether disclosure would assist users in understanding how transactions, other events and conditions are reflected in the reported financial performance and financial position. Disclosure of particular accounting policies is especially useful to users when those policies are selected from alternatives allowed in Standards and Interpretations.

Each entity considers the nature of its operations and the policies that users of its financial statements would expect to be disclosed for that type of entity. It is also appropriate to disclose each significant accounting policy that is not specifically required by IFRS Standards, but that is selected and applied in accordance with IAS 8.

For completeness, in these model financial statements, accounting policies have been provided for some immaterial items, although this is not required under IFRS Standards. In general, immaterial and irrelevant policies should be omitted.

IAS 1:117(a) IAS 1:16

## **Basis of accounting**

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS Standards). [The financial statements have also been prepared in accordance with IFRS Standards adopted by the European Union and therefore the Group financial statements comply with Article 4 of the EU IAS Regulation.]

#### Commentary:

*The above statement should be tailored to be specific to the entity.* 

Most jurisdictions have a mechanism for incorporating IFRS Standards into their financial reporting system. These mechanisms range from direct adoption of 'IFRS Standards as issued by the IASB', through adopting local standards that are 'equivalent to IFRS Standards', to the extensive endorsement mechanism used in the European Union.

## **International GAAP Holdings Limited**

The financial statements have been prepared on the historical cost basis, except for the revaluation of certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IFRS 16, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36.

IAS 1:117(b) IAS 1:112(a) IAS 1:17(b)

The principal accounting policies adopted are set out below.

#### **Going concern**

The directors have, at the time of approving the financial statements, a reasonable expectation that the Group have adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the financial statements.

#### **Basis of consolidation**

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries) made up to 31 December each year. Control is achieved when the Company:

- Has the power over the investee
- Is exposed, or has rights, to variable returns from its involvement with the investee
- Has the ability to use its power to affect its returns

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- The size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders
- Potential voting rights held by the Company, other vote holders or other parties
- Rights arising from other contractual arrangements
- Any additional facts and circumstances that indicate that the Company has, or does not have, the current ability
  to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous
  shareholders' meetings

IAS 1:25

<sup>\*</sup>This symbol indicates that this area of the model financial statements may be affected by the effects of climate change. Please see the table in Appendix 1 to see how this area may be affected. For areas affected by the effects of climate change, it would be expected that the entity discusses in its disclosures how the area is affected.

## **International GAAP Holdings Limited**

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, the results of subsidiaries acquired or disposed of during the year are included in profit or loss from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between the members of the Group are eliminated on consolidation.

Non-controlling interests in subsidiaries are identified separately from the Group's equity therein. Those interests of non-controlling shareholders that are present ownership interests entitling their holders to a proportionate share of net assets upon liquidation may initially be measured at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement is made on an acquisition-by-acquisition basis. Other non-controlling interests are initially measured at fair value. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of the subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Group's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the Company.

When the Group loses control of a subsidiary, the gain or loss on disposal recognised in profit or loss is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as required/permitted by applicable IFRS Standards). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IFRS 9 when applicable, or the cost on initial recognition of an investment in an associate or a joint venture.

## **Business combinations**

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interest issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value at the acquisition date, except that:

- Deferred tax assets or liabilities and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 and IAS 19 respectively
- Liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with IFRS 2 at the acquisition date (see below)
- Assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 are measured in accordance with that Standard

## **International GAAP Holdings Limited**

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

When the consideration transferred by the Group in a business combination includes a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Other contingent consideration is remeasured to fair value at subsequent reporting dates with changes in fair value recognised in profit or loss.

When a business combination is achieved in stages, the Group's previously held interests (including joint operations) in the acquired entity are remeasured to its acquisition-date fair value and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

#### Goodwill

Goodwill is initially recognised and measured as set out above.

Goodwill is not amortised but is reviewed for impairment at least annually. For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) expected to benefit from the synergies of the combination. Cash-generating units to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. An impairment loss recognised for goodwill is not reversed in a subsequent period.

On disposal of a cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

The Group's policy for goodwill arising on the acquisition of an associate is described below.

#### Investments in associates and joint ventures

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

## **International GAAP Holdings Limited**

The results and assets and liabilities of associates or joint ventures are incorporated in these financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with IFRS 5.

Under the equity method, an investment in an associate or a joint venture is recognised initially in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate or joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture. On acquisition of the investment in an associate or a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The requirements of IAS 36 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate or a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised is not allocated to any asset, including goodwill that forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate or a joint venture. When the Group retains an interest in the former associate or a joint venture and the retained interest is a financial asset, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with IFRS 9. The difference between the carrying amount of the associate or a joint venture at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate or a joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate on the same basis as would be required if that associate had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate or joint venture would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the associate or joint venture is disposed of.

When the Group reduces its ownership interest in an associate or a joint venture but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a Group entity transacts with an associate or a joint venture of the Group, profits and losses resulting from the transactions with the associate or joint venture are recognised in the Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not related to the Group.

The Group applies IFRS 9, including the impairment requirements, to long-term interests in an associate or joint venture to which the equity method is not applied and which form part of the net investment in the investee. Furthermore, in applying IFRS 9 to long-term interests, the Group does not take into account adjustments to their carrying amount required by IAS 28 (i.e. adjustments to the carrying amount of long-term interests arising from the allocation of losses of the investee or assessment of impairment in accordance with IAS 28).

## **International GAAP Holdings Limited**

## Interests in joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

When a Group entity undertakes its activities under joint operations, the Group as a joint operator recognises in relation to its interest in a joint operation:

- Its assets, including its share of any assets held jointly
- Its liabilities, including its share of any liabilities incurred jointly
- Its revenue from the sale of its share of the output arising from the joint operation
- Its share of the revenue from the sale of the output by the joint operation
- Its expenses, including its share of any expenses incurred jointly

The Group accounts for the assets, liabilities, revenue and expenses relating to its interest in a joint operation in accordance with the IFRS Standards applicable to the particular assets, liabilities, revenue and expenses.

When a Group entity transacts with a joint operation in which a Group entity is a joint operator (such as a sale or contribution of assets), the Group is considered to be conducting the transaction with the other parties to the joint operation, and gains and losses resulting from the transactions are recognised in the Group's consolidated financial statements only to the extent of other parties' interests in the joint operation.

When a Group entity transacts with a joint operation in which a Group entity is a joint operator (such as a purchase of assets), the Group does not recognise its share of the gains and losses until it resells those assets to a third party.

## Non-current assets held for sale

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

When the Group is committed to a sale plan involving disposal of an investment in an associate or, a portion of an investment in an associate, the investment, or the portion of the investment in the associate, that will be disposed of is classified as held for sale when the criteria described above are met. The Group then ceases to apply the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate that has not been classified as held for sale continues to be accounted for using the equity method.

## **Revenue recognition**

The Group recognises revenue from the following major sources:

- Sale of leisure goods and electronic equipment, including the related loyalty programme 'Maxi-Points Scheme', as disclosed in note 60, maintenance included in the price of products sold, as well as warranties granted under local legislation as disclosed in note 39
- Installation of computer software for specialised business applications
- Construction of residential properties

Source	International GAAP Holdings Limited
IFRS 15:31 IFRS 15:46 IFRS 15:47 IFRS 15:119	Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognises revenue when it transfers control of a product or service to a customer.
	Sale of leisure goods
IFRS 15:119(e) IFRS 15:B30	The Group sells sport shoes, sport equipment and outdoor play equipment both to the wholesale market and directly to customers through its own retail outlets. Sales-related warranties associated with leisure goods cannot be purchased separately and they serve as an assurance that the products sold comply with agreed-upon specifications. Accordingly, the Group accounts for warranties in accordance with IAS 37 (see note 39).
IFRS 15:125	For sales of leisure goods to the wholesale market, revenue is recognised when control of the goods has transferred, being when the goods have been shipped to the wholesaler's specific location (delivery). Following delivery, the wholesaler has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility when onselling the goods and bears the risks of obsolescence and loss in relation to the
IFRS15:108 IFRS 15:125	goods. A receivable is recognised by the Group when the goods are delivered to the wholesaler as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due.
IFRS 15:125	For sales of goods to retail customers, revenue is recognised when control of the goods has transferred, being at the point the customer purchases the goods at the retail outlet. Payment of the transaction price is due immediately at the point the customer purchases the goods.
IFRS 15:55 IFRS 15:119(d) IFRS 15:126(b) IFRS 15:126(d) IFRS 15:B21	Under the Group's standard contract terms, customers have a right of return within 30 days. At the point of sale, a refund liability and a corresponding adjustment to revenue is recognised for those products expected to be returned. At the same time, the Group has a right to recover the product when customers exercise their right of return so consequently recognises a right to returned goods asset and a corresponding adjustment to cost of sales. The Group uses its accumulated historical experience to estimate the number of returns on a portfolio level using the expected value method. It is considered highly probable that a significant reversal in the cumulative revenue recognised will not occur given the consistent level of returns over previous years.
	Sale of electronic equipment
IFRS 15:55 IFRS 15:125	The Group sells electronic equipment to the wholesale market and directly to customers both through its own retail outlets and through internet sales.
IFRS 15:119(d) IFRS 15:B21	For sales of electronic equipment to the wholesale market and through retail outlets and internet sales, revenue is recognised by the Group at a point in time in line with the policy outlined above for the sale of leisure goods. For sales to retail customers (from both retail outlet and internet sales) there exists the same 30-day right of return and accordingly a refund liability and a right to returned goods asset are recognised in relation to electronic equipment expected to be returned.
IFRS 15:106 IFRS 15:117 IFRS 15:125	For internet sales, revenue is recognised when control of the goods has transferred to the customer, being at the point the goods are delivered to the customer. Delivery occurs when the goods have been shipped to the customer's specific location. When the customer initially purchases the goods online the transaction price received by the Group is recognised as a contract liability until the goods have been delivered to the customer.
	'Maxi-Points' customer loyalty programme
IFRS 15:B39 IFRS 15:B40	The Group operates a 'Maxi-Points' loyalty programme through which retail customers accumulate points on purchases of leisure goods and electronic equipment that entitle them to discounts on future purchases. These points provide a discount to customers that they would not receive without purchasing the leisure goods or electronic equipment (i.e. a material right). The promise to provide the discount to the customer is therefore a separate performance obligation.
IFRS 15:74 IFRS 15:106 IFRS 15:117 IFRS 15:B42	The transaction price is allocated between the product, the maintenance services (if the product is electronic equipment, as described below) and the points on a relative stand-alone selling price basis. The stand-alone selling price per point is estimated based on the discount to be given when the points are redeemed by the customer and the likelihood of redemption, as evidenced by the Group's historical experience. A contract liability is recognised for revenue relating to the loyalty points at the time of the initial sales transaction. Revenue from the loyalty points is recognised when the points are redeemed by the customer. Revenue for points that are not expected to be redeemed is recognised in proportion to the pattern of rights exercised by customers.

## **International GAAP Holdings Limited** Source Maintenance relating to electronic equipment Included in the transaction price for the sale of electronic equipment is an after-sales service. This service relates to IFRS 15:B41 maintenance work that may be required to be carried out on the equipment for a three-year period after sale. This period can then be extended if the customer requires additional years of maintenance services. The renewal of services after the three-year period will be for the price at which these are sold by the Group to all of its customers as at the date of renewal regardless of the existence of a renewal option. Consequently, the option to extend the renewal period does not provide customers with any advantage when they enter into the initial contract and therefore no revenue has been deferred relating to this renewal option. IFRS 15:27 The maintenance service is considered to be a distinct service as it is both regularly supplied by the Group to other IFRS 15:74 customers on a stand-alone basis and is available for customers from other providers in the market. A portion of IFRS 15:81 the transaction price is therefore allocated to the maintenance services based on the stand-alone selling price of IFRS 15:126 (c) those services. Discounts are not considered as they are only given in rare circumstances and are never material. IFRS 15:B29 Revenue relating to the maintenance services is recognised over time. The transaction price allocated to these IFRS 15:35(a) services is recognised as a contract liability at the time of the initial sales transaction and is released on a straight-IFRS 15:123(a) line basis over the period of service (i.e. three years when the services are purchased together with the underlying IFRS 15:124 equipment). IFRS 15:106 IFRS 15:117 Installation of software services IFRS 15:35(b) The Group provides a service of installation of various software products for specialised business operations. IFRS 15:124 Such services are recognised as a performance obligation satisfied over time. Revenue is recognised for these IFRS 15:107 installation services based on the stage of completion of the contract. The directors have assessed that the stage IFRS 15:117 of completion determined as the proportion of the total time expected to install that has elapsed at the end of the reporting period is an appropriate measure of progress towards complete satisfaction of these performance obligations under IFRS 15. Payment for installation of software services is not due from the customer until the installation services are complete and therefore a contract asset is recognised over the period in which the installation services are performed representing the entity's right to consideration for the services performed to date. Construction of residential properties IFRS 15:35(c) The Group constructs and sells residential properties under long-term contracts with customers. Such contracts IFRS 15:124 are entered into before construction of the residential properties begins. Under the terms of the contracts, the Group is contractually restricted from redirecting the properties to another customer and has an enforceable right to payment for work done. Revenue from construction of residential properties is therefore recognised over time on a cost-to-cost method, i.e. based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs. The directors consider that this input method is an appropriate measure of the progress towards complete satisfaction of these performance obligations under IFRS 15. The Group becomes entitled to invoice customers for construction of residential properties based on achieving a IFRS 15:117 series of performance-related milestones. When a particular milestone is reached the customer is sent a relevant IFRS 15:106 statement of work signed by a third party assessor and an invoice for the related milestone payment. The Group IFRS 15:107 will previously have recognised a contract asset for any work performed. Any amount previously recognised as a IFRS 15:126 contract asset is reclassified to trade receivables at the point at which it is invoiced to the customer. If the milestone payment exceeds the revenue recognised to date under the cost-to-cost method then the Group recognises a contract liability for the difference. There is not considered to be a significant financing component in construction contracts with customers as the period between the recognition of revenue under the cost-to-cost method and the milestone payment is always less than one year.

Source	International GAAP Holdings Limited
<b>(‡)</b>	Leases
IFRS 16:51	(a) The Group as lessee
IFRS 16:5 IFRS 16:6 IFRS 16:9 IFRS 16:60	The Group assesses whether a contract is, or contains, a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.
IFRS 16:26	The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.
IFRS 16:27	The incremental borrowing rate depends on the term, currency and start date of the lease and is determined based on a series of inputs including: the risk-free rate based on government bond rates; a country-specific risk adjustment; a credit risk adjustment based on bond yields; and an entity-specific adjustment when the risk profile of the entity that enters into the lease is different to that of the Group and the lease does not benefit from a guarantee from the Group.
11105 10.27	Lease payments included in the measurement of the lease liability comprise :
	Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable
	Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date
	The amount expected to be payable by the lessee under residual value guarantees
	The exercise price of purchase options, if the lessee is reasonably certain to exercise the options
	• Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease
IFRS 16:47 IFRS 16:39	The lease liability is presented as a separate line in the consolidated statement of financial position.
	The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.
	The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:
IFRS 16:40(a)	• The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the
IFRS 16:42	revised lease payments using a revised discount rate
	The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used)
IFRS 16:45(c)	• A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification
IFRS 16:24	The Group did not make any such adjustments during the periods presented
IFRS 16:24	The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments

subsequently measured at cost less accumulated depreciation and impairment losses

made at or before the commencement day, less any lease incentives received and any initial direct costs. They are

IFRS 16:30

Source	International GAAP Holdings Limited
Source	
	Whenever the Group incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under IAS 37. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.
IFRS 16:32	Right-of-use assets are depreciated over the shorter period of lease term and useful life of the right-of-use asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.
IFRS 16:47	The right-of-use assets are presented as a separate line in the consolidated statement of financial position.
	The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, Plant and Equipment' policy.
IFRS 16:38	Variable rents that do not depend on an index or rate are not included in the measurement the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in the line "Other expenses" in profit or loss (see note 30).
IFRS 16:12 IFRS 16:15	As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Group has not used this practical expedient. For contracts that contain a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.
IFRS 16:89	(b) The Group as lessor
IFRS 16:61 IFRS 16:62	The Group enters into lease agreements as a lessor with respect to some of its investment properties. The Group also rents equipment to retailers necessary for the presentation and customer fitting and testing of footwear and equipment manufactured by the Group.
	Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.
IFRS 16:B58	When the Group is an intermediate lessor, it accounts for the head lease and the sub-lease as two separate contracts. The sub-lease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease.
IFRS 16:81 IFRS 16:83	Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.
IFRS 16:67 IFRS 16:75	Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.
	Subsequent to initial recognition, the Group regularly reviews the estimated unguaranteed residual value and applies the impairment requirements of IFRS 9, recognising an allowance for expected credit losses on the lease receivables.
<b>(</b>	Finance lease income is calculated with reference to the gross carrying amount of the lease receivables, except for credit-impaired financial assets for which interest income is calculated with reference to their amortised cost (i.e. after a deduction of the loss allowance).
IFRS 16:17	When a contract includes both lease and non-lease components, the Group applies IFRS 15 to allocate the consideration under the contract to each component.
	Foreign currencies
	In preparing the financial statements of the Group entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing on the dates of the transactions. At each reporting date, monetary assets and liabilities that are denominated in foreign currencies

## **International GAAP Holdings Limited**

are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognised in profit or loss in the period in which they arise except for:

- Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings
- Exchange differences on transactions entered into to hedge certain foreign currency risks (see below under financial instruments/hedge accounting)
- Exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur in the foreseeable future (therefore forming part of the net investment in the foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss on disposal or partial disposal of the net investment

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated at exchange rates prevailing on the reporting date. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the date of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in a foreign exchange translation reserve (attributed to non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation or a partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in a foreign exchange translation reserve in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

In addition, in relation to a partial disposal of a subsidiary that includes a foreign operation that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. partial disposals of associates or joint arrangements that do not result in the Group losing significant influence or joint control), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

## **Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

To the extent that variable rate borrowings are used to finance a qualifying asset and are hedged in an effective cash flow hedge of interest rate risk, the effective portion of the derivative is recognised in other comprehensive income and reclassified to profit or loss when the qualifying asset affects profit or loss. To the extent that fixed rate borrowings are used to finance a qualifying asset and are hedged in an effective fair value hedge of interest rate risk, the capitalised borrowing costs reflect the hedged interest rate.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

#### IAS 20:39(a)

## **Government grants**

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

## **International GAAP Holdings Limited**

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets (including property, plant and equipment) are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

#### Commentary:

Governments may be providing support to entities through programmes that do not result in recognition of income in the financial statements of the participating entities.

For example, certain governments are offering short-term debt facilities, sometimes in the form of commercial paper, to support liquidity of entities that were financially sound before the COVID-19 pandemic. To the extent that the interest rate paid by the borrower and other terms of the debt instruments reflect market conditions, the borrowing does not include a government grant that requires recognition in the financial statements. Nevertheless, such support is considered government assistance under IAS 20.

Entities will need to consider if the significance of the benefit received is such that disclosure of the nature, extent and duration of the assistance is necessary in order to avoid the financial statements from being misleading.

#### **Retirement and termination benefit costs**

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions. Payments made to state-managed retirement benefit plans are accounted for as payments to defined contribution plans where the Group's obligations under the plans are equivalent to those arising in a defined contribution retirement benefit plan.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurements comprising actuarial gains and losses, the effect of the asset ceiling (if applicable) and the return on plan assets (excluding interest) are recognised immediately in the statement of financial position with a charge or credit to other comprehensive income in the period in which they occur. Remeasurements recognised in other comprehensive income are not reclassified. Past service cost is recognised in profit or loss when the plan amendment or curtailment occurs, or when the Group recognises related restructuring costs or termination benefits, if earlier. Gains or losses on settlement of a defined benefit plan are recognised when the settlement occurs. Net interest is calculated by applying a discount rate to the net defined benefit liability or asset. Defined benefit costs are split into three categories:

- Service costs, which includes current service cost, past service cost and gains and losses on curtailments and settlements
- Net interest expense or income
- Remeasurements

The Group recognises service costs within profit or loss as cost of sales and administrative expenses (see note 58).

Net interest expense or income is recognised within finance costs (see note 11).

The retirement benefit obligation recognised in the consolidated statement of financial position represents the deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

## **International GAAP Holdings Limited**

[If applicable include alternative explanation about rights to refunds: The Trust Deed provides International GAAP Holdings Limited with an unconditional right to a refund of surplus assets assuming the full settlement of plan liabilities in the event of a plan wind-up. Furthermore, in the ordinary course of business the Trustee has no rights to unilaterally wind up, or otherwise augment the benefits due to members of, the plan. Based on these rights, any net surplus in the plan is recognised in full.]

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan.

When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting treatment depends on whether the contributions are linked to service, as follows:

- If the contributions are not linked to services (e.g. contributions are required to reduce a deficit arising from losses on plan assets or from actuarial losses), they are reflected in the remeasurement of the net defined benefit liability (asset)
- If contributions are linked to services, they reduce service costs. For the amount of contribution that is dependent on the number of years of service, the entity reduces service cost by attributing the contributions to periods of service using the attribution method required by IAS 19:70 for the gross benefits. For the amount of contribution that is independent of the number of years of service, the entity [reduces service cost in the period in which the related service is rendered/reduces service cost by attributing contributions to the employees' periods of service in accordance with IAS 19:70]

## Short-term and other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Group in respect of services provided by employees up to the reporting date.

#### **Taxation**

The income tax expense represents the sum of the tax currently payable and deferred tax.

#### Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

A provision is recognised for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals within the Company supported by previous experience in respect of such activities and in certain cases based on specialist independent tax advice.

## **International GAAP Holdings Limited**

Deferred tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, a deferred tax liability is not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax laws and rates that have been enacted or substantively enacted at the reporting date.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. The directors reviewed the Group's investment property portfolios and concluded that none of the Group's investment properties are held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, the directors have determined that the 'sale' presumption set out in the amendments to IAS 12 is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of the investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

Current tax and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

## IAS 16:73(a)-(c)

## Property, plant and equipment

Land and buildings held for use in the production or supply of goods or services for rental to others (excluding investment properties), or for administrative purposes, are stated in the statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any accumulated depreciation and accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair values at the reporting date.

## **International GAAP Holdings Limited**

Any revaluation increase arising on the revaluation of such land and buildings is credited to the properties revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognised as an expense, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. A decrease in carrying amount arising on the revaluation of such land and buildings is charged as an expense to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.

Depreciation on revalued buildings is recognised in profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings.

Properties in the course of construction for production, supply or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Depreciation of these assets, determined on the same basis as other property assets, commences when the assets are ready for their intended use.

Freehold land is not depreciated.

Plant, machinery, fixtures and fittings are stated at cost less accumulated depreciation and accumulated impairment loss.

Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method, on the following bases:

Buildings 4 per cent per annum

Plant and machinery 10 per cent - 25 per cent per annum

Fixtures and fittings 10 per cent - 30 per cent per annum

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Right-of-use assets are depreciated over the shorter period of the lease term and the useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

#### Commentary:

Provide additional explanation if the Group has elected to use fair value or a previous revaluation as deemed cost on transition to IFRS Standards.

## IAS 40:75(a)

## **Investment property**

Investment property, which is property held to earn rentals and/or for capital appreciation (including property under construction for such purposes), is measured initially at cost, including transaction costs. Subsequent to initial recognition, investment property is measured at fair value. Gains or losses arising from changes in the fair value of investment property are included in profit or loss in the period in which they arise.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognised.

## **International GAAP Holdings Limited**

#### Commentary:

A Group that elects to use the cost model for investment property (not illustrated in these model financial statements) should disclose an appropriate policy and make reference, if relevant, to the use of the elections to use fair value or previous revaluations as deemed cost on transition.

#### IAS 38:118(a)

## Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives which are disclosed in note 17. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

#### IAS 38:118(b)

## Internally-generated intangible assets - research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following conditions have been demonstrated:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale
- The intention to complete the intangible asset and use or sell it
- The ability to use or sell the intangible asset
- How the intangible asset will generate probable future economic benefits
- The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset
- The ability to measure reliably the expenditure attributable to the intangible asset during its development

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

## IAS 38:118(b)

## Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognised separately from goodwill are recognised initially at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

## **Derecognition of intangible assets**

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

## **International GAAP Holdings Limited**

#### **Patents and trademarks**

Patents and trademarks are measured initially at purchase cost and are amortised on a straight-line basis over their estimated useful lives.

## Impairment of property, plant and equipment and intangible assets excluding goodwill

At each reporting date, the Group reviews the carrying amounts of its property, plant and equipment and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with an indefinite useful life are tested for impairment at least annually and whenever there is an indication at the end of a reporting period that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease and to the extent that the impairment loss is greater than the related revaluation surplus, the excess impairment loss is recognised in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss to the extent that it eliminates the impairment loss which has been recognised for the asset in prior years. Any increase in excess of this amount is treated as a revaluation increase.

## IAS 2:36(a)

#### **Inventories**

Inventories are stated at the lower of cost and net realisable value. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Cost is calculated using the weighted average cost method. Net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

## IFRS 7:21

## Financial instruments

Financial assets and financial liabilities are recognised in the Group's statement of financial position when the Group becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value, except for trade receivables that do not have a significant financing component which are measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

## Source International GAAP Holdings Limited

#### Financial assets

#### IFRS 7:B5(c)

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are measured subsequently in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

#### **Classification of financial assets**

Debt instruments that meet the following conditions are measured subsequently at amortised cost:

- The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Debt instruments that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

Despite the foregoing, the Group may make the following irrevocable election / designation at initial recognition of a financial asset:

- The Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met (see (iii) below)
- The Group may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch (see (iv) below)

(i) Amortised cost and effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial assets other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition. For purchased or originated credit-impaired financial assets, a credit-adjusted effective interest rate is calculated by discounting the estimated future cash flows, including expected credit losses, to the amortised cost of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost and at FVTOCI. For financial assets other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become is recognised by applying the effective interest rate to the amortised cost of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.

## **International GAAP Holdings Limited**

#### IFRS 7:B5(e)

For purchased or originated credit-impaired financial assets, the Group recognises interest income by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition. The calculation does not revert to the gross basis even if the credit risk of the financial asset subsequently improves so that the financial asset is no longer credit-impaired.

Interest income is recognised in profit or loss and is included in the "finance income - interest income" line item (note 9).

## (ii) Debt instruments classified as at FVTOCI

The corporate bonds held by the Group are classified as at FVTOCI. Fair value is determined in the manner described in note 62(a)(i). The corporate bonds are initially measured at fair value plus transaction costs. Subsequently, changes in the carrying amount of these corporate bonds as a result of foreign exchange gains and losses (see below), impairment gains or losses (see below), and interest income calculated using the effective interest method (see (i) above) are recognised in profit or loss. The amounts that are recognised in profit or loss are the same as the amounts that would have been recognised in profit or loss if these corporate bonds had been measured at amortised cost. All other changes in the carrying amount of these corporate bonds are recognised in other comprehensive income and accumulated under the heading of investments revaluation reserve. When these corporate bonds are derecognised, the cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss.

## (iii) Equity instruments designated as at FVTOCI

On initial recognition, the Group may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments revaluation reserve. The cumulative gain or loss is not reclassified to profit or loss on disposal of the equity investments, instead, it is transferred to retained earnings.

Dividends on these investments in equity instruments are recognised in profit or loss in accordance with IFRS 9, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the 'Finance income - Other' line item (note 9) in profit or loss.

The Group designated all investments in equity instruments that are not held for trading as at FVTOCI on initial recognition (see note 24).

A financial asset is held for trading if either:

- It has been acquired principally for the purpose of selling it in the near term
- On initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has evidence of a recent actual pattern of short-term profit-taking
- It is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument)

## (iv) Financial assets at FVTPL

Financial assets that do not meet the criteria for being measured at amortised cost or FVTOCI (see (i) to (iii) above) are measured at FVTPL. Specifically:

- Investments in equity instruments are classified as at FVTPL, unless the Group designates an equity investment that is neither held for trading nor a contingent consideration arising from a business combination as at FVTOCI on initial recognition (see (iii) above)
- Debt instruments that do not meet the amortised cost criteria or the FVTOCI criteria (see (i) and (ii) above) are classified as at FVTPL. In addition, debt instruments that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency (so called 'accounting mismatch') that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Group has not designated any debt instruments as at FVTPL

## **International GAAP Holdings Limited**

#### IFRS 7:B5(e)

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any fair value gains or losses recognised in profit or loss to the extent they are not part of a designated hedging relationship (see hedge accounting policy). The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset and is included in the 'Other gains and losses' line item (note 10). Fair value is determined in the manner described in note 62(a)(i).

## Foreign exchange gains and losses

The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically:

- For financial assets measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the 'Other gains and losses' line item (note 10)
- For debt instruments measured at FVTOCI that are not part of a designated hedging relationship, exchange differences on the amortised cost of the debt instrument are recognised in profit or loss in the 'Other gains and losses' line item (note 10). As the foreign currency element recognised in profit or loss is the same as if it was measured at amortised cost, the residual foreign currency element based on the translation of the carrying amount (at fair value) is recognised in other comprehensive income in the investments revaluation reserve

## IFRS 7:B5(e)

- For financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss in the 'Other gains and losses' line item as part of the fair value gain or loss (note 10)
- For equity instruments measured at FVTOCI, exchange differences are recognised in other comprehensive income in the investments revaluation reserve

See hedge accounting policy regarding the recognition of exchange differences where the foreign currency risk component of a financial asset is designated as a hedging instrument for a hedge of foreign currency risk.

## IFRS 7:35F

## Impairment of financial assets

The Group recognises a loss allowance for expected credit losses on investments in debt instruments that are measured at amortised cost or at FVTOCI, lease receivables, trade receivables and contract assets, as well as on financial guarantee contracts. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Group always recognises lifetime expected credit losses (ECL) for trade receivables, contract assets and lease receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

## Source International GAAP Holdings Limited

# IFRS 7:35F(a) IFRS 7:35G(b)

(i) Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument at the reporting date with the risk of a default occurring on the financial instrument at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations.

## IFRS 7:35F(a) IFRS 7:35G(a)(ii)

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- An actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating
- Significant deterioration in external market indicators of credit risk for a particular financial instrument, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortised cost
- Existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations
- An actual or expected significant deterioration in the operating results of the debtor
- Significant increases in credit risk on other financial instruments of the same debtor
- An actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if:

- The financial instrument has a low risk of default
- The debtor has a strong capacity to meet its contractual cash flow obligations in the near term
- Adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations

## IFRS 7:35F(a)(i)

The Group considers a financial asset to have low credit risk when the asset has external credit rating of 'investment grade' in accordance with the globally understood definition or if an external rating is not available, the asset has an internal rating of 'performing'. Performing means that the counterparty has a strong financial position and there are no past due amounts.

For financial guarantee contracts, the date that the Group becomes a party to the irrevocable commitment is considered to be the date of initial recognition for the purposes of assessing the financial instrument for impairment. In assessing whether there has been a significant increase in the credit risk since initial recognition of a financial guarantee contract, the Group considers the changes in the risk that the specified debtor will default on the contract.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

## **International GAAP Holdings Limited**

#### IFRS 7:35F(b)

(ii) Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:

- When there is a breach of financial covenants by the debtor
- Information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collateral held by the Group)

Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

## IFRS 7:35F(d) IFRS 7:35G(a)(iii)

(iii) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- Significant financial difficulty of the issuer or the borrower
- A breach of contract, such as a default or past due event (see (ii) above)
- The lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider
- It is becoming probable that the borrower will enter bankruptcy or other financial reorganisation
- The disappearance of an active market for that financial asset because of financial difficulties

## IFRS 7:35F(e)

(iv) Write-off policy

The Group writes off a financial asset when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of trade receivables, when the amounts are over two years past due, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

## IFRS 7:35G(a)

(v) Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date; for financial guarantee contracts, the exposure includes the amount of guaranteed debt that has been drawn down as at the reporting date, together with any additional guaranteed amounts expected to be drawn down by the borrower in the future by default date determined based on historical trend, the Group's understanding of the specific future financing needs of the debtors, and other relevant forward-looking information.

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate. For a lease receivable, the cash flows used for determining the expected credit losses is consistent with the cash flows used in measuring the lease receivable in accordance with IFRS 16.

For a financial guarantee contract, as the Group is required to make payments only in the event of a default by the debtor in accordance with the terms of the instrument that is guaranteed, the expected loss allowance is the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the Group expects to receive from the holder, the debtor or any other party.

## **International GAAP Holdings Limited**

If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12-month ECL at the current reporting date, except for assets for which the simplified approach was used.

The Group recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognised in other comprehensive income and accumulated in the investment revaluation reserve, and does not reduce the carrying amount of the financial asset in the statement of financial position.

## Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in an equity instrument which the Group has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to retained earnings.

## Financial liabilities and equity

#### Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

## Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

## Compound instruments

The component parts of convertible loan notes issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar non-convertible instrument. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case the balance recognised in equity will be transferred to [share premium/other equity [describe]]. Where the conversion option remains unexercised at the maturity date of the convertible loan note, the balance recognised in equity will be transferred to [retained earnings/other equity [describe]]. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.

## **International GAAP Holdings Limited**

Transaction costs that relate to the issue of the convertible loan notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible loan notes using the effective interest method.

#### Financial liabilities

All financial liabilities are measured subsequently at amortised cost using the effective interest method or at FVTPL.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, and financial guarantee contracts issued by the Group, are measured in accordance with the specific accounting policies set out below.

#### Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is (i) contingent consideration of an acquirer in a business combination, (ii) held for trading or (iii) it is designated as at FVTPL.

A financial liability is classified as held for trading if either:

- It has been acquired principally for the purpose of repurchasing it in the near term
- On initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking
- It is a derivative, except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument

A financial liability other than a financial liability held for trading or contingent consideration of an acquirer in a business combination may be designated as at FVTPL upon initial recognition if either:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise
- The financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis
- It forms part of a contract containing one or more embedded derivatives, and IFRS 9 permits the entire combined contract to be designated as at FVTPL

#### IFRS 7:B5(e)

Financial liabilities at FVTPL are measured at fair value, with any gains or losses arising on changes in fair value recognised in profit or loss to the extent that they are not part of a designated hedging relationship (see Hedge accounting policy). The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'Other gains and losses' line item (note 10) in profit or loss.

However, for financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognised in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. The remaining amount of change in the fair value of liability is recognised in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognised in other comprehensive income are not subsequently reclassified to profit or loss; instead, they are transferred to retained earnings upon derecognition of the financial liability.

Gains or losses on financial guarantee contracts issued by the Group that are designated by the Group as at FVTPL are recognised in profit or loss.

Fair value is determined in the manner described in note 62(a)(i).

Financial liabilities measured subsequently at amortised cost

Financial liabilities that are not (i) contingent consideration of an acquirer in a business combination, (ii) held-fortrading, or (iii) designated as at FVTPL, are measured subsequently at amortised cost using the effective interest method.

## **International GAAP Holdings Limited**

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

#### Financial guarantee contract liabilities

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contract liabilities are measured initially at their fair values and, if not designated as at FVTPL and do not arise from a transfer of an asset, are measured subsequently at the higher of:

- The amount of the loss allowance determined in accordance with IFRS 9 (see financial assets above)
- The amount recognised initially less, where appropriate, cumulative amortisation recognised in accordance with the revenue recognition policies set out above

## Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments. These foreign exchange gains and losses are recognised in the 'Other gains and losses' line item in profit or loss (note 10) for financial liabilities that are not part of a designated hedging relationship. For those which are designated as a hedging instrument for a hedge of foreign currency risk foreign exchange gains and losses are recognised in other comprehensive income and accumulated in a separate component of equity.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss for financial liabilities that are not part of a designated hedging relationship.

## Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

When the Group exchanges with the existing lender one debt instrument into another one with substantially different terms, such exchange is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, the Group accounts for substantial modification of terms of an existing liability or part of it as an extinguishment of the original financial liability and the recognition of a new liability. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate is at least 10 per cent different from the discounted present value of the remaining cash flows of the original financial liability. If the modification is not substantial, the difference between: (1) the carrying amount of the liability before the modification; and (2) the present value of the cash flows after modification is recognised in profit or loss as the modification gain or loss within other gains and losses.

#### IFRS 7:21

#### **Derivative financial instruments**

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, options and interest rate swaps. Further details of derivative financial instruments are disclosed in notes 34 and 62(c).

Derivatives are recognised initially at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

## **International GAAP Holdings Limited**

A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. Derivatives are not offset in the financial statements unless the Group has both a legally enforceable right and intention to offset. The impact of the master netting agreements on the Group's financial position is disclosed in note 34. A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than 12 months and it is not due to be realised or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

#### Embedded derivatives

An embedded derivative is a component of a hybrid contract that also includes a non-derivative host – with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative.

Derivatives embedded in hybrid contracts with a financial asset host within the scope of IFRS 9 are not separated. The entire hybrid contract is classified and subsequently measured as either amortised cost or fair value as appropriate.

Derivatives embedded in hybrid contracts with hosts that are not financial assets within the scope of IFRS 9 (e.g. financial liabilities) are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

If the hybrid contract is a quoted financial liability, instead of separating the embedded derivative, the Group generally designates the whole hybrid contract at FVTPL.

An embedded derivative is presented as a non-current asset or non-current liability if the remaining maturity of the hybrid instrument to which the embedded derivative relates is more than 12 months and is not expected to be realised or settled within 12 months.

#### IFRS 7:21

## **Hedge accounting**

The Group designates certain derivatives as hedging instruments in respect of foreign currency risk and interest rate risk in fair value hedges, cash flow hedges, or hedges of net investments in foreign operations. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

At the inception of the hedge relationship, the Group documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk, which is when the hedging relationships meet all of the following hedge effectiveness requirements:

- There is an economic relationship between the hedged item and the hedging instrument
- The effect of credit risk does not dominate the value changes that result from that economic relationship
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Group actually hedges and the quantity of the hedging instrument that the Group actually uses to hedge that quantity of hedged item

If a hedging relationship ceases to meet the hedge effectiveness requirement relating to the hedge ratio but the risk management objective for that designated hedging relationship remains the same, the Group adjusts the hedge ratio of the hedging relationship (i.e. rebalances the hedge) so that it meets the qualifying criteria again.

The Group designates the full change in the fair value of a forward contract (i.e. including the forward elements) as the hedging instrument for all of its hedging relationships involving forward contracts.

The Group designates only the intrinsic value of option contracts as a hedged item, i.e. excluding the time value of the option. The changes in the fair value of the aligned time value of the option are recognised in other comprehensive income and accumulated in the cost of hedging reserve. If the hedged item is transaction-related, the time value is reclassified to profit or loss when the hedged item affects profit or loss. If the hedged item is time-period related, then the amount accumulated in the cost of hedging reserve is reclassified to profit or loss on a rational basis – the Group applies straight-line amortisation. Those reclassified amounts are recognised in profit

## **International GAAP Holdings Limited**

or loss in the same line as the hedged item. If the hedged item is a non-financial item, then the amount accumulated in the cost of hedging reserve is removed directly from equity and included in the initial carrying amount of the recognised non-financial item. Furthermore, if the Group expects that some or all of the loss accumulated in cost of hedging reserve will not be recovered in the future, that amount is immediately reclassified to profit or loss.

Note 62(a) sets out details of the fair values of the derivative instruments used for hedging purposes.

Movements in the hedging reserve in equity are detailed in note 46.

#### Fair value hedges

The fair value change on qualifying hedging instruments is recognised in profit or loss except when the hedging instrument hedges an equity instrument designated at FVTOCI in which case it is recognised in other comprehensive income.

The carrying amount of a hedged item not already measured at fair value is adjusted for the fair value change attributable to the hedged risk with a corresponding entry in profit or loss. For debt instruments measured at FVTOCI, the carrying amount is not adjusted as it is already at fair value, but the hedging gain or loss is recognised in profit or loss instead of other comprehensive income. When the hedged item is an equity instrument designated at FVTOCI, the hedging gain or loss remains in other comprehensive income to match that of the hedging instrument.

Where hedging gains or losses are recognised in profit or loss, they are recognised in the same line as the hedged item.

The Group discontinues hedge accounting only when the hedging relationship (or a part thereof) ceases to meet the qualifying criteria (after rebalancing, if applicable). This includes instances when the hedging instrument expires or is sold, terminated or exercised. The discontinuation is accounted for prospectively. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.

## #

## Cash flow hedges

The effective portion of changes in the fair value of derivatives and other qualifying hedging instruments that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve, limited to the cumulative change in fair value of the hedged item from inception of the hedge. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.

Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognised in other comprehensive income and accumulated in equity are removed from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability. This transfer does not affect other comprehensive income. Furthermore, if the Group expects that some or all of the loss accumulated in the cash flow hedging reserve will not be recovered in the future, that amount is immediately reclassified to profit or loss.

The Group discontinues hedge accounting only when the hedging relationship (or a part thereof) ceases to meet the qualifying criteria (after rebalancing, if applicable). This includes instances when the hedging instrument expires or is sold, terminated or exercised. The discontinuation is accounted for prospectively. Any gain or loss recognised in other comprehensive income and accumulated in cash flow hedge reserve at that time remains in equity and is reclassified to profit or loss when the forecast transaction occurs. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in the cash flow hedge reserve is reclassified immediately to profit or loss.

## Hedges of net investments in foreign operations

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the foreign currency forward contracts relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated in the foreign currency translation reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'Other gains and losses' line item.

## **International GAAP Holdings Limited**

Gains and losses on the hedging instrument accumulated in the foreign currency translation reserve are reclassified to profit or loss on the disposal or partial disposal of the foreign operation.

#### **Provisions**

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

## Restructurings

A restructuring provision is recognised when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

#### Warranties

Provisions for the expected cost of warranty obligations under local sale of goods legislation are recognised at the date of sale of the relevant products, at the directors' best estimate of the expenditure required to settle the Group's obligation.

## Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

## Restoration provisions

Provisions for the costs to restore leased plant assets to their original condition, as required by the terms and conditions of the lease, are recognised when the obligation is incurred, either at the commencement date or as a consequence of having used the underlying asset during a particular period of the lease, at the directors' best estimate of the expenditure that would be required to restore the assets. Estimates are regularly reviewed and adjusted as appropriate for new circumstances.

Contingent liabilities acquired in a business combination

Contingent liabilities acquired in a business combination are initially measured at fair value at the acquisition date. At the end of subsequent reporting periods, such contingent liabilities are measured at the higher of the amount that would be recognised in accordance with IAS 37 and the amount recognised initially less cumulative amount of income recognised in accordance with the principles of IFRS 15.

#### **Own shares**

Own shares represent the shares of the parent company International GAAP Holdings Limited that are held in treasury or by the employee benefit trust. Own shares are recorded at cost and deducted from equity.

## **Share-based payments**

Share-based payment transactions of the Company

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. The fair value excludes the effect of non-market-based vesting

## **International GAAP Holdings Limited**

conditions. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 57.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of the number of equity instruments that will eventually vest. At each reporting date, the Group revises its estimate of the number of equity instruments expected to vest as a result of the effect of non-market-based vesting conditions. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to reserves.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At each reporting date until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

Share-based payment transactions of the acquiree in a business combination

When the share-based payment awards held by the employees of an acquiree (acquiree awards) are replaced by the Group's share-based payment awards (replacement awards), both the acquiree awards and the replacement awards are measured in accordance with IFRS 2 ("market-based measure") at the acquisition date. The portion of the replacement awards that is included in measuring the consideration transferred in a business combination equals the market-based measure of the acquiree awards multiplied by the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the acquiree award. The excess of the market-based measure of the replacement awards over the market-based measure of the acquiree awards included in measuring the consideration transferred is recognised as remuneration cost for post-combination service.

However, when the acquiree awards expire as a consequence of a business combination and the Group replaces those awards when it does not have an obligation to do so, the replacement awards are measured at their market-based measure in accordance with IFRS 2. All of the market-based measure of the replacement awards is recognised as remuneration cost for post-combination service.

At the acquisition date, when the outstanding equity-settled share-based payment transactions held by the employees of an acquiree are not exchanged by the Group for its share-based payment transactions, the acquiree share-based payment transactions are measured at their market-based measure at the acquisition date. If the share-based payment transactions have vested by the acquisition date, they are included as part of the non-controlling interest in the acquiree. However, if the share-based payment transactions have not vested by the acquisition date, the market-based measure of the unvested share-based payment transactions is allocated to the non-controlling interest in the acquiree based on the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the share-based payment transaction. The balance is recognised as remuneration cost for post-combination service.

## Supplier financing arrangements and factoring of receivables

An entity may enter into arrangements under which a 'factor' (typically, a financial institution) pays a supplier on its behalf, with the entity (i.e. the purchaser) then reimbursing the factor. Such arrangements may be referred to as, for example, 'supplier financing', 'reverse factoring' or 'structured payable arrangements'. When such arrangements are material, clear disclosure should be provided of the following:

- The approach to the presentation of significant supplier financing arrangements and, in accordance with IAS 1:122, the judgements made in applying that policy
- How supplier financing transactions have been reflected in the statement of cash flows
- The carrying amount of the liabilities in question and the line item(s) in which they are presented
- When supplier financing arrangements have been used as a tool to manage liquidity risk, the disclosures required by IFRS 7:39(c)

IAS 1:122

IAS 7:21 IAS 1:54

IAS 7:39(c)

## **International GAAP Holdings Limited**

## Supplier financing arrangements and factoring of receivables

When an entity enters into arrangements for factoring of receivables where they are not fully derecognised, it is important that the policy adopted for the treatment of cash flows arising is clearly explained and that any non-cash financing transactions are disclosed in accordance with IAS 7:43. In particular, an explanation of whether the cash flows received on the receivables are treated as operating inflows with associated financing outflows that are deemed to repay the financing liability that was recognised when the receivables were transferred. Balances that will give rise to financing cash flows should also be included in the disclosure of changes in such balances required by IAS 7:44A-44E.

## 4. Critical accounting judgements and key sources of estimation uncertainty

## Commentary:

The following are examples of the types of disclosures that might be required in this area. The nature of these disclosures is very specific to an individual Group's particular circumstances. Although the model financial statements illustrate disclosures to comply with these requirements, it is unlikely that these specific model disclosures would be appropriate other than in very rare circumstances.

In applying the Group's accounting policies, which are described in note 3, the directors are required to make judgements (other than those involving estimations) that have a significant impact on the amounts recognised and to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

#### IAS 1:122

## Critical judgements in applying the Group's accounting policies

The following are the critical judgements, apart from those involving estimations (which are presented separately below), that the directors have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in financial statements.

## IFRS 15:123(a) IFRS 15:125

## Judgements in determining the timing of satisfaction of performance obligations

Note 7 describes the expenditure required in the year for rectification work carried out on goods supplied to one of the Group's major customers. These goods were delivered to the customer in the months of \_ to \_ 2021, and shortly thereafter the defects were identified by the customer. Following negotiations, a schedule of works was agreed, which will involve expenditure by the Group until 2022. In the light of the problems identified, management was required to consider whether it was appropriate to recognise the revenue from these transactions of CU\_ million in the current year, in line with the Group's general policy of recognising revenue when goods are delivered, or whether it was more appropriate to defer recognition until the rectification work was complete.

In making their judgement, the directors considered the detailed criteria for the recognition of revenue set out in IFRS 15 and, in particular, whether the Group had transferred control of the goods to the customer. Following the detailed quantification of the Group's liability in respect of rectification work, and the agreed limitation on the customer's ability to require further work or to require replacement of the goods, the directors are satisfied that control has been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate warranty provision for the rectification costs.

## Capitalisation of borrowing costs

As described in note 3, the Group capitalises borrowing costs directly attributable to the acquisition, construction or production of qualifying assets. Capitalisation of the borrowing costs relating to construction of the Group's premises in [A Land] was suspended in 2020, while the development was delayed as management reconsidered its detailed plans. Capitalisation of borrowing costs recommenced in 2021 – following the finalisation of revised plans, and the resumption of the activities necessary to prepare the asset for its intended use. Although construction of the premises was not restarted until May 2021, borrowing costs have been capitalised from February 2021, at which time the technical and administrative work associated with the project recommenced.

## **International GAAP Holdings Limited**

#### **Business model assessment**

Classification and measurement of financial assets depends on the results of the SPPI and the business model test (please see financial assets sections of note 3). The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Group monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. No such changes were required during the periods presented.

## Significant increase in credit risk

As explained in note 3, ECL are measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased, the Group takes into account qualitative and quantitative reasonable and supportable forward-looking information.

## Deferred taxation on investment properties

For the purposes of measuring deferred tax liabilities or deferred tax assets arising from investment properties that are measured using the fair value model, the directors have reviewed the Group's investment property portfolios and concluded that the Group's investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, in determining the Group's deferred taxation on investment properties, the directors have determined that the presumption that the carrying amounts of investment properties measured using the fair value model are recovered entirely through sale is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.

## IFRS 12:7(a)

## Control over Subsidiary B Limited

IFRS 12:9(b)

Note 20 describes that Subsidiary B Limited is a subsidiary of the Group even though the Group has only a 45 per cent ownership interest and has only 45 per cent of the voting rights in Subsidiary B Limited. Subsidiary B Limited is listed on the stock exchange of [A Land]. The Group has held its 45 per cent ownership since June 2016 and the remaining 55 per cent of the ownership interests are held by thousands of shareholders that are unrelated to the Group.

The directors of the Company assessed whether or not the Group has control over Subsidiary B Limited based on whether the Group has the practical ability to direct the relevant activities of Subsidiary B Limited unilaterally. In making their judgement, the directors considered the Group's absolute size of holding in Subsidiary B Limited and the relative size of and dispersion of the shareholdings owned by the other shareholders. After assessment, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of Subsidiary B Limited and therefore the Group has control over Subsidiary B Limited.

If the directors had concluded that the 45 per cent ownership interest was insufficient to give the Group control, Subsidiary B Limited would instead have been classified as an associate and the Group would have accounted for it using the equity method of accounting.

## IFRS 12:7(b)

## Significant influence over Associate B Limited

## IFRS 12:9(e)

Note 21 describes that Associate B Limited is an associate of the Group although the Group only owns a 17 per cent ownership interest in Associate B Limited. The Group has significant influence over Associate B Limited by virtue of its contractual right to appoint two out of seven directors to the board of directors of that entity.

## **International GAAP Holdings Limited**

## Judgement in identifying whether a contract includes a lease - Contract for the supply of sports shoes

The Group has entered into a contract with [Manufacturer A] for the supply of sports shoes for a three-year period. Each month the type of sports shoes and the production volume, up to a limit of [X] pairs, are determined by the Group and are not specified in the contract.

[Manufacturer A] has only one factory that can meet the needs of the Group and is unable to supply the sports shoes from another factory or source the sports shoes from a third party supplier. [Manufacturer A] makes all decisions about the operations of the factory, including the production level at which to run the factory and which customer contracts to fulfil with the output of the factory that is not used to fulfil the Group's contract for that month.

The directors of the Company assessed whether or not the Group has contracted for the rights to substantially all of the capacity of the factory and whether the contract with [Manufacturer A] contains a lease for the factory. After making inquiries based on forecast production volumes over the contract term the directors have established that [Manufacturer A] can regularly use the factory for other purposes during the course of the contract to supply other customers and therefore the Group does not have the right to obtain substantially all of the economic benefits from the use of the factory. As a result the directors concluded that the Group has not contracted for substantially all of the capacity of the factory, including the plant therein, and therefore the contract does not contain a lease.

#### IAS 1:125

## IAS 1:128 IAS 1:129 IAS 1:131

## Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting period that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

## **Taxation provisions**

The Group's current tax provision of CU\_ relates to management's assessment of the amount of tax payable on open tax positions where the liabilities remain to be agreed with [insert name of relevant Tax Authority]. Uncertain tax items for which a provision of CU\_ is made, relate principally to the interpretation of tax legislation regarding arrangements entered into by the Group. Due to the uncertainty associated with such tax items, there is a possibility that, on conclusion of open tax matters at a future date, the final outcome may differ significantly. Whilst a range of outcomes is reasonably possible, the extent of the reasonably possible range is from additional liabilities of up to CU\_ to a reduction in liabilities of up to CU\_.

## Impairment testing

Following the assessment of the recoverable amount of goodwill allocated to 'Leisure goods – retail outlets', to which goodwill of CU\_\_ is allocated, the directors consider the recoverable amount of goodwill allocated to 'Leisure goods – retail outlets' to be most sensitive to the achievement of the 2022 budget. Budgets comprise forecasts of revenue, staff costs and overheads based on current and anticipated market conditions that have been considered and approved by the Board. Whilst the Group is able to manage most of 'Leisure goods – retail outlets' costs, the revenue projections are inherently uncertain due to the short-term nature of the business and unstable market conditions. Revenue of the CGU is most sensitive to changes in the sectors demand for sales in retail outlets, reflecting the increased use of internet sales by rivals, a service which the Group does not currently offer.

The market for 'Leisure goods – retail outlets' products has seen a significant slowdown over the past 18 months due to a decline in the customer appetite for retail sales and increases in internet sales of rivals in the sector. It is possible that further underperformance may occur in 2022 if prevailing trends continue.

The sensitivity analysis in respect of the recoverable amount of 'Leisure goods – retail outlets' goodwill is presented in note 16.

## Calculation of loss allowance

When measuring ECL the Group uses reasonable and supportable forward-looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

## **International GAAP Holdings Limited**

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

If the ECL rates on trade receivables between 61 and 90 days past due had been \_\_ per cent higher (lower) as of December 2021, the loss allowance on trade receivables would have been CU\_ million (2020: CU\_ million) higher (lower).

If the ECL rates on trade receivables between 31 and 60 days past due had been \_\_ per cent higher (lower) as of December 2021, the loss allowance on trade receivables would have been CU\_ million (2020: CU\_ million) higher (lower).

## Discount rate used to determine the carrying amount of the Group's defined benefit obligation

The determination of the Group's defined benefit obligation depends on certain assumptions, which include selection of the discount rate. The discount rate is set by reference to market yields at the end of the reporting period on high quality corporate bonds. Significant assumptions are required to be made when setting the criteria for bonds to be included in the population from which the yield curve is derived. The most significant criteria considered for the selection of bonds include the issue size of the corporate bonds, quality of the bonds and the identification of outliers which are excluded. These assumptions are considered to be a key source of estimation uncertainty as relatively small changes in the assumptions used may have a significant effect on the Group's financial statements within the next year. Further information on the carrying amounts of the Group's defined benefit obligation and the sensitivity of those amounts to changes in discount rate are provided in note 58.

## #

#### Fair value measurements and valuation processes

Some of the Group's assets and liabilities are measured at fair value for financial reporting purposes. The board of directors of the Company has set up a valuation committee, which is headed up by the Chief Financial Officer of the Company, to determine the appropriate valuation techniques and inputs for fair value measurements.

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified valuers to perform the valuation. The valuation committee works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. The Chief Financial Officer reports the valuation committee's findings to the board of directors of the Company every quarter to explain the cause of fluctuations in the fair value of the assets and liabilities.

The valuations of private equity investments, contingent consideration in business combinations and non-derivative financial assets held for trading are particularly sensitive to changes in one or more unobservable inputs which are considered reasonably possible within the next financial year. Further information on the carrying amounts of these assets and the sensitivity of those amounts to changes in unobservable inputs are provided in note 62(a)(i).

## Provision for restoration of contaminated land

On 15 December 2021, new legislation in [A Land] was enacted which resulted in the requirement for the Company to clean up historically contaminated waste sites in [A Land] and bear the costs thereof. Consequently, a provision of CU\_ million has been recognised. In estimating the provision, the directors have made assumptions regarding the interpretation of the legislation and have estimated costs based on currently available information about the likely extent of contamination and potential clean-up techniques. Due to the associated uncertainty, it is possible that estimates may need to be revised during the next year as interpretations of the legislation evolve and the extent of contamination and potential approaches to clean-up are assessed in more detail. Whilst a range of outcomes is possible, the directors believe that the reasonably possible range is an increase in provisions of up to CU\_ million to a reduction in provisions of up to CU\_ million. See note 39 for further details.

## **International GAAP Holdings Limited**

## Assessment as to whether the right-of-use assets are impaired

In January 2015 [Subsidiary D Limited], a subsidiary of the Group, entered into a 10-year lease for an office building located in [location]. Following the acquisition of [Acquisition A Limited] on [date] 2021 and the subsequent restructuring programme, the Group identified that the office space occupied by [Subsidiary E Limited], which is also located in [location], could accommodate all of the staff of [Subsidiary D Limited], and took the decision to relocate staff to a single office. The leased property previously occupied by [Subsidiary D Limited], has been marketed with a local estate agent and is expected to be sub-leased by the firm for the remainder of the lease term.

The directors have estimated that the entirety of the lease payment will be recoverable through the sub-lease of the property. This reflects the current achievable market rates for similar properties with similar lease terms and therefore no impairment has been recognised. The carrying amount of right-of-use asset in respect of the property is CU\_ at 31 December 2021 (2020: CU\_).

In estimating the recoverable amount of the right-of-use asset, the directors have made assumptions about the achievable market rates for similar properties with similar lease terms. Due to the associated uncertainty, it is possible that the estimates of the amount of lease payment that will be recovered through the sub-lease of the property may need to be revised during the next year. Achieving a sub-lease for only 95 per cent of the lease payment is considered reasonably possible based on recent experience in the market and would lead to an impairment charge of CU\_\_ against the right-of-use asset in respect of the property.

## 5. Revenue

The Group derives its revenue from contracts with customers for the transfer of goods and services over time and at a point in time in the following major product lines. The disclosure of revenue by product line is consistent with the revenue information that is disclosed for each reportable segment under IFRS 8 (see note 6).

## **International GAAP Holdings Limited**

#### Commentary:

There is no requirement in IFRS 15 for contract balances (i.e. contract assets, receivables and contract liabilities) to be disclosed together at a single place in the financial statements. Indeed, entities will likely continue to include balances arising from contracts with customers within the same financial statement line item and related note as previously under IAS 18 (e.g. contract liabilities within a deferred revenue note). IFRS 15 allows entities to use terms other than contract asset and contract liability to describe such balances.

Contract balances and the related disclosures have been included in the following places in the notes to the Group's accounts:

Receivables Balance described as 'Trade receivables' (Note 31)

Contract assets Note 27
Contract costs Note 28
Contract liabilities Note 60

Materiality considerations will affect the line items to be disclosed separately within each relevant IFRS 15 contract balance. A single net contract asset or liability should be presented for each contract balance.

## 6. Operating segments

## **Commentary:**

## When are entities required to present segment information?

The following segment information is required by IFRS 8 to be presented in the consolidated financial statements of a group with a parent (and in the separate or individual financial statements of an entity):

- Whose debt or equity instruments are traded in a public market (a domestic or foreign stock exchange or an over the counter market, including local and regional markets)
- That files, or is in the process of filing, its (consolidated) financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market

## What needs to be disclosed when entities aggregate operating segments into a single operating segment?

IFRS 8:22 requires entities to give a brief description of the operating segments that have been aggregated and the economic indicators that have been assessed in determining the aggregated operating segments share similar economic characteristics.

According to IFRS 8:12, two or more operating segments may be aggregated into a single operating segment if the segments have similar economic characteristics and the segments are similar in each of the following respects:

- The nature of the products and services
- The nature of the production processes
- The type or class of customer for their products and services
- The methods used to distribute their products or provide their services
- If applicable, the nature of the regulatory environment, for example, banking, insurance or public utilities

#### IFRS 8:22

## Products and services from which reportable segments derive their revenues

Information reported to the Group's Chief Executive (the Chief Operating Decision Maker (CODM)) for the purposes of resource allocation and assessment of segment performance is focused on the category of customer for each type of activity. The principal categories of customer are direct sales to major customers, wholesalers and internet sales. The Group's reportable segments under IFRS 8 are therefore as follows:

Source	International GAAP Holdings Limited	d	
	[Segment A]	-	Electronic equipment – direct sale customers
	[Segment B]	_	Electronic equipment – wholesale customers
	[Segment C]	_	Electronic equipment – internet customers
	[Segment D]	-	Leisure goods – wholesale customers
	[Segment E]	-	Leisure goods – retail outlets
	[Segment F]	-	Computer software – installation of computer software for specialised business applications
	[Segment G]	-	Construction – construction of residential properties
	The leisure goods segments supply spor	ts shoes and equ	uipment, as well as outdoor play equipment.

IFRS 8:27	The accounting policies of the reportable segments are the same as the Group's accounting policies described in note 3. Segment profit represents the profit earned by each segment without allocation of the share of profits of associates and joint ventures, central administration costs including directors' salaries, finance income, non-operating gains and losses in respect of financial instruments and finance costs, and income tax expense. This is the measure reported to the Group's Chief Executive for the purpose of resource allocation and assessment of segment performance.
IFRS 8:23(f)	The exceptional rectification work costs of CU disclosed in note 7 relate to the [identify segment].

IFRS 8:28(c)	Consolidated total assets
IFRS 8:27(c)	For the purposes of monitoring segment performance and allocating resources between segments the Group's Chief Executive monitors the tangible, intangible and financial assets attributable to each segment. All assets are allocated to reportable segments with the exception of investments in associates and joint ventures, other financial assets (except for trade and other receivables) (see note 31) and tax assets. Goodwill has been allocated to reportable segments as described in note 16. Assets used jointly by reportable segments are allocated on the basis of the revenues earned by individual reportable segments.

IAS 12:81(c)	The charge for the year can be reconciled to the profit before tax as follows	5:	
		31/12/2021	31/12/2020
		CU	CU
	Profit before tax on continuing operations		
	Tax at the [ <i>A Land</i> ] corporation tax rate of per cent (2020:per cent)		
	Tax effect of share of results of associates		
	Tax effect of expenses that are not deductible in determining taxable profit		
	Tax effect of income not taxable in determining taxable profit		
	Tax effect of utilisation of tax losses not previously recognised		
	Change in unrecognised deferred tax assets		
	Effect of different tax rates of subsidiaries operating in other jurisdictions		
	Tax expense for the year		
	<del>-</del>		

## Commentary:

The reconciliation should enable users of financial statements to understand whether the relationship between tax expense (income) and accounting profit is unusual and to understand the significant factors that could affect that relationship in the future. Distinguishing between recurring and non-recurring items may assist with this. It is also informative to state the effective tax rate. The relationship between tax expense (income) and accounting profit may be affected by such factors as revenue that is exempt from taxation, expenses that are not deductible in determining taxable profit (tax loss), the effect of tax losses and the effect of foreign tax rates and it is useful to explain these items.

IFRS 3:B67(d)	Carrying amount
	At 31 December 2021
	At 31 December 2020
	At 1 January 2020
IAS 36:134-135	The carrying amount of goodwill has been allocated to CGUs as follows:
	31/12/2021 31/12/2020
	CU CU
	[Segment C]: Electronic equipment – internet sales
	[Segment E]: Leisure goods – retail outlets
	[Segment G]: Construction operations – Alpha
	Construction
	[Segment G]: Construction operations – other
	The Group tests goodwill annually for impairment, or more frequently if there are indications that goodwill might be impaired.
	Electronic equipment – internet sales
	The recoverable amount of the 'electronic equipment – internet sales' segment as a cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period and a pre-tax discount rate of per cent per annum (2020: per cent per annum) calculated by [describe method used to determine the discount rate].
	The key assumptions used by management in setting the financial budgets for the initial five-year period were as follows:
	Forecast sales growth rates
	Forecast sales growth rates are based on past experience adjusted for [discuss reasons for adjusting the historic measures, for example, sales/market trends and the strategic decisions made in respect of the cash-generating unit].
	Operating profits
	Operating profits are forecast based on historical experience of operating margins, adjusted for the impact of [describe reasons for adjusting the historical measures, for example, changes to product costs and cost saving initiatives].
	Cash conversion
	Cash conversion is the ratio of operating cash flow to operating profit. Management forecasts cash conversion rates based on historical experience.
	Cash flows beyond that five-year period have been extrapolated using a steady per cent (2020: per cent) per annum growth rate. This growth rate exceeds by percentage points the long-term average growth rate for the international electronic equipment market. However, among other factors, the internet sales cash-generating unit

international electronic equipment market. However, among other factors, the internet sales cash-generating unit benefits from the protection of a 20-year patent on the Series Z electronic equipment, granted in 2015, which is still

acknowledged as one of the top models in the market.

#### Source

## **International GAAP Holdings Limited**

The steady growth rate of \_\_ per cent is estimated by the directors of the Company based on past performance of the cash-generating unit and their expectations of market development. The directors estimate that a decrease in growth rate by \_\_ per cent to \_\_ per cent would reduce the headroom in the cash-generating unit to nil but would not result in an impairment charge.

#### Leisure goods - retail outlets

The recoverable amount of this cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a pre-tax discount rate of \_\_ per cent per annum (2020: \_\_ per cent per annum) calculated by [describe method used to determine the discount rate].

The key assumptions used by management in setting the financial budgets for the initial five-year period were as follows:

## Forecast sales growth rates

Forecast sales growth rates are based on past experience adjusted for [discuss reasons for adjusting the historic measures, for example, sales/market trends and the strategic decisions made in respect of the cash-generating unit].

## Operating profits

Operating profits are forecast based on historical experience of operating margins, adjusted for the impact of [describe reasons for adjusting the historical measures, for example, changes to product costs and cost saving initiatives].

#### Cash conversion

Cash conversion is the ratio of operating cash flow to operating profit. Management forecasts cash conversion rates based on historical experience.

Cash flow projections during the budget period are based on the same expected gross margins and inventory price inflation throughout the budget period. The cash flows beyond that five-year period have been extrapolated using a steady \_\_ per cent (2020: \_\_ per cent) per annum growth rate which is the projected long-term average growth rate for the international leisure goods market.

## Construction operations - Alpha Construction

The goodwill associated with Alpha Construction arose when that business was acquired by the Group in 2013. The business has continued to operate on a satisfactory basis, but without achieving any significant increase in market share.

During the year, the government of [A Land] introduced new regulations requiring registration and certification of builders for government contracts. In the light of the decision to focus the Group's construction activities through the other operating units in Subsidiary C Limited, the directors have decided not to register Alpha Construction for this purpose, which means that it has no prospects of obtaining future contracts. The directors have consequently determined to write off the goodwill directly related to Alpha Construction amounting to CU\_\_. No other writedown of the assets of Alpha Construction is considered necessary. Contracts in progress at the end of the year will be completed without loss to the Group. The recoverable amount of the Alpha Construction cash-generating unit amounted to CU\_\_ as at 31 December 2021.

The impairment loss has been included in profit or loss in the [other expenses/cost of sales] line item.

#### Construction operations - other

The recoverable amount of the Group's remaining construction operations has been determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a pre-tax discount rate of \_\_ per cent per annum (2020: \_\_ per cent per annum) calculated by [describe method used to determine the discount rate].

#### Source

## **International GAAP Holdings Limited**

The key assumptions used by management in setting the financial budgets for the initial five-year period were as follows:

## Forecast sales growth rates

Forecast sales growth rates are based on past experience adjusted for [discuss reasons for adjusting the historic measures, for example, sales/market trends and the strategic decisions made in respect of the cash-generating unit].

## Operating profits

Operating profits are forecast based on historical experience of operating margins, adjusted for the impact of [describe reasons for adjusting the historical measures, for example, changes to product costs and cost saving initiatives].

#### Cash conversion

Cash conversion is the ratio of operating cash flows to operating profit. Management forecasts cash conversion rates based on historical experience.

Cash flows beyond that five-year period have been extrapolated using a steady \_\_ per cent (2020: \_\_ per cent) per annum growth rate. This growth rate does not exceed the long-term average growth rate for the construction market in [A Land].

## Sensitivity analysis

The Group has conducted an analysis of the sensitivity of the impairment test to changes in the key assumptions used to determine the recoverable amount for each of the group of CGUs to which goodwill is allocated. The directors believe that any reasonably possible change in the key assumptions on which the recoverable amount of 'Electronic equipment – internet sales' and 'Construction operations – other' is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of the related CGUs.

At the beginning of the financial year the recoverable amount of 'Leisure goods – retail outlets' was substantially in excess of its carrying amount. Due to current market conditions at the year-end, as discussed in note 4, the recoverable amount exceeds the carrying amount by CU .

A \_\_ per cent underperformance against forecast sales growth rates for 'Leisure goods – retail outlets' is considered reasonably possible based on recent experience and would lead to an impairment charge of CU\_\_.

A \_\_ per cent underperformance against forecast sales growth rates would reduce the headroom in 'Leisure goods – retail outlets' to nil but would not result in an impairment charge.

## Commentary:

The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purpose only. It is worth noting the following points:

- The classification into the 3-level hierarchy is not an accounting policy choice. For land and buildings, given their unique nature, it is extremely rare that the fair value measurement would be identified as a Level 1 measurement. Whether the fair value measurement in its entirety should be classified into Level 2 or Level 3 would depend on the extent to which the inputs and assumptions used in arriving at the fair value are observable. In many situations where valuation techniques (with significant unobservable inputs) are used in estimating the fair value of the real estate properties, the fair value measurement as a whole would be classified as Level 3.
- The level within which the fair value measurement is categorised bears no relation to the quality of the valuation. For example, the fact that a real estate property is classified as a Level 3 fair value measurement does not mean that the property valuation is not reliable it merely indicates that significant unobservable inputs have been used and significant judgement was required in arriving at the fair value.

## Commentary:

Where there had been a transfer between different levels of the fair value hierarchy, the Group should disclose the reasons for the transfer and the Group's policy for determining when transfers between levels are deemed to have occurred (for example, at the beginning or end of the reporting period or at the date of the event that caused the transfer).

IFRS 13:95

	International GAAP Holdings Limited				
IAS 16:77(e)	Had the Group's freehold land and buildings (other than land and buildings classified as held for sale or included in a disposal group) been measured on a historical cost basis, their carrying amount would have been as follows:				
	As at 31/12/2021 As at 31/12/2020				
	CU CL				
	Freehold land				
	Buildings				
	The revaluation surplus is disclosed in note 43. The revaluation surplus arises in a subsidiary and cannot be distributed to the parent due to legal restrictions in the country of incorporation.				
	At 31 December 2021, the Group had entered into contractual commitments for the acquisition of property, plant and equipment amounting to CU_ million (2020: CU_ million).				
	Impairment losses recognised during the year				
	During the year, as the result of the unexpected poor performance of a manufacturing plant, the Group carried out a review of the recoverable amount of that manufacturing plant and the related equipment. The poor performance of the plant can be attributed to [insert description of reasons for poor performance, for example, this could include whether the impairment loss was prompted by external data or changes in the Company's own estimates].				
	These assets are used in the Group's [name segment] reportable segment. The review led to the recognition of an impairment loss of CU, which has been recognised in profit or loss. The Group also estimated the fair value less costs of disposal of the manufacturing plant and the related equipment, which is based on the recent market prices of assets with similar age and obsolescence. The fair value less costs of disposal is less than the value in use and hence the recoverable amount of the relevant assets has been determined on the basis of their value in use. The manufacturing plant and the related equipment were impaired to their recoverable amount based on value in use of CU, which is their carrying value at year end.				
IAS 36:130(a)-(g)	The discount rate used in measuring value in use was per cent per annum. No impairment assessment was performed in 2020 as there was no indication of impairment.				
IAS 36:131	Additional impairment losses recognised in respect of plant and machinery in the year amounted to CU million. These losses are attributable to greater than anticipated wear and tear. Those assets have been impaired in full and they belong to the Group's [name segment] reportable segment.				
IAS 36:126(a)	The impairment losses have been included in the profit and loss in the [other expenses/cost of sales] line item.				
	The impairment loss on fixtures and equipment arose in connection with the restructuring following the disposal of [specify/provide cross-reference].				
IAS 16:74(a)	Assets pledged as security				
	Freehold land and buildings with a carrying amount of CU_ million (2020: CU_ million) have been pledged to secure borrowings of the Group (see note 32). The Group is not allowed to pledge these assets as security for other

#### Commentary:

IFRS 13:93(c)

Where there had been a transfer between the different levels of the fair value hierarchy, the Group should disclose the reasons for the transfer and the Group's policy for determining when transfers between levels are deemed to have occurred (for example, at the beginning or end of the reporting period or at the date of the event that caused the transfer).

The Group shall transfer a property to, or from, investment property when, and only when, there is evidence of a change in use. A change in use occurs if property meets, or ceases to meet, the definition of investment property. A change in management's intentions for the use of a property by itself does not constitute evidence of a change in use.

## **Commentary:**

## Fair value hierarchy

The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purposes only. It is worth noting the following points:

- The classification into the 3-level hierarchy is not an accounting policy choice. For land and buildings, given their unique nature, it is extremely rare that the fair value measurement would be identified as a Level 1 measurement. Whether the fair value measurement in its entirety should be classified into Level 2 or Level 3 would depend on the extent to which the inputs and assumptions used in arriving at the fair value are observable. In many situations where valuation techniques (with significant unobservable inputs) are used in estimating the fair value of the real estate properties, the fair value measurement as a whole would be classified as Level 3
- The level within which the fair value measurement is categorised bears no relation to the quality of the valuation. For example, the fact that a real estate property is classified as a Level 3 fair value measurement does not mean that the property valuation is not reliable it merely indicates that significant unobservable inputs have been used and significant judgement was required in arriving at the fair value

## Fair value disclosures for investment properties measured using the cost model

For investment properties that are measured using the cost model, IAS 40:79(e) requires the fair value of the properties to be disclosed in the notes to the financial statements. In that case, the fair value of the properties (for disclosure purpose) should be measured in accordance with IFRS 13. In addition, IFRS 13:97 requires the following disclosures:

- The level in which fair value measurement is categorised (i.e. Level 1, 2 or 3)
- When the fair value measurement is categorised within level 2 or level 3, a description of the valuation technique(s) and the inputs used in the fair value measurement
- The highest and best use of the properties (if different from their current use) and the reasons why the properties are being used in a manner that is different from their highest and best use

Source	International GAAP Holdings Limited

IFRS 13:93(d)		technique(s)		-	
IFRS 13:93(h)(i)	Commercial property units located in Land X – CC City	Income Capitalisation Approach	Capitalisation rate, taking into account the capitalisation of rental income potential, nature of the property, and prevailing market condition, of per cent per cent (2020: per cent per cent).	A slight increase in the capitalisation rate used would result in a significant decrease in fair value, and vice versa.	
			Monthly market rent, taking into account the differences in location, and individual factors, such as frontage and size, between the comparables and the property, at an average of CU(2020: CU) per square metre ("sqm") per month.	A significant increase in the market rent used would result in a significant increase in fair value, and vice versa.	

## Commentary:

In considering the level of disaggregation of the properties for the above disclosure, management of the entity should take into account the nature and characteristics of the properties in order to provide meaningful information to the users of the financial statements regarding the fair value measurement information of the different types of properties. The breakdown above is for illustrative purposes only.

As illustrated above, for fair value measurements categorised within Level 3 of the fair value hierarchy, an entity provides quantitative information about the significant unobservable inputs used in the fair value measurement. An entity is not required to create quantitative information to comply with this disclosure requirement if quantitative unobservable inputs are not developed by the entity when measuring fair value (e.g. when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, when providing this disclosure an entity cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to the entity.

The Group has pledged all of its investment property to secure general banking facilities granted to the Group.

The property rental income earned by the Group from its investment property, all of which is leased out under operating leases, amounted to CU\_ million (2020: CU\_ million). Direct operating expenses arising on the investment property, all of which generated rental income in the year, amounted to CU\_ million (2020: CU\_ million).

The Group has entered into a contract for the maintenance of its investment property for the next five years, which will give rise to an annual charge of CU\_ million.

All of the above associates are accounted for using the equity method in these consolidated financial statements as set out in the Group's accounting policies in note 3.

IFRS 12:21(a)(iv)

- (i) Pursuant to a shareholder agreement, the Company has the right to cast \_\_ per cent of the votes at shareholder meetings of Associate A Limited.
- (ii) The financial year end date of Associate A Limited is 31 October. This was the reporting date established when that entity was incorporated, and a change of reporting date is not permitted in [A Land]. For the purposes of applying the equity method of accounting, the financial statements of Associate A Limited for the year ended 31 October 2021 have been used, and appropriate adjustments have been made for the effects of significant transactions between that date and 31 December 2021. As at 31 December 2021, the fair value of the Group's interest in Associate A Limited, which is listed on the stock exchange of [A Land], was CU\_ million (2020: CU\_ million) based on the quoted market price available on the stock exchange of [A Land], which is a Level 1 input in terms of IFRS 13.

IFRS 12:22(b)
IFRS 12:21(b)(III)
IFRS 13:97

(iii) Although the Group holds less than \_\_ per cent of the equity shares of Associate B Limited, and it has less than \_\_ per cent of the voting power at shareholder meetings, the Group exercises significant influence by virtue of its contractual right to appoint two out of seven directors to the board of directors of that entity.

IFRS 12:9(e)

Dividends received from associates below represent the actual amounts attributable and hence received by the Group. The other summary information that precedes the reconciliation to the Group's carrying amount represents amounts included in the IFRS financial statements of the associate, not the entity's share of these amounts, although they are adjusted to reflect fair value adjustments upon acquisition or accounting policy alignments.

IFRS 12:21(b)(ii) IFRS 12:B12 IFRS 12:B14(a) Summarised financial information in respect of each of the Group's material associates is set out below. The summarised financial information below represents amounts in associates' financial statements prepared in accordance with IFRS Standards [adjusted by the Group for equity accounting purposes].

# IAS 28:22 Change in the Group's ownership interest in an associate

In the prior year, the Group held a \_\_ per cent interest in E Plus Limited and accounted for the investment as an associate. In December 2021, the Group disposed of a \_\_ per cent interest in E Plus Limited to a third party for proceeds of CU\_\_ million (received in January 2022). The Group has accounted for the remaining \_\_ per cent interest as a financial asset at FVTOCI whose fair value at the date of disposal was CU\_\_, which was determined using a discounted cash flow model [describe key factors and assumptions used in determining the fair value]. This transaction has resulted in the recognition of a gain in profit or loss, calculated as follows:

CU

Proceeds of disposal

Plus: fair value of investment retained (\_\_ per cent)

Less: carrying amount of investment on the date of loss of significant influence

#### **Gain recognised**

The gain recognised in the current year comprises a realised profit of CU\_\_ (being the proceeds of CU\_\_ less CU\_\_ carrying amount of the interest disposed of) and an unrealised profit of CU\_\_ (being the fair value less the carrying amount of the \_\_ per cent interest retained). A current tax expense of CU\_\_ arose on the gain realised in the current year, and a deferred tax expense of CU\_\_ has been recognised in respect of the portion of the profit recognised that is not taxable until the remaining interest is disposed of.

#### IFRS 12:22(a) Significant restriction

#### Commentary:

When there are significant restrictions on the ability of associates to transfer funds to the Group in form of cash dividends, or to repay loans or advances made by the Group, the Group should disclose the nature and extent of significant restrictions in the financial statements.

#### **International GAAP Holdings Limited**

#### 22. Joint ventures

#### **Commentary:**

In these model financial statements, the Group only has one joint venture, JV A Limited, and for illustrative purposes, JV A Limited is assumed to be material to the Group.

#### IFRS 12:21(a)

# Details of material joint ventures

Details of each of the Group's material joint ventures at the end of the reporting period are as follows:

Name of joint venture	Principal activity	Place of incorporation and principal place of business	Proportion of ownership interest of voting rights held by the Group	
			31/12/2021	31/12/2020
JV A Limited	[insert Activity X]	[A Land]		

IFRS 12:21(b)(i)

All of the above joint ventures are accounted for using the equity method in these consolidated financial statements as set out in the Group's accounting policies in note 3.

IFRS 12:21(b)(ii) IFRS 12:B12 IFRS 12:B14(a)

Summarised financial information in respect of each of the Group's material joint ventures is set out below. The summarised financial information below represents amounts in joint ventures financial statements prepared in accordance with IFRS Standards [adjusted by the Group for equity accounting purposes].

# **International GAAP Holdings Limited**

- (i) The investments in listed corporate bond issued by [name of entity] are paying \_\_ per cent of interest per annum and the bonds will mature on [insert date]. At maturity the Group will receive nominal amount of CU\_\_\_. The corporate bonds are held by the Group within a business model whose objective is both to collect their contractual cash flows which are solely payments of principal and interest on the principal amount outstanding and to sell these financial assets. Hence the corporate bonds are classified as at FVTOCI. See below for impairment assessment.
- (ii) The Group holds \_\_ per cent of the ordinary share capital of Rocket Corp Limited, an entity involved in the refining and distribution of fuel products. The directors of the Company do not consider that the Group is able to exercise significant influence over Rocket Corp Limited as the other \_\_ per cent of the ordinary share capital is held by one shareholder, who also manages the day-to-day operations of that entity. The fair value of the investment was CU\_\_ (2020: CU\_\_).

At 31 December 2021, the Group also continues to hold a \_\_ per cent interest in E Plus Limited, a former associate. The fair value of the investment was CU\_\_(2020: CU\_\_)

The valuation methodology for these investments is disclosed in note 62(a)(i).

The dividends received in respect of these investments are disclosed in note 9.

IFRS 7:11A(a)-(c) IFRS 7:42J(a) These investments in equity instruments are not held for trading. Instead, they are held for medium to long-term strategic purposes. Accordingly, the directors of the Company have elected to designate these investments in equity instruments as at FVTOCI as they believe that recognising short-term fluctuations in these investments' fair value in profit or loss would not be consistent with the Group's strategy of holding these investments for long-term purposes and realising their performance potential in the long run.

IFRS 7:11B

Apart from the disposal of \_\_ per cent of E Plus Limited as disclosed in note 21 which resulted in the Group's loss of significant influence there over, no other shares have been disposed of during the current reporting period.

- (iii) The Group has also invested in a portfolio of listed shares which are held for trading.
- (iv) The bills of exchange have maturity dates ranging between \_\_ to \_\_ months from the reporting date and return a variable rate of interest. The weighted average interest rate on these securities is \_\_ per cent per annum (2020: \_\_ per cent per annum). The counterparties have a minimum A credit rating. See below for impairment assessment.

The debentures return interest of \_\_ per cent per annum payable monthly, and mature on [date]. The counterparties have a minimum BBB- credit rating. See below for impairment assessment.

The Group holds listed redeemable notes returning \_\_ per cent per annum. The notes are redeemable at par value on [date]. The notes are held with a single counterparty with an AA credit rating. The Group holds no collateral over these notes. See below for impairment assessment.

The Group has provided its associates with short-term loans at rates comparable to the average commercial rate of interest. Further information about these loans is contained in note 64. See below for impairment assessment.

The Group has provided a joint venture, JV A Limited, with a long-term loan which forms part of the net investment in the joint venture. The loan is repayable in 2070 and interest of \_\_ per cent is receivable annually. The Group does not apply the equity method of accounting to this instrument because it does not entitle the Group to the share of net assets of the joint venture. As the loan settlement is neither planned nor likely to occur in the foreseeable future, for the purpose of accounting for losses of JV A Limited, the loan would form part of the Group's net investment. Therefore, any losses recognised using the equity method in excess of the Group's investment in ordinary shares of JV A Limited will be applied to the long-term loan. The loan is held by the Group within a business model whose objective is to collect contractual cash flows which are solely payments of principal and interest on the principal amount outstanding. Hence the loan to the joint venture is classified at amortised cost. See below for impairment assessment.

The bills of exchange, debentures, redeemable notes, and short-term loan to associates and loans to other parties are held by the Group within a business model whose objective is to collect their contractual cash flows which are solely payments of principal and interest on the principal amount outstanding. Hence all of those financial assets are classified as at amortised cost.

The fair value of the investments carried at amortised cost is disclosed in note 62(a).

#### **International GAAP Holdings Limited**

IFRS 7:35F(a)(i) IFRS 7:35G

#### Impairment of financial assets

For the purposes of impairment assessment, the corporate bonds, investments in redeemable notes, bills of exchange and debentures are considered to have low credit risk as the counterparties to these investments have a minimum BBB- credit rating. Accordingly, for the purpose of impairment assessment for these financial assets, the loss allowance is measured at an amount equal to 12-month ECL. As for the loans to related and other parties lifetime ECL was provided for them upon initial application of IFRS 9 until these financial assets are derecognised as it was determined on initial application of IFRS 9 that it would require undue cost and effort to determine whether their credit risk has increased significantly since initial recognition to the date of initial application of IFRS 9. For any new loans to related or third parties, which are not purchased or originated credit-impaired financial assets, the impairment loss is recognised as 12-month ECL on initial recognition of such instruments and subsequently the Group assesses whether there was a significant increase in credit risk.

In determining the expected credit losses for these assets, the directors of the Company have taken into account the historical default experience, the financial position of the counterparties, as well as the future prospects of the industries in which the issuers of the redeemable notes, bills of exchange and debentures operate obtained from economic expert reports, financial analyst reports and considering various external sources of actual and forecast economic information, as appropriate, in estimating the probability of default of each of these financial assets occurring within their respective loss assessment time horizon, as well as the loss upon default in each case.

IFRS 7:35F(a) IFRS 7:35G(c)

IFRS 7:35M

There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for these financial assets.

Note 62(d)(ii) details the gross carrying amount, loss allowance as well as the measurement basis of expected credit losses for each of these financial assets by credit risk rating grades.

IFRS 15:117

Amounts relating to contract assets are balances due from customers under construction contracts that arise when the Group receives payments from customers in line with a series of performance related milestones. The Group will previously have recognised a contract asset for any work performed. Any amount previously recognised as a contract asset is reclassified to trade receivables at the point at which it is invoiced to the customer.

Payment for installation of software services is not due from the customer until the installation services are complete and therefore a contract asset is recognised over the period in which the installation services are performed to represent the entity's right to consideration for the services transferred to date.

# #

#### Commentary:

IFRS 15:118 contains a requirement to explain the significant changes in the contract asset (and contract liability) balance during the reporting period. This explanation should include qualitative and quantitative information. Examples of changes in the contract asset and liability balances may include any of the following:

- Changes due to business combinations
- Cumulative catch-up adjustments to revenue that affect the corresponding contract asset or contract liability, including adjustments arising from a change in the measure of progress, a change in an estimate of the transaction price (including any changes in the assessment of whether an estimate of variable consideration is constrained) or a contract modification
- Impairment of a contract asset
- A change in the time frame for a right to consideration to become unconditional (i.e. for a contract asset to be reclassified to a receivable)
- A change in the time frame for a performance obligation to be satisfied (i.e. for the recognition of revenue arising from a contract liability

IFRS 7:34(a)

The directors of the Company always measure the loss allowance on amounts due from customers at an amount equal to lifetime ECL, taking into account the historical default experience, the nature of the customer and where relevant, the sector in which they operate.

IFRS 7:35G(c)

There has been no change in the estimation techniques or significant assumptions made during the current reporting period in assessing the loss allowance for the amounts due from customers under construction contracts.

IFRS 7:35M IFRS 7:35N IFRS 9:B5.5.35 The following table details the risk profile of amounts due from customers based on the Group's provision matrix. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished between the Group's different customer base (see note 31).

# Source **International GAAP Holdings Limited** IFRS 7:35H The following table shows the movement in lifetime ECL that has been recognised for contract assets in accordance IFRS 7:IG20B with the simplified approach set out in IFRS 9. CU Balance as at 1 January 2020 Net increase in loss allowance arising from new amounts recognised in current year, net of those derecognised upon billing **Balance as at 31 December 2020** Net increase in loss allowance arising from new amounts recognised in current year, net of those derecognised upon billing **Balance as at 31 December 2021** There has not been any significant change in the gross amounts of contract assets that has affected the estimation IFRS 7:35B(b) IFRS 7:351 of the loss allowance. 28. Contract costs 31/12/2021 31/12/2020 CU CU IFRS 15:128(a) Costs to obtain contracts Current Non-Current Costs to obtain contracts relate to incremental commission fees of \_\_ per cent paid to intermediaries as a result of obtaining residential property sales contracts. The commission fees are the only cost that the Group would not have incurred if the contract had not been obtained. Whilst the Group incurs other costs that are necessary to facilitate a sale, those costs would have been incurred even if the customer decided not to execute the contract and therefore have not been capitalised. IFRS 15:127 These costs are amortised on a straight-line basis over the period of construction (in general, 2 years) as this IFRS 15:128(b) reflects the period over which the residential property is transferred to the customer. In 2021, amortisation amounting to CU\_\_(2020: CU\_\_) was recognised as part of cost of sales in the consolidated statement of profit or loss. There was no impairment loss (2020: impairment loss of CU\_\_) in relation to the costs capitalised.

#### **International GAAP Holdings Limited**

#### **Commentary:**

In addition to the disclosures required in paragraphs 53-58, a lessee is required to disclose additional qualitative and quantitative information about its leasing activities necessary to meet the disclosure objective in paragraph 51. This additional information may include, but is not limited to, information that helps users of financial statements to assess:

- The nature of the lessee's leasing activities
- Future cash outflows to which the lessee is potentially exposed that are not reflected in the measurement of lease liabilities. This includes exposure arising from:
  - Variable lease payments
  - Extension options and termination options
  - Residual value guarantees
  - Leases not yet commenced to which the lessee is committed
- Restrictions or covenants imposed by leases
- Sale and leaseback transactions

IFRS 15:116(a)

IFRS 7:35G

As at 1 January 2020, trade receivables from contracts with customers amounted to CU\_\_ (net of loss allowance of CU\_\_).

#### **Trade receivables**

The average credit period on sales of goods is 60 days. No interest is charged on outstanding trade receivables.

The Group always measures the loss allowance for trade receivables at an amount equal to lifetime ECL. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. The Group has recognised a loss allowance of 100 per cent against all receivables over 120 days past due because historical experience has indicated that these receivables are generally not recoverable.

IFRS 7:35G(c)

The Group has engaged a third-party supplier to provide relevant economic data for determining the factors that are specific to the debtors, the general economic conditions of the industry in which the debtors operate and the forecast direction of conditions at the reporting date. The Group has significantly increased the expected loss rates for trade receivables from the prior year based on its judgement of the impact of current economic conditions and the forecast direction of travel at the reporting date. There has been no change in the estimation techniques during the current reporting period.

Origination of new trade receivables net of those settled, as well as increase in days past due up to 90 days

31/12/2020

Increase/(decrease) in lifetime ECL

CU

Customer with gross carrying amount of CU\_\_ declared bankruptcy

Origination of new trade receivables net of those settled, as well as decrease in days past due to 60 days

# Commentary:

IFRS 7:35H requires an entity to explain the reasons for the changes in the loss allowance during the period. In addition to the reconciliation from the opening balance to the closing balance of the loss allowance, it may be necessary to provide a narrative explanation of the changes. This narrative explanation may include an analysis of the reasons for changes in the loss allowance during the period, including:

- The portfolio composition
- The volume of financial instruments purchased or originated
- The severity of the expected credit losses

#### **International GAAP Holdings Limited**

- (b) An unsecured loan of CU\_ million (2020: CU\_ million). This loan was advanced on [date] and is due for repayment in full on [date]. The bank loan carries fixed interest rate at \_ per cent (2020: \_ per cent) per annum. The Group hedges a portion of the loan for interest rate risk using an interest rate swap exchanging fixed rate interest for variable rate interest. The outstanding balance is adjusted for fair value movements in the hedged risk, being movements in the 6-month LIBOR rate. The cumulative fair value adjustment to the loan was CU\_ million (2020: CU\_ million).
- (iii) Bills of exchange with a variable interest rate were issued on [date]. The current weighted average effective interest rate on the bills is per cent (2020: per cent) per annum.
- (iv) Amounts repayable to related parties of the Group carry interest of \_\_ per cent to \_\_ per cent (2020: \_\_ per cent to \_\_ per cent) per annum charged on the outstanding loan balances.
- (v) Redeemable cumulative preference shares of CU\_\_ million were issued on [date] at an issue price of CU\_\_ per share. The shares carry \_\_ per cent non-discretionary dividends and are mandatorily redeemable on [date] at CU\_\_ per share. The preference shares do not carry any equity component and are classified as financial liabilities in their entirety. At the same date when the preference shares were issued, the Group entered into a pay-floating, receive-fixed interest rate swap to reduce the fair value risk of changing interest rates. The swap's notional is CU\_\_ million and matches the principal of the preference shares. The swap matures on [date]. To mitigate the accounting mismatch arising on measuring the liability at amortised cost and measuring the derivative at FVTPL, the Group designated the preference shares as at FVTPL. The changes in the fair value of the preference shares due to the changes in the credit risk do not create or enlarge the accounting mismatch and, therefore, they are recognised in other comprehensive income and accumulated in the financial liabilities at FVTPL credit risk reserve (see note 45). The cumulative amount change in fair value due to credit risk was CU\_\_ (2020: CU\_\_). The difference between the carrying amount (i.e. the fair value) of the preference shares and the contractual amount that will be required to pay at maturity is CU\_\_ (2020: CU\_\_). The valuation methodology and inputs used are disclosed in note 62(a)(i).

IFRS 7:10(a) IFRS 7:10(b)

- (vi) Perpetual notes of CU\_ million carrying interest of \_ per cent were issued on [date] at principal value. Issue costs of CU\_ million were incurred.
- (vii) On [date], the Group received an interest-free loan of CU\_ million from the government of [country] to finance staff training costs. The loan is repayable in full at the end of a two-year period. Using prevailing market interest rates for an equivalent loan of \_ per cent, the fair value of the loan is estimated at CU\_ million. The difference of CU\_ between the gross proceeds and the fair value of the loan is the benefit derived from the interest-free loan and is recognised as deferred income (see note 59). Interest charges will be recognised on this loan in 2021 (CU\_) and 2022 (CU\_).

The weighted average interest rates paid during the year were as follows:

31/12/2021 31/12/2020

Bank overdrafts

Bills of exchange

Loans from related parties

Redeemable cumulative preference shares

Perpetual notes

Bank loans

#### IFRS 7:18

#### Breach of a loan agreement

During the current year, the Group was late in paying interest for the first quarter on one of its loans with a carrying amount of CU\_ million. The delay arose because of a temporary lack of funds on the date interest was payable due to a technical problem on settlement. The interest payment outstanding of CU\_ million was paid in full on the following day, including the additional interest and penalty. The lender did not request accelerated repayment of the loan and the terms of the loan were not changed. Management has reviewed the Group's settlement procedures to ensure that such circumstances do not recur.

# Source **International GAAP Holdings Limited** IFRS 7:7 33. Convertible loan notes The convertible loan notes were issued on [date] at an issue price of CU\_\_ per note. The notes are convertible into ordinary shares of the Company at any time between the date of issue of the notes and their settlement date. On issue, the loan notes were convertible at \_\_ shares per CU\_\_ loan note. The conversion price is at a \_\_ per cent premium to the share price of the ordinary shares at the date the convertible loan notes were issued. If the notes have not been converted, they will be redeemed on [date] at par. Interest of \_\_ per cent will be paid annually up until that settlement date. IAS 32:28 The net proceeds received from the issue of the convertible loan notes have been split between the financial liability element and an equity component, representing the fair value of the embedded option to convert the financial liability into equity of the Company, as follows: CU Proceeds of issue of convertible loan notes Transaction costs Net proceeds from issue of convertible loan notes Equity component Transaction costs relating to equity component Amount classified as equity Liability component at date of issue (net of transaction costs) Interest charged (using effective interest rate) Interest paid () Carrying amount of liability component at 31 December 2021 The equity component of CU\_ million has been credited to the option premium on convertible notes reserve (see note 44). The interest expensed for the year is calculated by applying an effective interest rate of \_\_ per cent to the liability component for the \_\_ months period since the loan notes were issued. The liability component is measured at amortised cost. The difference between the carrying amount of the liability component at the date of issue and the amount reported in the reporting at 31 December 2021 represents the effective interest rate less interest paid to that date.

IFRS 7:13B IFRS 7:13C	The Group has entered into master netting agreements with the following coun Derivatives subject to offsetting, master netting agreements and any collateral presented below.		
		CU	CU
	Counterparty A:		
	Derivative assets		
	Derivative liabilities		
	Net amount of financial assets/(liabilities) presented in the statement of financial position		
	Cash collateral (received)/paid		
	Net amount		
	Counterparty B:		
	Derivative assets		
	Derivative liabilities		
	Net amount	·	
		·	

The derivative asset and liability with Counterparty A meet the offsetting criteria in IAS 32. Consequently, the gross derivative liability is offset against the gross derivative asset, resulting in the presentation of a net derivative asset of CU\_ million in the Group's statement of financial position.

Cash collateral has also been received from Counterparty A for a portion of the net derivative asset (CU\_ million). The cash collateral of CU\_ million does not meet the offsetting criteria in IAS 32, but it can be offset against the net amount of the derivative asset and derivative liability in the case of default and insolvency or bankruptcy, in accordance with associated collateral arrangements.

The derivative asset and liability with Counterparty B do not meet the offsetting criteria in IAS 32. Consequently, the gross amount of the derivative asset (CU\_ million) and gross amount of derivative liability (CU\_ million) are presented separately in the Group's statement of financial position.

The Group did not enter into any other enforceable netting arrangements than discussed above.

Further details of derivative financial instruments are provided in note 62(c).

# Source International GAAP Holdings Limited IAS 37:85(a)-(b) The warranty provision represents manage

The warranty provision represents management's best estimate of the Group's liability under 12-month warranties granted on electrical products, based on past experience and industry averages for defective products.

The restructuring provision relates to redundancy costs incurred on the disposal of [name of subsidiary] (see note 52). As at 31 December 2021, approximately 50 per cent of the affected employees had left the Group's employment, with the remainder departing in January 2021.

The restoration provision has been created upon the enactment of new environmental legislation in [*A Land*] on 15 December 2021 which requires companies in [*A Land*] to clean up contaminated land by 30 June 2022 and bear the associated costs thereof. Management is in the process of clarifying certain aspects of the legislation and therefore the final assessment of costs that the Company will need to incur may change materially based on the outcome of this process. Based on the current interpretation of the legislation, the directors have estimated a liability of CU\_\_ million. In estimating the liability, the directors have made assumptions regarding the following: local site volume of contamination, proximity to approved landfill sites, technology available to decontaminate and costs required to dispose of specialised raw materials.

[Describe other provisions.]

#### **Commentary:**

Notes 41 to 52 below set out detailed descriptions and reconciliations for each class of share capital and each component of equity, as required by IAS 1:79, IAS 1:106 and IAS 1:106A. IAS 1 permits some flexibility regarding the level of detail presented in the statement of changes in equity and these supporting notes. IAS 1 allows an analysis of other comprehensive income by item for each component of equity to be presented either in the statement of changes in equity or in the notes. For the purposes of the preparation of these model financial statements, the Group has elected to present the analysis of other comprehensive income in the notes.

IAS 1 also allows that some of the details regarding items of other comprehensive income (income tax and reclassification adjustments) may be disclosed in the notes rather than in the statement of profit or loss and other comprehensive income. Entities will determine the most appropriate presentation for their circumstances – electing to present much of the detail in the notes (as we have done in these model financial statements) ensures that the primary financial statements are not cluttered by unnecessary detail, but it does result in very detailed supporting notes.

Whichever presentation is selected, entities will need to ensure that the following requirements are met:

- Detailed reconciliations are required for each class of share capital (in the statement of changes in equity or in the notes)
- Detailed reconciliations are required for each component of equity separately disclosing the impact on each such component of (i) profit or loss, (ii) each item of other comprehensive income, and (iii) transactions with owners in their capacity as owners (in the statement of changes in equity or in the notes)
- The amount of income tax relating to each item of other comprehensive income should be disclosed (in the statement of profit or loss and other comprehensive income or in the notes)
- Reclassification adjustments should be presented separately from the related item of other comprehensive income (in the statement of profit or loss and other comprehensive income or in the notes)

#### 43. Revaluation reserves

Properties revaluation reserve

The properties revaluation reserve arises on the revaluation of land and buildings. When revalued land or buildings are sold, the portion of the properties revaluation reserve that relates to that asset is transferred directly to retained earnings. Items of other comprehensive income included in the properties revaluation reserve will not be reclassified subsequently to profit or loss.

Distributions from the properties revaluation reserve can be made where they are in accordance with the requirements of the Company's constitution and company law. Amounts may also be effectively distributed out of the properties revaluation reserve as part of a share buy-back. Generally, there is no restriction on the payment of 'bonus shares' out of the properties revaluation reserve. However, the payment of cash distributions out of the reserve is restricted by the terms of the Company's constitution. These restrictions do not apply to any amounts transferred to retained profits. The directors do not currently intend to make any distribution from the properties revaluation reserve.

### **International GAAP Holdings Limited**

### 53. Acquisition of subsidiaries

[Acquisition A Limited]

IFRS 3:B64(a)-(d)

On [date], the Group acquired 100 per cent of the issued share capital of [Acquisition A Limited], obtaining control of [Acquisition A Limited]. [Acquisition A Limited] is a [describe operations of entity acquired] and qualifies as a business as defined in IFRS 3. [Acquisition A Limited] was acquired [provide primary reasons for acquisition of the entity].

#### Commentary:

The disclosures illustrated are also required for business combinations after the end of the reporting period but before the financial statements are authorised for issue unless the initial accounting for the acquisition is incomplete at the time the financial statements are authorised for issue. In such circumstances, the entity is required to describe which disclosures could not be made and the reasons why they could not be made.

IAS 7:40(d)

IFRS 3:B64(i) The amounts recognised in respect of the identifiable assets acquired and liabilities assumed are as set out in the table below. CU Financial assets Inventory Property, plant and equipment Identifiable intangible assets Financial liabilities Deferred tax assets/(liabilities) Contingent liability Total identifiable assets acquired and liabilities assumed Goodwill **Total consideration** Satisfied by: Cash Equity instruments (\_\_ ordinary shares of the Company) Contingent consideration arrangement IFRS 3:B64(f) **Total consideration transferred** IAS 7:40(a) Net cash outflow arising on acquisition: IAS 7:40(b) Cash consideration IAS 7:40(c) Less: cash and cash equivalent balances acquired The fair value of the financial assets includes receivables [describe type of receivables] with a fair value of CU\_\_ million

IFRS 3:B64(h)

and a gross contractual value of CU\_ million. The best estimate at acquisition date of the contractual cash flows not to be collected is CU million.

IFRS 3:B64(i)

A contingent liability of CU\_ million has been recognised in respect of [provide description of nature of obligation]. We expect that the majority of this expenditure will be incurred in 2022 and that all will be incurred by the end of 2023. The potential undiscounted amount of all future payments that the Group could be required to make in respect of this contingent liability is estimated to be between CU\_ million and CU\_ million.

Source	International GAAP Holdings Limited		
IFRS 3:B64(e) & (k)	The goodwill of CU million arising from the acquisition consists of [describe factors that make up goodwill recognised]. None of the goodwill is expected to be deductible for income tax purposes.		
	Commentary:		
	If the initial allocation of goodwill acquired in a business combination during the period cannot be completed before the end of the reporting period, the amount of the unallocated goodwill should be disclosed together with the reasons why that amount remains unallocated.		
	The fair value of the ordinary shares issued as part of the consideration paid for [Acquisition A Limited] (CU million) was determined on the basis of [describe method for determining fair value].		
IFRS 3:B64(g)	The contingent consideration arrangement requires [describe conditions of the contingent consideration arrangement]. The potential undiscounted amount of all future payments that International GAAP Holdings Limited could be required to make under the contingent consideration arrangement is between CU_ million and CU_ million.		
IFRS 3:B64(g)	The fair value of the contingent consideration arrangement of CU million was estimated by applying [describe method for estimating fair value].		
IFRS 3:B64(m)	Acquisition-related costs (included in administrative expenses) amount to CU million.		
IFRS 3:B64(q)	[Name of entity acquired] contributed CU million revenue and CU million to the Group's profit for the period between the date of acquisition and the reporting date.		
IFRS 3:B64(q)	If the acquisition of [name of entity acquired] had been completed on the first day of the financial year, Group revenues for the year would have been CU_ million and Group profit would have been CU_ million.		
	[Acquisition B Limited]		
IFRS 3:B64(a)-(d)	On [date], the Group acquired 80 per cent of the issued share capital of [Acquisition B Limited], thereby obtaining ontrol of [Acquisition B Limited]. [Acquisition B Limited] is a [describe operations of entity acquired] and qualifies is a business as defined in IFRS 3. [Acquisition B Limited] was acquired [provide primary reasons for acquisition of the entity].

Source	International GAAP Holdings Limited
IFRS 3:B67(a)	The initial accounting for the acquisition of [Acquisition B Limited] has only been provisionally determined at the end of the reporting period. For tax purposes, the tax values of [Acquisition B Limited]'s assets are required to be reset based on market values of the assets. At the date of finalisation of these consolidated financial statements, the necessary market valuations and other calculations had not been finalised and they have therefore only been provisionally determined based on the directors' best estimate of the likely tax values.
IFRS 3:B64(h)	The fair value of the financial assets includes receivables [describe type of receivables] with a fair value of CU million and a gross contractual value of CU million. The best estimate at acquisition date of the contractual cash flows not to be collected are CU million.
IFRS 3:B64(e)&(k)	The goodwill of CU million arising from the acquisition consists of [describe factors that make up goodwill recognised]. None of the goodwill is expected to be deductible for income tax purposes.
	The fair value of the ordinary shares issued as part of the consideration paid for [Acquisition B Limited] (CU_ million) was determined on the basis of [describe method for determining fair value].
IFRS 3:B64(o)	The non-controlling interest (20 per cent ownership interest in [Acquisition B Limited]) recognised at the acquisition date was measured by reference to the fair value of the non-controlling interest and amounted to CU This fair value was estimated by applying an income approach. The following were the key model inputs used in determining the fair value:
	Assumed discount rate of per cent
	Assumed long-term sustainable growth rates of per cent to per cent
	Assumed adjustments because of the lack of control or lack of marketability that market participants would consider when estimating the fair value of the non-controlling interests in [Acquisition B Limited]
	All outstanding share options granted by [Acquisition B Limited] to its employees had vested by the acquisition date. These share options were measured in accordance with IFRS 2 at their market-based measure of CU and were included in the non-controlling interest in [Acquisition B Limited]. Methods and significant assumptions used in determining the market-based measure at the acquisition date are set out in note 57.
IFRS 3:B64(m)	Acquisition-related costs (included in administrative expenses) amount to CU million.
IFRS 3:B64(q)	[Name of entity acquired] contributed CU_ million revenue and CU_ million to the Group's profit for the period between the date of acquisition and the reporting date.
IFRS 3:B64(q)	If the acquisition of [name of entity acquired] had been completed on the first day of the financial year, Group revenues for the year would have been CU_ million and Group profit would have been CU_ million.
	Commentary:
IFRS 3:B65	The disclosures illustrated should be given separately for each business combination except that certain disclosures may be disclosed in aggregate for business combinations that are individually immaterial.
IFRS 3:B66	The Standard also imposes identical disclosure requirements for business combinations that are effected after the reporting date but before the financial statements are authorised for issue.

IFRS 2:44 IFRS 2:45(a)

### 57. Share-based payments Equity-settled share option plan

The Company has a share option plan for all employees of the Group. In accordance with the terms of the plan, as approved by shareholders at a previous annual general meeting, employees with more than \_\_ years' service with the Group may be granted options to purchase ordinary shares.

Each employee share option converts into one ordinary share of the Company on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

The number of options granted is calculated in accordance with the performance-based formula approved by shareholders at the previous annual general meeting and is subject to approval by the remuneration committee. The formula rewards employees to the extent of the Group's and the individual's achievement judged against both qualitative and quantitative criteria from the following financial and customer service measures:

- Improvement in share price
- Improvement in net profit
- Improvement in return to shareholders
- Reduction in warranty claims
- Results of client satisfaction surveys
- Reduction in rate of staff turnover

Options are exercisable at a price equal to the average quoted market price of the Company's shares on the date of grant. The vesting period is three years. If the options remain unexercised after a period of five years from the date of grant the options expire. Options are forfeited if the employee leaves the Group before the options vest.

IFRS 2:45(b)

Details of the share options outstanding during the year are as follows:

		31/12/2021		31/12/2020
		Weighted average		Weighted average
	Number of	exercise price		exercise price
	share options	(in CU)	share options	(in CU)

IFRS 2:46 IFRS 2:47(a) All outstanding vested share options were measured in accordance with IFRS 2 at their market-based measure at the acquisition date. The weighted average market-based measure of the share options determined at the acquisition date of [Acquisition B Limited] is CU\_\_. Options were priced using a [Specify Model] option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations. Expected volatility is based on the historical share price volatility over the past 5 years. To allow for the effects of early exercise, it was assumed that executives and senior employees would exercise the options after vesting date when the share price reaches three and a half times the exercise price.

IFRS 2:45(d)

No share options were granted or exercised after the Group obtained control over [Acquisition B Limited]. The share options outstanding at 31 December 2021 had an exercise price of CU\_ and a weighted average remaining contractual life of \_\_days.

### Other share-based payment plans

The employee share purchase plans are open to almost all employees and provide for a purchase price equal to the daily average market price on the date of grant, less \_\_ per cent. The shares can be purchased during a two-week period each year. The shares so purchased are generally placed in the employee share savings plan for a five-year period. Pursuant to these plans, the Group issued \_\_ ordinary shares in 2021, at weighted average share prices of \_\_. The discount of CU\_\_ million will be expensed over the vesting period of \_\_ years.

### **International GAAP Holdings Limited**

# 58. Retirement benefit plans

### **Defined contribution plans**

The Group operates defined contribution retirement benefit plans for all qualifying employees of its construction and leasing divisions in [A Land]. The assets of the plans are held separately from those of the Group in funds under the control of trustees.

IAS 19:43

The employees of the Group's subsidiary in [B Land] are members of a state-managed retirement benefit plan operated by the government of [B Land]. The subsidiary is required to contribute a specified percentage of payroll costs to the retirement benefit plan to fund the benefits. The only obligation of the Group with respect to the retirement benefit plan is to make the specified contributions.

IAS 19:53

The total expense recognised in profit or loss of CU\_ million (2020: CU\_ million) represents contributions payable to these plans by the Group at rates specified in the rules of the plans. As at 31 December 2021, contributions of CU\_ million (2020: CU\_ million) due in respect of the current reporting period had not been paid over to the plans.

#### **Defined benefit plans**

IAS 19:139(a)

The Group sponsors defined benefit plans for qualifying employees of its subsidiaries in [D Land] and previously for the employees of [name of entity]. The defined benefit plans are administered by a separate fund that is legally separated from the Company. The trustees of the pension fund are required by law to act in the interest of the fund and of all relevant stakeholders in the plan. The trustees of the pension fund are responsible for the investment policy with regard to the assets of the fund.

Under the plans, the employees are entitled to post-retirement yearly instalments amounting to \_\_ per cent of final salary on attainment of a retirement age of \_\_. The pensionable salary is limited to CU\_\_. The pensionable salary is the difference between the current salary of the employee and the state retirement benefit. In addition, the service period is limited to \_\_ years resulting in a maximum yearly entitlement (life-long annuity) of \_\_ per cent of final salary.

The defined benefit plans require contributions from employees. Contributions are in the following two forms; one is based on the number of years of service and the other one is based on a fixed percentage of salary of the employees. Employees can also make discretionary contributions to the plans.

IAS 19:139(b)

The plans in [D Land] typically expose the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk. The risk relating to benefits to be paid to the dependents of plan members is reinsured by an external insurance company.

Investment risk	The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to high quality corporate bond yields; if the return on plan asset is below this rate, it will create a plan deficit. Currently the plan has a relatively balanced investment in equity securities, debt instruments and real estate. Due to the long-term nature of the plan liabilities, the trustees of the pension fund consider it appropriate that a reasonable portion of the plan assets should be invested in equity securities and in real estate to leverage the return generated by the fund.
Interest risk	A decrease in the bond interest rate will increase the plan liability but this will be partially offset by an increase in the return on the plan's debt investments.
Longevity risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
Salary risk	The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

### Source **International GAAP Holdings Limited** No other post-retirement benefits are provided to these employees. The most recent actuarial valuations of the plan assets and the present value of the defined benefit liability were carried out at 31 December 2021 by [name], Fellow of the Institute of Actuaries. The present value of the defined benefit liability, and the related current service cost and past service cost, were measured using the projected unit credit method. IAS 19:144 The principal assumptions used for the purposes of the actuarial valuations were as follows: Valuation at 31/12/2021 31/12/2020 Key assumptions used: Discount rate(s) \_\_ % \_\_ % Expected rate(s) of salary increase \_\_ % \_\_ % Average longevity at retirement age for current pensioners\* Male \_\_ years \_ years Female \_\_ years \_\_ years Average longevity at retirement age for current employees (future pensioners)\* Male \_\_ years \_\_ years Female \_\_ years \_\_ years Others [describe] \*Based on [D Land]'s standard mortality table with modifications to reflect expected changes in mortality/others [describe]. IAS 19:135 Amounts recognised in profit or loss in respect of these defined benefit plans are as follows: IAS 19:120 31/12/2021 31/12/2020 CU CU Service cost: Current service cost Past service cost and (gain)/loss from settlements Net interest expense Components of defined benefit costs recognised in profit or loss Of the expense (service cost) for the year, CU\_ million (2020: CU\_ million) has been included in profit or loss as cost of sales and CU\_ million (2020: CU\_ million) has been included in administrative expenses. The net interest expense has been included within finance costs (see note 11). The remeasurement of the net defined benefit liability is included in other comprehensive income.

## Source **International GAAP Holdings Limited** IAS 19:142 The major categories and fair values of plan assets at the end of the reporting period for each category are as follows: 31/12/2021 31/12/2020 31/12/2021 31/12/2020 31/12/2021 31/12/2020 Total Quoted Quoted Unquoted Unquoted Total CU CU CU CU Cash and cash equivalents Equity instruments Consumer industry Manufacturing industry Energy and utilities Financial institutions Health and care ICT and telecom Equity instrument funds Subtotal equity Debt instruments AAA AA BBB and lower not rated Subtotal debt instruments Property Retail Offices Residential Subtotal property Derivatives Interest rate swaps Forward foreign exchange contracts Subtotal derivatives Others [describe] Derivatives are classified as Level 2 instruments and property as Level 3 instruments. It is the policy of the fund to use interest rate swaps to hedge its exposure to interest rate risk. It is the policy of the fund to cover \_\_ per cent of the exposure to interest rate risk of the defined benefit obligation by the use of debt instruments in combination with interest rate swaps. This policy has been realised during the reporting and preceding period. Foreign currency exposures are fully hedged by the use of the forward foreign exchange contracts.

IAS 19:143

The plan assets include ordinary shares of International GAAP Holdings Limited with a fair value of CU\_ million (2020: CU\_ million) and property occupied by a subsidiary of International GAAP Holdings Limited with a fair value of CU\_ million (2020: CU\_ million).

### IAS 19:145(a) - (b)

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

If the discount rate is 100 basis points higher (lower), the defined benefit obligation would decrease (increase) by CU\_ million (2020: CU\_ million).

If the expected salary growth increases (decreases) by 1 per cent, the defined benefit obligation would increase (decrease) by CU\_ million (2020: CU\_ million).

If the life expectancy increases (decreases) by one year for both men and women, the defined benefit obligation would increase (decrease) by CU million (2020: CU million).

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the changes in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

#### IAS 19:145(c)

In presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the statement of financial position.

There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

#### IAS 19:146

Each year an asset-liability matching (ALM) study is performed in which the consequences of the strategic investment policies are analysed in terms of risk-and-return profiles. Investment and contribution policies are integrated within this study.

The main strategic choices that are formulated in the actuarial and technical policy document of the fund are:

- Asset mix based on \_\_ per cent equity instruments, \_\_ per cent debt instruments and \_\_ per cent investment property
- Interest rate sensitivity caused by the duration of the defined benefit obligation should be reduced by \_\_ per cent using debt instruments in combination with interest rate swaps
- Maintaining an equity buffer that gives a \_\_ per cent assurance that assets are sufficient within the next 12 months

There has been no change in the processes used by the Group to manage its risks from prior periods.

### IAS 19:147

The Group's subsidiaries should fund the cost of the entitlements expected to be earned on a yearly basis. Employees pay a fixed \_\_ per cent of pensionable salary. The residual contribution (including back service payments) is paid by the entities of the Group. The funding requirements are based on a local actuarial measurement framework. In this framework the discount rate is set on a risk free rate. Furthermore, premiums are determined on a current salary base. Additional liabilities stemming from past service due to salary increases (back-service liabilities) should be paid immediately to the plan. Apart from paying the costs of the entitlements the Group's subsidiaries are not liable to pay additional contributions in case the plan does not hold sufficient assets. In that case the plan should take other measures to restore its solvency such as a reduction of the entitlements of the plan members.

The average duration of the benefit obligation at the end of the reporting period is \_\_ years (2020: \_\_ years). This number can be subdivided into the duration related to:

- Active members: \_\_ years (2020: \_\_ years)
- Deferred members: \_\_ years (2020: \_\_ years)
- Retired members: \_\_ years (2020: \_\_ years)

The Group expects to make a contribution of CU\_ million (2020: CU\_ million) to the defined benefit plans during the next financial year. The Group is committed to paying into the plan for [X] future years, CU\_ per annum in line with the agreed Schedule of Contributions.

### 61. Refund liability

31/12/2021 31/12/2020 CU CU

Refund liability

IFRS 15:119(d) IFRS 15:126(a)

The refund liability relates to customers' right to return products within 30 days of purchase. At the point of sale, a refund liability and a corresponding adjustment to revenue is recognised for those products expected to be returned. The Group uses its accumulated historical experience to estimate the number of returns on a portfolio level using the expected value method.

#### 62. Financial Instruments

### Commentary:

The following are examples of the types of disclosures that might be required in this area. The matters disclosed will be dictated by the circumstances of the individual entity, by the significance of judgements and estimates made to the results and financial position, and the information provided to key management personnel.

### (a) Classes and categories of financial instruments and their fair values

The following table combines information about:

- Classes of financial instruments based on their nature and characteristics
- The carrying amounts of financial instruments
- Fair values of financial instruments (except financial instruments when carrying amount approximates their fair value)
- · Fair value hierarchy levels of financial assets and financial liabilities for which fair value was disclosed

Fair value hierarchy levels 1 to 3 are based on the degree to which the fair value is observable:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- · Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs)

IFRS 13:91

IFRS 13:93(d), (g)&(h)(i) IFRS 13:IE65(e) (a)(i) Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ financial liabilities	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship and sensitivity of unobservable inputs to fair value		
Foreign currency forward contracts and interest rate swaps (note 34)	Discounted cash flow. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rates at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.	N/A	N/A		
2) Commodity options (note 34)	Black-Scholes model. The following variables were taken into consideration: current underlying price of the commodity, options strike price, time until expiration (expressed as a per cent of a year), implied volatility of the commodity and LIBOR.	N/A	N/A		
3) Held-for-trading shares (note 24)	Quoted bid prices in an active market.	N/A	N/A		
4) Investments in unlisted shares (note 24)	Income approach. In this approach, the discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of these investees.	Long-term revenue growth rates, taking into account management's experience and knowledge of market conditions of the specific industries, ranging from to per cent (2020: to per cent).	The higher the revenue growth rate, the higher the fair value.  If the revenue growth was per cent higher/lower while all other variables were held constant, the carrying amount would increase/decrease by CU million (2020: increase/decrease by CU million).		
		Long-term pre-tax operating margin taking into account management's experience and knowledge of market conditions of the specific industries, ranging from to per cent (2020: to per cent).	The higher the pre-tax operating margin, the higher the fair value.  If the pre-tax operating margin wasper cent higher/lower while all other variables were held constant, the carrying amount would increase/decrease by CU_million (2020: increase/decrease by CU_million).		
		Weighted average cost of capital, determined using a Capital Asset Pricing Model, ranging from to per cent (2020: to per cent).	The higher the weighted average cost of capital, the lower the fair value.  If the weighted average cost of capital was per cent higher/lower while all other variables were held constant, the carrying amount would decrease/increase by CU million (2020: decrease/increase by CU million).		
		Discount for lack of marketability, determined by reference to the share price of listed entities in similar industries, ranging from to per cent (2020: to per cent).	The higher the discount, the lower the fair value.  If the discount was per cent higher/ lower while all other variables were held constant, the carrying amount would decrease/increase by CU million (2020: decrease/increase by CU million).		
5) Listed corporate bond (note 24)	Quoted bid prices in an active market.	N/A	N/A		
6) Redeemable cumulative preference shares (note 32)	Discounted cash flow at a discount rate of per cent (2020: per cent) that reflects the Group's current borrowing rate at the end of the reporting period.	N/A	N/A		

Source	International GAAP Hol	dings Limited						
	7) Contingent consideration in a business combination (note 38)	Discounted cash flow method was used to capture the present value of the Group arising from the contingent consideration.	Discount rate of per cent determined using a Capital Asset Pricing Model.	The higher the discount rate, the lower the fair value.  If the discount rate was per cent higher/lower while all other variables were held constant, the carrying amount would decrease/increase by CU million (2020: decrease/increase by CU million).				
			Probability-adjusted revenues and profits, with a range from CU to	The higher the amounts of revenue and profit, the higher the fair value.				
			CUand a range from CU to CU respectively.	If the revenue wasper cent higher/ lower while all other variables were held constant, the carrying amount would increase/decrease by CU_ million (2020: increase/decrease by CU_ million).

### Source **International GAAP Holdings Limited** Commentary: IFRS 7:10A If an entity has designated a financial liability as at FVTPL and is required to present all changes in the fair value of IFRS 7:10(c) that liability (including the effects of changes in the credit risk of the liability) in profit or loss (because recognising changes in the credit risk of the liability in other comprehensive income would enlarge an accounting mismatch in profit or loss), it shall disclose: · The amount of change, during the period and cumulatively, in the fair value of the financial liability that is attributable to changes in the credit risk of that liability (see above) The difference between the financial liability's carrying amount and the amount the entity would be contractually required to pay at maturity to the holder of the obligation (see above) • A detailed description of the methodology(ies) used to determine whether presenting the effects of changes in a liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, and a detailed description of the economic relationship between the characteristics of the liability and the characteristics of the other financial instrument, when the effects of changes in the liability's credit risk are recognised in profit or loss IFRS 7:31 (b) Financial risk management objectives The Group's Corporate Treasury function provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyses exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk. The Group seeks to minimise the effects of these risks by using derivative financial instruments to hedge these risk exposures. The use of financial derivatives is governed by the Group's policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes. The Corporate Treasury function reports quarterly to the Group's risk management committee, an independent body that monitors risks and policies implemented to mitigate risk exposures. IFRS 7:33 (c) Market risk The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates and interest rates (see below). The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign currency risk, including: • Forward foreign exchange contracts to hedge the exchange rate risk arising on the export of goods to [B Land] and [C Land] • Interest rate swaps to mitigate the risk of rising interest rates • Commodity option to mitigate the price risk of purchased inventory · Forward foreign exchange contracts to hedge the exchange rate risk arising on translation of the Group's investment in foreign operation [name], which has the [currency] as its functional currency Market risk exposures are measured using value-at-risk (VaR) analysis supplemented by sensitivity analysis. IFRS 7:33(c) There has been no change to the Group's exposure to market risks or the manner in which these risks are managed and measured. IFRS 7:41 Value-at-risk (VaR) analysis The VaR measure estimates the potential loss in pre-taxation profit over a given holding period for a specified confidence level. The VaR methodology is a statistically defined, probability-based approach that takes into account market volatilities as well as risk diversification by recognising offsetting positions and correlations between products and markets. Risks can be measured consistently across all markets and products, and risk measures can be aggregated to arrive at a single risk number. The one-day 95 per cent VaR number used by the Group reflects

the 95 per cent probability that the daily loss will not exceed the reported VaR.

### **International GAAP Holdings Limited**

VaR methodologies employed to calculate daily risk numbers include the historical and variance-covariance approaches. In addition to these two methodologies, Monte Carlo simulations are applied to the various portfolios on a monthly basis to determine potential future exposure.

Historical VaR (95%, one-day) Minimum Maximum by risk type Average Year end 31/12/2021 31/12/2020 31/12/2021 31/12/2020 31/12/2021 31/12/2020 31/12/2021 31/12/2020 CU CU CU CU CU CU CU CU Foreign exchange Interest rate Diversification **Total VaR exposure** 

The Group's VaR should be interpreted in light of the limitations of the methodologies used. These limitations include the following:

- Historical data may not provide the best estimate of the joint distribution of risk factor changes in the future and may fail to capture the risk of possible extreme adverse market movements which have not occurred in the historical window used in the calculations
- VaR using a one-day time horizon does not fully capture the market risk of positions that cannot be liquidated or hedged within one day
- VaR using a 95 per cent confidence level does not reflect the extent of potential losses beyond that percentile

These limitations and the nature of the VaR measure mean that the Group can neither guarantee that losses will not exceed the VaR amounts indicated nor that losses in excess of the VaR amounts will not occur more frequently than once in 20 business days.

While VaR captures the Group's daily exposure to currency and interest rate risk, sensitivity analysis evaluates the impact of a reasonably possible change in interest or foreign currency rates over a year. The longer time frame of sensitivity analysis complements VaR and helps the Group to assess its market risk exposures. Details of sensitivity analysis for foreign currency risk and for interest rate risk are set below.

#### IFRS 7:33-34

### (c)(i) Foreign currency risk management

The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilising forward foreign exchange contracts.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the reporting date are as follows:

Assets		Liabilities	
31/12/2020	31/12/2021	31/12/2020	31/12/2021
CU	CU	CU	CU

[Currency B]

[Currency C]

Other

### Foreign currency sensitivity analysis

The Group is mainly exposed to the currency of [B Land] ([Currency B]) and the currency of [C Land] ([Currency C]).

IFRS 7:34(a) IFRS 7:40(b) The following table details the Group's sensitivity to a \_\_ per cent increase and decrease in currency units against the relevant foreign currencies. \_\_ per cent is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the year-end for a \_\_ per cent change in foreign currency rates.

Investment in [name of foreign operation] (iii)

Investment in [name of foreign operation] (iii)

- (i) The Group expects to supply goods to customers in [*B Land*]. The expected sales are highly probable. The Group has entered into foreign exchange forward contracts (for terms not exceeding three months) to hedge the exchange rate risk arising from these anticipated future transactions. It is anticipated that the sales will take place during the first three months of the next financial year, at which time the amount deferred in equity will be reclassified to profit or loss.
- (ii) The Group expects to purchase raw materials from suppliers in [*B Land*] and [*C Land*]. The expected purchases are highly probable. The Group has entered into foreign exchange forward contracts (for terms not exceeding six months) to hedge the exchange rate risk arising from these anticipated future purchases.
  - As at 31 December 2021, the aggregate amount of gains under foreign exchange forward contracts deferred in the cash flow hedge reserve relating to these anticipated future purchase transactions is CU\_ million (2020: gains of CU\_ million). It is anticipated that the purchases will take place during the first six months of the next financial year at which time the amount deferred in equity will be removed from equity and included in the carrying amount of the raw materials. It is anticipated that the raw materials will be converted into inventory and sold within 12 months after purchase.
- (iii) The Group had, in previous years, hedged its investment in [name of foreign operation] against the foreign currency risk arising from the translation of [name of foreign operation]'s net assets from [Currency A] into the Group's functional currency. However, the Group ceased to hedge this investment in 2017 based on management's expectation of the continued strength of [Currency A]. The investment in [name of foreign operation] was fully disposed of in the current year and the cumulative amount arising from the previous hedging relationships which was deferred in equity was reclassified to profit or loss on disposal.

#### Commentary:

The tables above provide an example of summary quantitative data about exposure to foreign exchange risks at the end of the reporting period that an entity may provide internally to key management personnel. Other presentations may also be appropriate.

#### IFRS 7:33-34

#### (c)(ii) Interest rate risk management

The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings, and by the use of interest rate swap contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite; ensuring the most cost-effective hedging strategies are applied.

The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

The Group is exposed to CU LIBOR. The exposures arise on derivatives and non-derivative financial assets and liabilities (e.g. bills of exchange, debt and leases).

As listed in note 2, the Group has cash flow and fair value hedge relationships affected by the interest rate benchmark reform. Hedged items in these hedges include issued CU-denominated fixed rate debt. The debt that was originally issued as CU LIBOR floating rate debt was transitioned to SONIA (see note 32). Hedging instruments include LIBOR based interest rate swaps. The Group also has bills of exchange and lease liabilities linked to CU LIBOR, which are not designated in hedging relationships.

The Group has closely monitored the market and the output from the various industry working groups managing the transition to new benchmark interest rates. This includes announcements made by the IBOR regulators. The FCA has confirmed that all LIBOR settings will either cease to be provided by any administrator or no longer be representative:

- Immediately after 31 December 2021, in the case of all sterling, euro, Swiss franc and Japanese yen settings, and the 1-week and 2-month US dollar settings
- Immediately after 30 June 2023, in the case of the remaining US dollar settings

In response to the announcements, the Group has set up an IBOR transition programme comprised of the following work streams: risk management, tax, treasury, legal, accounting and systems. The programme is under the governance of the Chief Financial Officer who reports to the Board.

#### Risks arising from the interest rate benchmark reform

The following are the key risks for the Group arising from the transition.

- 1. Interest rate basis risk: There are two elements to this risk as outlined below.
  - If the bilateral negotiations with the Group's counterparties are not successfully concluded before the cessation of LIBORs, there are significant uncertainties with regard to the interest rate that would apply. This gives rise to additional interest rate risk that was not anticipated when the contracts were entered into and is not captured by our interest rate risk management strategy
- Interest rate basis risk may arise if a non-derivative instrument and the derivative instrument held to manage the interest risk on the non-derivative instrument transition to alternative benchmark rates at different times. This risk may also arise where back-to-back derivatives transition at different times. The Group will monitor this risk against its risk management policy which has been updated to allow for temporary mismatches of up to 12 months and transact additional basis interest rate swaps if required
- 2. Liquidity risk: There are fundamental differences between LIBORs and the various alternative benchmark rates which the Group will be adopting. LIBORs are forward-looking term rates published for a period (e.g. 3 months) at the beginning of that period and include an inter-bank credit spread, whereas alternative benchmark rates are typically risk-free overnight rates published at the end of the overnight period with no embedded credit spread. These differences will result in additional uncertainty regarding floating rate interest payments which will require additional liquidity management. The Group's liquidity risk management policy has been updated to ensure sufficient liquid resources to accommodate unexpected increases in overnight rates

#### Source International GAAP Holdings Limited

- 3. Accounting: If transition to alternative benchmark rates for certain contracts is finalised in a manner that does not permit the application of the reliefs introduced in the Phase 2 amendments, this could lead to discontinuation of hedge accounting relationships, increased volatility in profit or loss if re-designated hedges are not fully effective and volatility in the profit or loss if non-derivative financial instruments are modified or derecognised. The Group is aiming to agree changes to contracts that would allow IFRS 9 reliefs to apply. In particular, the Group is not seeking to novate derivatives or close out derivatives and enter into new on-market derivatives where derivatives have been designated in hedging relationships
- 4. Litigation risk: If no agreement is reached to implement the interest rate benchmark reform on existing contracts, (e.g. arising from differing interpretation of existing fallback terms), there is a risk of prolonged disputes with counterparties which could give rise to additional legal and other costs. The Group is working closely with all counterparties to avoid this from occurring
- 5. Operational risk: Our current treasury management system is undergoing upgrades to fully manage the transition to alternative benchmark rates and there is a risk that such upgrades are not fully functional in time, resulting in additional manual procedures which give rise to operational risks. The Group is working closely with its system provider to ensure the relevant updates are made in good time and the Group has plans in place for alternative manual procedures with relevant controls to address any potential delay

#### Progress towards implementation of alternative benchmark interest rates

All newly transacted floating rate financial assets and liabilities are linked to an alternative benchmark rate, such as SONIA or SOFR or if, linked to LIBOR, include detailed fallback clauses clearly referencing the alternative benchmark rate and the trigger event on which the clause is activated.

The Group has a risk management policy of maintaining an appropriate mix between fixed and floating rate borrowings. However, due to the lack of liquidity in the SONIA and SOFR markets, the Group is temporarily increasing the amount of fixed rate debt it carries by either issuing fixed rate debt or entering into interest rate swap contracts.

The Group is planning to transition the majority of its LIBOR-linked contracts to risk-free rates through introduction of, or amendments to, fallback clauses into the contracts which will change the basis for determining the interest cash flows from LIBOR to RFR at an agreed point in time. Some of these fallback provisions have been incorporated into contracts in the first quarter of 2020 but the majority are expected to be implemented before 2021.

#### Interest rate benchmark transition for non-derivative financial instruments

 $As \ discussed \ in \ note \ 32, the \ Group \ transitioned \ CU\_\ million \ of the \ 3-months \ CU \ LIBOR \ bank \ borrowings \ to \ SONIA.$ 

For the Group's CU\_ million bills of exchange linked to CU LIBOR, the fallback clauses were incorporated in H1 2021.

The Group has not yet agreed changes with the landlords to its leases but these are expected in H1 2022.

#### **International GAAP Holdings Limited**

Non- derivative financial instrument prior to transition	Maturing in	Nominal currency (FCm)	Total nominal (CUm)	Hedge accounting	Transition progress for non-derivative financial instruments
Bank borrowings linked to CU LIBOR	2024/2025			Designated in cash flow hedge (see below)	Transitioned to SONIA
Bills of exchange linked to CU LIBOR	2026			N/A	Fallback clauses were incorporated
Lease liabilities linked to CU LIBOR	2025			N/A	Expected to transition in H1 2022

Total floating rate non-derivative liabilities	
Amounts subject to the interest rate benchmark reform	

The Group has not yet agreed changes to its CU\_ million of CU LIBOR investments in bills of exchange maturing between \_\_\_ and \_\_\_ but these are expected in H1 2022.

#### Interest rate benchmark transition for derivatives and hedge relationships

The Group has in issue CU\_ million of CU-denominated fixed rate bank borrowings maturing in 2026 which were in a fair value hedge of CU LIBOR using a fixed to CU LIBOR interest rate swap contract. The Group have not yet transitioned the interest rate swaps to alternative risk-free rate; however, the Phase 1 amendments permit continuation of hedge accounting even if in the future the hedged benchmark interest rate is no longer considered to be separately identifiable. The Group has also determined that the hedged LIBOR interest rate risk component of the designated fixed rate bank loans continue to be reliably measurable.

As it was discussed earlier, the Group has transitioned CU\_\_ million of its bank borrowings to SONIA. These bank borrowings are hedged in a cash flow hedge using a 3-month LIBOR to fixed interest rate swap contract. During the first quarter of 2021 the Group entered into an equal but offsetting derivative against the original derivative and a new off-market derivative based on SONIA plus fixed spread on the same terms as the original derivative (i.e. the fair value on day one of the new SONIA derivative was the same as the original LIBOR derivative). This change was done as a direct consequence of the reform and on an economically equivalent basis. The Group changed the hedge documentation to include the new derivatives and amended the designated hedged risk to "variability in the cash flows of the bank borrowings resulting from changes in SONIA". The hedge relationship was not discontinued and the accumulated gain in the cash flow hedge reserve is deemed to be based on SONIA.

For Group's derivatives with nominal amount CU\_ million that reference to 6-month LIBOR maturing in 2024 but were not designated in hedge relationships, the International Swaps and Derivatives Association's (ISDA) fallback clauses were made available in the first quarter of 2021 and the Group has signed up to the protocol, along with each of the Group's counterparties. This ensures all legacy trades will, on cessation of IBOR, follow the fallback clause provided in the protocol.

The Group will continue to apply the amendments to IFRS 9 until the uncertainty arising from the interest rate benchmark reforms with respect to the timing and the amount of the underlying cash flows that the Group is exposed ends. The Group expects this uncertainty will continue until the Group's contracts that reference LIBORs are amended to specify the date on which the interest rate benchmark will be replaced, the basis for the cash flows of the alternative benchmark rate are determined including any fixed spread.

#### Source **International GAAP Holdings Limited** Interest rate sensitivity analysis IFRS 7:34(a) The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives IFRS 7:40(b) and non-derivative instruments at the reporting date. For floating rate liabilities, the analysis is prepared assuming the amount of liability outstanding at the reporting date was outstanding for the whole year. A per cent increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates. IFRS 7:40(c) [Where the assumptions used have changed from previous years, include detail of and reasons for those changes.] IFRS 7:40(a) If interest rates had been per cent higher/lower and all other variables were held constant, the Group's: • Profit for the year ended 31 December 2021 would decrease/increase by CU\_ million (2020: decrease/ increase by CU\_ million). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings Other comprehensive income would decrease/increase by CU\_\_ million (2020: decrease/increase by CU\_\_ million) mainly as a result of the changes in the fair value of investment in corporate bonds classified as at FVTOCI IFRS 7:33(c) The Group's sensitivity to interest rates has decreased during the current year mainly due to the reduction in variable rate debt instruments and the increase in interest rate swaps to swap floating rate debt to fixed rate debt. Interest rate swap contracts IFRS 7:22A Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate IFRS 7:22B interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate IFRS 7:33-34 the risk of changing interest rates on the fair value of issued fixed rate debt held and the cash flow exposures on the issued variable rate debt held. The fair value of interest rate swaps at the reporting date is determined by discounting the future cash flows using the curves at the reporting date and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the financial year. As the critical terms of the interest rate swap contracts and their corresponding hedged items are the same, the IFRS 7:22B Group performs a qualitative assessment of effectiveness and it is expected that the value of the interest rate IFRS 7:23D swap contracts and the value of the corresponding hedged items will systematically change in opposite direction in IFRS 7:23E response to movements in the underlying interest rates. The main source of hedge ineffectiveness in these hedge relationships is the effect of the counterparty and the Group's own credit risk on the fair value of the interest rate swap contracts, which is not reflected in the fair value of the hedged item attributable to the change in interest rates. No other sources of ineffectiveness emerged from these hedging relationships. IFRS 7:23B The following tables detail various information regarding interest rate swap contracts outstanding at the end of the IFRS 7:24A(b) reporting period and their related hedged items. Interest rate swap contract assets and liabilities are included in note 34.

#### Commentary:

The tables above provide an example of summary quantitative data about exposure to foreign exchange risks at the end of the reporting period that an entity may provide internally to key management personnel. Other presentations may also be appropriate.

IFRS 7:23C IFRS 7:23E The following table details the effectiveness of the hedging relationship and the amounts reclassified from hedging reserve to profit or loss:

Hedged items	Current period hedging gains (losses) recognised in OCI		Amount of hedge ineffectiveness recognised in profit or loss (P/L)		in which hedge ineffectiveness	Due to hedged future cash flows being no longer expected to occur		Due to hedged item affecting P/L		Line item in P/L in which reclassification adjustment is included
	31/12/2021	31/12/2020	31/12/2021	31/12/2020		31/12/2021	31/12/2020	31/12/2021	31/12/2020	
	CU	CU	CU	CU		CU	CU	CU	CU	
Variable rate borrowings					Other gains and losses					Finance costs

The interest rate swaps settle on a quarterly basis. The floating rate on the interest rate swaps is 3-month LIBOR. The Group will settle the difference between the fixed and floating interest rate on a net basis.

IFRS 7:22A IFRS 7:23A All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges to reduce the Group's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest payments on debt affect profit or loss.

## Source International GAAP Holdings Limited

#### IFRS 7:33-34

#### (c)(iii) Commodity price risk

Commodity price risk in the Group primarily arises from price fluctuations and the availability of [type of commodity]. The Group may enter into derivative transactions to limit these risks. Hedging activities are evaluated regularly to align with Group expectations about the price changes and defined risk appetite; ensuring the most cost-effective hedging strategies are applied.

#### IFRS 7:40

#### Commodity price sensitivity analysis

If the commodity prices of the hedged commodity had been \_\_ per cent higher (lower) as of December 2021, profit after tax would have been CU\_ million (2020: CU\_ million) higher (lower).

If the commodity prices of the hedging transactions accounted for using cash flow hedge accounting had been \_\_ per cent higher (lower) as of December 2021, equity would have been CU\_ million (2020: CU\_ million) higher (lower).

#### **Commodity options**

It is the policy of the Group to enter into commodity options to manage the commodity price risk associated with anticipated purchase transactions out to 24 months. The Group policy is to hedge up to 80 per cent of exposure generated within 3 months, about 60 per cent of exposure with maturity between 3 months and 12 months and no more than 40 per cent of exposure generated in 2 years. Basis adjustments are made to the initial carrying amounts of inventories when the anticipated purchases take place. The Group always designates the intrinsic value of the options.

In the current year, the Group has designated certain commodity options as a cash flow hedge of highly probable purchases. Because the critical terms (i.e. the quantity, maturity and underlying) of the commodity option and their corresponding hedged items are the same, the Group performs a qualitative assessment of effectiveness and it is expected that the intrinsic value of the commodity option and the value of the corresponding hedged items will systematically change in opposite direction in response to movements in the price of underlying commodity if the price of the commodity increases above the strike price of the derivative.

The main source of hedge ineffectiveness in these hedge relationships is the effect of the counterparty and the Group's own credit risk on the fair value of the option contracts, which is not reflected in the fair value of the hedged item and if the forecast transaction will happen earlier or later than originally expected.

IFRS 7:23C IFRS 7:23E The following tables detail the commodity options outstanding at the end of the reporting period, as well as information regarding their related hedged items. Commodity options are presented in the line 'Derivative financial instruments' within the statement of financial position (see note 34 for further details):

#### **International GAAP Holdings Limited**

IFRS 7:33 - 34 IFRS 7:35B

IFRS 7:35F(a)(i)

#### (d) Credit risk management

Note 62(d)(ii) details the Group's maximum exposure to credit risk and the measurement bases used to determine expected credit losses.

In order to minimise credit risk, the Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only transacts with entities that are rated the equivalent of investment grade. Investments in instruments, including bills of exchange, debentures and redeemable notes as detailed in note 24, where the counterparties have a minimum BBB- credit rating, are considered to have low credit risk for the purpose of impairment assessment. The credit rating information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.

IFRS 7:34(c)

Before accepting any new customer, a dedicated team responsible for the determination of credit limits uses an external credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed and approved twice a year by the risk management committee. 80 per cent of the trade receivables have the best credit scoring attributable under the external credit scoring system used by the Group.

Credit approvals and other monitoring procedures are also in place to ensure that follow-up action is taken to recover overdue debts. Furthermore, the Group reviews the recoverable amount of each trade debt and debt investment on an individual basis at the end of the reporting period to ensure that adequate loss allowance is made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced. Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, credit guarantee insurance cover is purchased.

IFRS 7:B8 IFRS 7:34(c) IFRS 7:35B(c) Of the trade receivables balance at the end of the year, CU\_ million (2020: CU\_ million) is due from Company A, the Group's largest customer. Apart from this, the Group does not have significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The Group defines counterparties as having similar characteristics if they are related entities. Concentration of credit risk related to Company A did not exceed 20 per cent of gross monetary assets at any time during the year. Concentration of credit risk to any other counterparty did not exceed 5 per cent of gross monetary assets at any time during the year. The concentration of credit risk is limited due to the fact that the customer base is large and unrelated.

IFRS 7:B10(b)

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

IFRS 7:B10(c)

In addition, the Group is exposed to credit risk in relation to financial guarantees given to banks. The Group's maximum exposure in this respect is the maximum amount the Group could have to pay if the guarantee is called on (see below). As at 31 December 2021, an amount of CU\_ (2020: CU\_) has been estimated as a loss allowance in accordance with IFRS 9, however, no loss allowance was recognised in profit or loss because the premium received less cumulative amount recognised in profit or loss was higher than the expected amount of loss allowance (see note 37).

#### **International GAAP Holdings Limited**

IFRS 7:35K(b)

#### (d)(i) Collateral held as security and other credit enhancements

The Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets, except that the credit risk associated with finance lease receivables is mitigated because they are secured over the leased store equipment. The carrying amount of finance lease receivables amounts to CU\_\_ million (2020: CU\_\_ million) and the fair value of the leased assets is estimated to be approximately CU\_\_ million (2020: CU\_\_ million). The Group is not permitted to sell or repledge the collateral in the absence of default by the lessee. There have not been any significant changes in the quality of the collateral held for finance lease receivables. The Group has not recognised a loss allowance for the finance lease receivables as a result of these collaterals.

#### Commentary:

For all financial instruments to which the impairment requirements in IFRS 9 are applied, IFRS 7:35K(b) and (c) specify that entities should disclose the following:

- · A narrative description of collateral held as security and other credit enhancements, including:
  - A description of the nature and quality of the collateral held
  - An explanation of any significant changes in the quality of that collateral or credit enhancements as a result of deterioration or changes in the collateral policies of the entity during the reporting period
  - Information about financial instruments for which an entity has not recognised a loss allowance because of the collateral
- Quantitative information about the collateral held as security and other credit enhancements (for example, quantification of the extent to which collateral and other credit enhancements mitigate credit risk) for financial assets that are credit-impaired at the reporting date. For all financial instruments within the scope of IFRS 7, but to which the impairment requirements in IFRS 9 are not applied, IFRS 7:36(b) specifies that entities should give a description of collateral held as security and of other credit enhancements, and their financial effect (e.g. a quantification of the extent to which collateral and other credit enhancements mitigate credit risk) in respect of the amount that best represents the maximum exposure to credit risk

IFRS 7:7 IFRS 7:31 IFRS 7:35K(a)

#### (d)(ii) Overview of the Group's exposure to credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. As at 31 December 2021, the Group's maximum exposure to credit risk without taking into account any collateral held or other credit enhancements, which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties and financial guarantees provided by the Group arises from:

- The carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position
- The maximum amount the entity would have to pay if the financial guarantee is called upon, irrespective of the likelihood of the guarantee being exercised as disclosed in note 62(e)(i). The related loss allowance is disclosed in note 38

The Group's current credit risk grading framework comprises the following categories:

Category	Description	Basis for recognising expected credit losses
Performing	The counterparty has a low risk of default and does not have any past-due amounts	12-month ECL
Doubtful	Amount is >30 days past due or there has been a significant increase in credit risk since initial recognition	Lifetime ECL – not credit- impaired
In default	Amount is >90 days past due or there is evidence indicating the asset is credit-impaired	Lifetime ECL – credit-impaired
Write-off	There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery	Amount is written off

### IFRS 7:35M IFRS 7:B10(c)

#### **International GAAP Holdings Limited**

#### Commentary:

IFRS 7:35M requires the disclosure of information about an entity's credit risk exposure and significant concentrations of credit risk by credit risk grading at the reporting date. The number of credit risk rating grades used to disclose such information should be consistent with the number that the entity reports to key management personnel for credit risk management purposes. However, in some cases, delinquency and past due information may be the only borrower-specific information available without undue cost or effort, which is used to assess whether credit risk has increased significantly since initial recognition. In such cases, an entity should provide an analysis of those financial assets by past due status.

IFRS 7:35M IFRS 7:35N IFRS 7:36(a) The tables below detail the credit quality of the Group's financial assets, contract assets and financial guarantee contracts, as well as the Group's maximum exposure to credit risk by credit risk rating grades:

<sup>(</sup>i) For financial guarantee contracts, the gross carrying amount represents the maximum amount the Group has guaranteed under the respective contracts, and the net carrying amount represents the loss allowance recognised for the contracts.

<sup>(</sup>ii) For trade receivables, finance lease receivables and contract assets, the Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. The Group determines the expected credit losses on these items by using a provision matrix, estimated based on historical credit loss experience based on the past due status of the debtors, adjusted as appropriate to reflect current conditions and estimates of future economic conditions. Accordingly, the credit risk profile of these assets is presented based on their past due status in terms of the provision matrix. Notes 27, 29 and 31 include further details on the loss allowance for these assets respectively.

#### **International GAAP Holdings Limited**

The loss allowance on corporate bonds measured at FVTOCI is recognised against other comprehensive income and accumulated in the investment revaluation reserve. See note 43.

IFRS 7:36(a)-(b) IFRS 7:B10(b) The carrying amount of the Group's financial assets at FVTPL as disclosed in note 24 best represents their respective maximum exposure to credit risk. The Group holds no collateral over any of these balances.

#### **Commentary:**

For all financial instruments within the scope of IFRS 7, but to which the impairment requirements in IFRS 9 are not applied, IFRS 7:36(a) requires an entity to disclose by class of financial instrument the amount that best represents the entity's maximum credit risk exposure at the end of the reporting period, excluding the effect of any collateral and other amounts that do not qualify for offset in accordance with IAS 32. Examples of financial instruments that are within the scope of IFRS 7 but that are not subject to the IFRS 9 impairment requirements include:

- Financial assets and derivatives measured at FVTPL
- Financial guarantee contracts issued measured at FVTPL
- Loan commitments issued measured at FVTPL

Equity investments, regardless of whether they are measured at FVTPL or FVTOCI, are also in the scope of IFRS 7 but not subject to the IFRS 9 impairment requirements; however, they do not give rise to an exposure to credit risk and therefore are not subject to the IFRS 7 credit risk disclosures.

IFRS 7:33-34

#### (e) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. Details of additional undrawn facilities that the Group has at its disposal to further reduce liquidity risk are set out below.

IFRS 7:34-35 IFRS 7:39(c)

#### (e)(i) Liquidity and interest risk tables

The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The table includes both interest and principal cash flows. To the extent that interest cash flows are floating rate, the undiscounted amount is derived from interest rate curves at the reporting date.

IFRS 7:B10(c)

The amounts included in the following table for financial guarantee contracts are the maximum amount the Group could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee (see note 38). Based on expectations at the end of the reporting period, the Group considers that it is more likely than not that no amount will be payable under the arrangement. However, this estimate is subject to change depending on the probability of the counterparty claiming under the guarantee which is a function of the likelihood that the financial receivables held by the counterparty which are guaranteed suffer credit losses.

The contractual maturity is based on the earliest date on which the Group may be required to pay.

#### Commentary:

The tables below include the weighted average effective interest rate and the carrying amount of the respective financial liabilities as reflected in the consolidated statement of financial position as an example of summary quantitative data about exposure to interest rates at the end of the reporting period that an entity may provide internally to key management personnel.

### Appendix 1—Areas of the model financial statements affected by climate change and COVID-19

#### **Climate change**

Risks and uncertainties arising from climate change could affect the following areas of the financial statements.

Section	Area	Commentary
3. Significant accounting policies	Going concern assessment	All entities are required to make an assessment of whether an entity is a going concern when preparing financial statements, considering all information available about the future. IAS 1 requires that the information should cover at least 12 months from the end of the reporting period but not be limited to that period. Management would consider information about the impacts of climate change as part of this assessment.
4. Critical accounting judgements and key sources of estimation uncertainty 16. Goodwill 17. Other intangible assets 18. Property, plant and equipment 21. Associates 22. Joint ventures	Impairment of non- financial assets	The uncertainties in relation to climate change may result in changes to management's cash flow projections or to the level of risk associated with achieving those cash flows, in which case they form part of a value-in-use or fair value assessment. An entity should consider the long-term impacts of climate change and consider disclosing climate-related assumptions as key assumptions.
3. Significant accounting policies 18. Property, plant and equipment	Useful lives of assets	Climate change-related factors may indicate that an asset could become physically unavailable or commercially obsolete earlier than previously expected. Furthermore, the expected timing of the replacement of existing assets may be accelerated. Such factors should be incorporated into a review of an asset's useful economic life or its residual value.
39. Provisions 55. Contingent liabilities	Provisions, contingencies and onerous contracts	The pace and severity of climate change, as well as accompanying government policy and regulatory measures, may affect the recognition, measurement and disclosure of provisions, contingencies and onerous contracts.
4. Critical accounting judgements and key sources of estimation uncertainty	Key judgements and estimates disclosures	If assumptions related to the impact of climate change have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year, then disclosures about the nature of the assumptions should be provided.
4. Critical accounting judgements and key sources of estimation uncertainty	Information that is relevant to understanding the financial statements	If users of the financial statements could reasonably expect that climate change-related risks will have significant impact on the Company and this would qualitatively influence their decisions, then management should clearly disclose information about the climate change assumptions that they have made (if not disclosed elsewhere), including disclosures around the sensitivity of those assumptions. This is to enable users to understand the basis of forecasts on which the financial statements are prepared. This may mean that disclosure is provided even if the effects of climate change on the Company may only be experienced in the medium to longer term.

International GAAP	Holdings Limited	
Section	Area	Commentary
4. Critical accounting judgements and key sources of estimation uncertainty 24. Investments 27. Contract assets 29. Finance lease receivables 31. Trade and other receivables	Impairment of financial assets	Climate-related events, such as floods and hurricanes, can affect the creditworthiness of borrowers due to business interruption, impacts on economic strength, asset values and unemployment. In addition, borrowers' ability to pay debts might be diminished if they are in industries that have fallen out of favour and are therefore depressed. The impact on receivables in entities operating in non-financial industries is likely to be less severe because the economic conditions are less likely to change during the collection period of the debtors. However, where a significant climate-related event has occurred, the effect of this event on trade receivables at balance sheet date should be assessed.
18. Property, plant and equipment 19. Investment property 62. Financial Instruments	Assets measured on a fair value basis	Climate change risk may affect the measurement of fair value in respect of assets measured at fair value or tested for impairment on a fair value less costs of disposal basis.
58. Retirement benefit plans	Impact on pension risks from climate	Pension trustees are required to consider all material financial risks, including the exposure of pension assets to climate change risk.  Demographic assumptions and investment performance can vary significantly under different climate change scenarios, affecting the measurement of pension asset and liability balances at the balance sheet date.
35. Deferred tax	Recoverability of deferred tax assets	Assumptions underlying the forecast of future taxable profits that supports the recoverability of deferred tax assets should be consistent with assumptions underlying other profit forecasts used in the preparation of the financial statements or disclosed in the narrative reports.
4. Critical accounting judgements and key sources of estimation uncertainty 12. Income Tax 39. Provisions 55. Contingent liabilities	New levies or taxes	New levies or taxes may be introduced to encourage decarbonisation. Any levy liabilities should be recognised as the obligation is triggered under law (per IFRIC 21) and any income tax effects should be incorporated into normal IAS 12 accounting. Care should be taken when distinguishing between a levy and income tax and the application of IFRIC 21 or IAS 12 as this has proven to be a challenging area as new taxes/levies have been introduced in the past.
17. Other intangible assets	Carbon trading schemes	There are currently different acceptable approaches to account for carbon trading schemes. The accounting policy applied by the entity should be disclosed if this is relevant for users to understand the financial statements.
57. Share-based payments	Incentive schemes	Entities may introduce incentive schemes to incentivise management to decarbonise. Such schemes may either fall in the scope of IAS 19 or IFRS 2 depending on the nature of the awards. Decarbonisation targets should be treated as any other uncertainties or actuarial assumptions for IAS 19 benefits and should be treated as performance conditions for share-based payments under IFRS 2.

#### **International GAAP Holdings Limited**

#### COVID-19

Financial statement disclosures will need to convey the material effects of the COVID-19 pandemic. Entities must carefully consider their unique circumstances and risk exposures when analysing how the ongoing effect of the COVID-19 pandemic may affect their financial statements. The significance of the individual issues discussed will vary by geography, by industry and, by entity. The areas mentioned below are discussed further in our <u>IFRS in Focus</u> 'Accounting considerations related to the Coronavirus 2019 Disease'.

Section	Area	Commentary
<ul> <li>Consolidated statement of profit or loss</li> <li>Consolidated statement of profit or loss and other comprehensive income</li> </ul>	Statement of profit or loss	Caution should be used when excluding COVID-19-related items from operating profit. Many impacts of COVID-19 are part of the entity's normal activities and therefore part of the underlying business performance. They should therefore not be excluded from 'underlying' results in the statement of profit or loss and other comprehensive income.
<ul> <li>Consolidated statement of profit or loss</li> <li>Consolidated statement of profit or loss and other comprehensive income</li> </ul>	Alternative performance measures (APMs)	<ul> <li>The introduction of new APMs or the adjustment of existing APMs should be carefully evaluated</li> <li>Caution should be used when excluding COVID-19-related items from operating profit. Many impacts of COVID-19 are part of the entity's normal activities and therefore part of the underlying business performance. They should therefore not be excluded from 'underlying' results in the statement of profit or loss and other comprehensive income</li> <li>It is also important to consider local regulators' guidance on APMs as it might contain explicit restrictions on COVID-19-related items</li> </ul>
3. Significant accounting policies	Going concern	Material uncertainties that cast a significant doubt on the entity's ability to continue as a going concern may arise from COVID-19-related events. IAS 1 requires that an entity discloses those material uncertainties in the financial statements.
4. Critical accounting judgements and key sources of estimation uncertainty	Material judgements and estimates	Entities should provide as much context as possible as to how COVID-19 affects the assumptions and predictions they have used when estimating amounts recognised in the financial statements.
4. Critical accounting judgements and key sources of estimation uncertainty 16. Goodwill 17. Other intangible assets 18. Property, plant and equipment 21. Associates 22. Joint ventures 25. Inventories 27. Contract assets	Impairment of non-financial assets  • Assets subject to the requirements of IAS 36  • Valuation of inventories  • Costs to obtain or fulfil a revenue contract and up-front payments to customers	Entities will need to assess whether any impairment triggers have arisen from the ongoing impact of COVID-19 for assets that are covered by IAS 36. For assets other than goodwill which have been impaired in a prior period, entities will need to assess whether there has been a change in the estimates used to determine the recoverable amount of the assets since the last impairment loss was recognised which could lead to a reversal of impairment. The recoverable amount of assets will also likely be affected given the estimation uncertainty associated with COVID-19      Entities will need to consider the ongoing impact of the COVID-19 pandemic on the recoverability of inventory balances

	5. Revenue	Variable consideration				
	27. Contract assets	Material right				
28. Contract costs 60. Contract liabilities		Significant financing component				
	Implied performance obligations					
		Recognition of revenue				
	13. Discontinued operations 39. Provisions	Restructuring plans	In a difficult economic environment and facing difficulties in obtaining financing, an entity may be considering or implementing restructuring plans such as the sale or closure of part of its businesses or the downsizing (temporarily or permanently) of operations			
			If an entity disposes of or classifies as held for sale a component that meets the definition of a discontinued operation, the presentation and disclosure requirements of IFRS 5 apply			
			Entities may reduce their workforce through temporary employee layoffs or may be forced to consider subsequent restructuring actions as information becomes available on the long-term effects of the pandemic on an entity's operations			
	39. Provisions	Onerous contracts provisions	Because of the continuing impacts of COVID-19, unavoidable costs of meeting the obligations under a contract may exceed the benefits expected to be received, resulting in an onerous contract.			
	4. Critical accounting judgements and key sources of estimation uncertainty	Insurance recoveries	Entities that incur losses stemming from the COVID-19 pandemic may be entitled to insurance recoveries.			
	3. Significant accounting policies	<ul><li>Lease contracts</li><li>Impairments</li></ul>	Impairments to right-of use (ROU) assets could occur as a result of business closures, supply chain disruption, or other			
	4. Critical accounting judgements and key sources of estimation uncertainty		consequences of the pandemic that negatively affect the future cash flows expected to be derived from the use of the underlying asset.			
	30. Leases (Group as a lessee)					
	36. Lease liabilities

	<ol> <li>Adoption of new and revised Standards</li> <li>Significant accounting policies</li> <li>Critical accounting judgements and key sources of estimation uncertainty</li> <li>Leases (Group as a</li> </ol>	Amendment to IFRS 16 Covid-19-Related Rent Concessions and Covid-19-Related Rent Concessions beyond 30 June 2021	With regard to rent concessions, the Board published amendments to IFRS 16 adding a practical expedient which allows a lessee to elect not to assess whether a COVID-19-related rent concession is a lease modification. Entities applying the amendments are required to state that fact and whether or not they have used the expedient.			
	lessee) 36. Lease liabilities					
	3. Significant accounting policies  4. Critical accounting judgements and key sources of estimation uncertainty	Consolidation	The continuing impacts of the COVID-19 pandemic may give rise to specific transactions or events that could change a reporting entity's governance rights over other legal entities and thereby affect accounting conclusions for consolidation.			
	20. Subsidiaries 21. Associates 22. Joint ventures					
	13. Discontinued operations 52. Disposal of subsidiary 53. Acquisition of subsidiaries	Acquisitions and disposals  Business combinations  Disposals	In the current circumstances, entities may seek to dispose of certain assets or group of assets as a means to raise funds. In those cases IFRS 5 may apply.			
	58. Retirement benefit plans	Defined benefit plans	The significant economic uncertainty associated with the COVID-19 pandemic may continue to affect specific assumptions in the measurement of defined benefit obligations and plan assets.			
	57. Share-based payments	Share-based payments	Some businesses may cease operations or operate at reduced capacity as a result of the impacts of COVID-19, which could affect the probability that vesting conditions for share-based payments with performance conditions will be met			
			In addition, entities may decide to modify the terms or conditions of an equity-settled award, for example a change in the fair value-based measure, vesting conditions, or classification of the award			
	<ul><li>3. Significant accounting policies</li><li>7. Profit for the year</li><li>59. Deferred income - government grant</li></ul>	Government assistance	In response to the COVID-19 pandemic, governments in many jurisdictions implemented legislation to help entities that are experiencing financial difficulty stemming from the pandemic. An entity should carefully assess whether the benefit received is a government grant or government assistance as this affects the accounting for or disclosure for the benefit.

	4. Critical accounting judgements and key sources of estimation uncertainty	Income tax	Entities should consider how profitability, liquidity and impairment concerns that could result from the ongoing impact of COVID-19 might affect their income tax accounting under IAS 12		
	12. Income Tax		For deferred tax assets, when assessing whether sufficient probable future taxable profits will be available against which a deductible temporary difference can be utilised, entities should ensure the reasonableness of their business plan and its impact on future taxable profits and the consistency of assumptions compared to projections used in other financial statements estimates for elements that should be comparable (e.g. goodwill impairment)		
	3. Significant accounting policies	Breach of covenants	Economic downturn may increase the risk that entities breach financial covenants. This can affect the classification of a liability as current or non-current. In addition, the impending liquidity shortfall might affect an entity's ability to continue as a going concern.		
	32. Borrowings				
	62. Financial Instruments				
	3. Significant accounting policies	Cash and cash equivalents	Entities may need to consider whether investments classified as cash equivalents continue to meet the requirement for such a classification as previously highly liquid investments might no longer meet that condition. Also, for an investment to qualify as a cash equivalent its value must not change significantly, which might no longer be the case given the uncertainties associated with the pandemic.		
	54. Notes to the cash flow statement				
	3. Significant accounting policies	Capitalisation of borrowing costs	If the entity suspends activities related to the construction or production of a qualifying asset for an extended period,		
	32. Borrowings		capitalisation of borrowing costs should also cease until such time as activities are resumed.		
	3. Significant accounting policies	Exchange rates	For practical reasons, it is common for entities that engage in a large number of foreign currency transactions to use a monthly or quarterly rate of exchange to measure those transactions in their accounting records and to disregard day-to-day fluctuations in exchange rates. Entities will need to evaluate if foreign currency transactions should be analysed into shorter periods (e.g. quarterly periods, months or weeks) with an average rate determined for each, or even a date-specific exchange rate.		
	63. Events after the reporting period	Events after the end of the reporting period	It may be challenging for an entity to determine if an event after the end of the reporting period is adjusting or nonadjusting in a global marketplace that is extremely volatile and in which major developments occur daily.		

# Deloitte.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited ("DTTL"), its global network of member firms, and their related entities (collectively, the "Deloitte organisation"). DTTL (also referred to as "Deloitte Global") and each of its member firms and related entities are legally separate and independent entities, which cannot obligate or bind each other in respect of third parties. DTTL and each DTTL member firm and related entity is liable only for its own acts and omissions, and not those of each other. DTTL does not provide services to clients.
