

Summary Comparison of Canadian GAAP and IFRSs as of July 31, 2008

1. This comparison has been prepared by the staff of the Accounting Standards Board (AcSB) and has not been approved by the AcSB. The AcSB has adopted a strategy to replace Canadian standards in the CICA Handbook – Accounting (Handbook) with International Financial Reporting Standards (IFRSs) for publicly accountable enterprises by January 1, 2011. Other enterprises might also elect to adopt IFRSs. The comparison provides a high-level comparison of current Canadian standards and IFRSs and information about the extent of similarity between Canadian GAAP and IFRSs.
2. This comparison covers significant differences only and does not include all of the differences that might arise in a particular entity's circumstances. It should not be used in preparing financial statements. To understand fully the implications of applying, and preparing financial statements in accordance with, IFRSs, users of this comparison and financial statement preparers must refer to the standards themselves. AcSB staff is also maintaining a more detailed comparison for those interested in comparison at a more technical level. It is available on the AcSB's website at www.acsbcanada.org (see "International Activities").
3. IFRSs are based on a conceptual framework that is substantially the same as that on which Canadian standards are based. IFRSs cover many of the same topics and reach similar conclusions on many issues. The style and form of IFRSs are generally quite similar to Canadian standards and considerably more similar than US standards (although there is some variation within all three sets of standards). IFRSs are laid out in the same way as the Handbook Sections, highlight the principles and use similar language. Individual IFRSs and Handbook Sections are of similar length and depth of detail. The complete sets of standards are also similar in length.
4. This comparison is organized primarily according to Handbook Sections and Guidelines, but includes at the end those IFRSs for which there are no Canadian equivalents. The comparison includes EIC Abstracts and the IFRS equivalents only to the extent that a significant issue is covered directly in one set of standards but addressed through an interpretation in the other. The comparisons reflect standards issued as of July 31, 2008. Effective dates may be after July 31, 2008.
5. The IASB, FASB and AcSB have active standard-setting projects in process. In a number of cases, this work in process will eliminate differences that exist today. The comparison identifies this work in process and comments on the extent to which the work in process is expected to eliminate existing differences. For further information on project timetables, see the AcSB staff

paper on [“Which IFRSs Are Expected to Apply for Canadian Changeover in 2011”](#) The comparison also comments on the extent to which entities would be required to (rather than permitted to) make a change to their accounting if IFRSs were to replace Canadian standards. In this regard, the significance of differences indicates whether there is, or is expected to continue to be, a significant conflict between IFRSs and Canadian standards. When there is a significant conflict, it is likely that affected entities would need to change their accounting to comply with IFRSs.

6. The term “converged” has been used in the comparison when related Canadian standards and IFRSs are substantially similar. There will inevitably be differences at a more detailed level, both as a result of different levels of guidance and different ways of expressing similar ideas.
7. A table of concordance at the end of the document lists the IFRSs in numerical order with the Canadian GAAP counterpart(s) noted in the columns to the right.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 1000, Financial Statement Concepts <i>IASB Framework</i> <i>IAS 1, Presentation of Financial Statements</i>	Section 1000 and the IASB Framework are converged, except that: (i) the IASB Framework does not explicitly address not-for-profit organizations; and (ii) the IASB Framework describes concepts of financial and physical capital maintenance without prescribing that a particular concept should apply, whereas Section 1000 specifies that financial statements are prepared with capital maintenance measured in financial terms.	IASB and FASB are undertaking a project to develop a converged conceptual framework. The IASB/FASB project is a long-term project — parts of which will not be complete until after changeover. The AcSB will adopt the converged parts of the IASB Framework at the same time as the IASB.	Slight (indirect effect only).
Section 1100, Generally Accepted Accounting Principles <i>IAS 8, Accounting Policies, Changes in Accounting Estimates and Errors</i>	Section 1100 and the corresponding requirements of IAS 8 are converged .	None.	Slight for some entities.
Section 1300, Differential Reporting	There is no corresponding IFRS . All entities adopting IFRSs apply the standards in full.	AcSB has undertaken a project to develop Canadian financial reporting standards for private enterprises that use the existing Canadian GAAP as a base. IASB has undertaken a separate project to develop IFRSs suitable for private enterprises.	Significant for entities qualifying for differential reporting. ²

¹ The assessment of significance of differences is a judgment made by AcSB staff in general terms. A difference may be significant to a particular transaction or entity depending on its materiality or nature. The AcSB staff assessment takes into account the expected results of work in process.

² The AcSB is developing “made in Canada” financial reporting standards for private enterprises. However, private enterprises are not precluded from adopting IFRSs.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 1400, General Standards of Financial Statement Presentation <i>IAS 1, Presentation of Financial Statements</i>	Section 1400 and the corresponding requirements of IAS 1 are converged, except that IAS 1: <ul style="list-style-type: none"> (i) permits departure from standards if it would be so misleading as to conflict with the objective of financial statements set out in the IASB's Framework and if the relevant regulatory framework for the enterprise permits or requires such a departure; (ii) does not require a statement of retained earnings, but does require a statement of changes in equity; (iii) does not permit comparative information to be omitted in the rare circumstances when it is not meaningful; and (iv) requires a balance sheet for the earliest comparative period when there is retrospective application of an accounting policy that restates or reclassifies items. 	IASB and FASB are undertaking a project on Financial Statement Presentation to improve the presentation of information in and among the individual financial statements. The AcSB will adopt the converged standard at changeover to IFRSs with the same mandatory effective date as the IASB.	Slight — no significant conflicts.
Section 1505, Disclosure of Accounting Policies <i>IAS 1, Presentation of Financial Statements</i>	Section 1505 and the corresponding requirements of IAS 1 are converged, except that IAS 1 requires disclosure of judgments made in the process of applying accounting policies. Some Canadian standards on individual financial statement items require disclosure of assumptions.	None.	Slight — no significant conflicts.
Section 1506, Accounting Changes <i>IAS 8, Accounting Policies, Changes in Accounting Estimates and Errors</i>	Section 1506 and the corresponding requirements of IAS 8 are converged, except that IAS 8 allows an entity to be exempt from the requirement to restate prior periods for the correction of an error on grounds of impracticability.	AcSB decided not to adopt this aspect of IAS 8 in its project to revise Section 1506. The AcSB decided to maintain convergence with US GAAP on this aspect until changeover to IFRSs.	Slight — no significant conflicts.
Section 1508, Measurement Uncertainty <i>IAS 1, Presentation of Financial Statements</i> <i>IAS 37, Provisions, Contingent Liabilities and Contingent Assets</i>	Section 1508 and the corresponding requirements of IAS 1 and IAS 37 are converged, except that IFRSs: <ul style="list-style-type: none"> (i) contain additional disclosure requirements; and (ii) do not allow an exemption from these disclosures, including the recognized amount, based on seriously prejudicial circumstances. 	None.	Only the inability for an entity to avoid disclosure based on seriously prejudicial circumstances might be significant.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 1510, Current Assets and Current Liabilities <i>IAS 1, Presentation of Financial Statements</i>	Section 1510 is less comprehensive than IAS 1 as IAS 1: (i) requires presentation in order of liquidity when such presentation provides information that is reliable and more relevant; and (ii) requires current classification of breached long-term liabilities unless refinancing is complete by the balance sheet date.	IASB and FASB are undertaking a project on Financial Statement Presentation to improve the presentation of information in and among the individual financial statements. The AcSB will adopt the converged standard at changeover to IFRSs, with the same mandatory effective date as the IASB.	Might significantly affect presentation, though only the second difference is a presentation conflict.
Section 1520, Income Statement <i>IAS 1, Presentation of Financial Statements</i>	Section 1520 and the corresponding requirements of IAS 1 are converged, except that Section 1520 provides more specific guidance on the items to be disclosed in the income statement.	IASB and FASB are undertaking a project on Financial Statement Presentation to improve the presentation of information in and among the individual financial statements. The AcSB will adopt the converged standard at changeover to IFRSs, with the same mandatory effective date as the IASB.	Slight — no significant conflicts. Work in process likely to reduce differences further, but also to result in significant change from present requirements and practices.
Section 1530, Comprehensive Income <i>IAS 1, Presentation of Financial Statements</i>	Section 1530 and the corresponding requirements of IAS 1 are converged, except that IAS 1 prohibits the presentation of comprehensive income in the statement of changes in equity.	IASB issued a revised version of IAS 1 in September 2007 in which the possible choices of presentation of comprehensive income are limited compared to those available in accordance with Canadian standards. The AcSB will adopt the revised standard at changeover to IFRSs. (See also Section 1520 above.)	Slight — no significant conflicts.
Section 1535, Capital Disclosures <i>IAS 1, Presentation of Financial Statements</i>	Section 1535 and the corresponding requirements of IAS 1 are converged, except for a scope exception for non-publicly accountable enterprises and not-for-profit organizations.	None.	No conflicts.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 1540, Cash Flow Statements <i>IAS 7, Cash Flow Statements</i>	Section 1540 and IAS 7 are converged, except that IAS 7 does not prohibit the disclosure of cash flow per share amounts.	IASB and FASB are undertaking a project on Financial Statement Presentation to improve the presentation of information in and among the individual financial statements. The AcSB will adopt the converged standard at changeover to IFRSs, with the same mandatory effective date as the IASB.	Slight — no significant conflicts.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 1581, Business Combinations <i>IFRS 3, Business Combinations</i>	Section 1581 differs from IFRS 3 as IFRS 3: (i) accounts for business combinations using the acquisition method, which may result in transactions being recognized as a business combination under IFRS 3 that would not be recognized under Section 1581; (ii) requires the acquisition date to be the date on which the acquirer obtains control over the acquired entity or business; (iii) requires that shares issued as consideration be measured based on their fair value at the acquisition date; (iv) does not require outputs to be part of an integrated set of activities or assets to qualify as a business; (i) requires that contingent consideration be recognized when it can be reliably measured; (v) requires acquisition-related costs, such as finders' fees and legal fees, be expensed; (vi) requires that any gain on a bargain purchase or negative goodwill be recognized immediately in net income; and (vii) requires the acquirer to recognize the acquiree's identifiable assets acquired, liabilities assumed and contingent liabilities, at their fair values at the acquisition date (rather than the acquirer's share only) Any non-controlling interest in the acquiree is measured at the non-controlling interest's portion of the net fair values of those items or of the fair value of the business.	AcSB has approved but not yet issued Section 1582, which will be converged with IFRS 3, and be effective for years beginning on or after January 1, 2011, with early adoption permitted. Enterprises planning a business combination in 2010 are encouraged to adopt Section 1582 to minimize restatements on changeover to IFRSs.	May be significant for entities undertaking business combinations. Differences will be eliminated when the AcSB adopts IFRSs in 2011 but will result in a change from present requirements and practices.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 1590, Subsidiaries <i>IAS 27, Consolidated and Separate Financial Statements</i>	Section 1590 and IAS 27 are converged, except that IAS 27 assesses control at a point in time, whereas Section 1590 assesses control based on an entity's continuing ability to make strategic policy decisions. <i>(See also AcG-15, AcG-18, and SIC-12 below.)</i>	IASB and FASB are undertaking a project on consolidation, which intends to develop a comprehensive definition of control. AcSB will adopt any changes at changeover to IFRSs.	Slight, although the difference would be a conflict in the few cases in which it might occur. Differences expected to be eliminated by work in process but also to result in change from present requirements and practices.
Section 1600, Consolidated Financial Statements <i>IAS 27, Consolidated and Separate Financial Statements</i> <i>IFRS 3, Business Combinations</i>	Section 1600 and IFRS 3 and IAS 27 are converged, except that IFRSs: (i) requires shares owned prior to a change in control on a step acquisition to be valued at their fair value on the date of acquisition and recognizes any gain or loss on those shares in income; (ii) requires the net income and each component of other comprehensive income to be attributed to the owners of the parent and to the non-controlling interests, even if this results in the non-controlling interest having a deficit balance; and (iii) requires non-controlling interests to be stated at their proportion of the net fair value of the acquired net assets, or the fair value of the business, rather than at the subsidiary's carrying amount. <i>(See also Section 1581 above and AcG-18 below.)</i>	IASB and FASB are undertaking a project on consolidation to converge the standards. AcSB will adopt any changes at changeover to IFRSs. AcSB is finalizing new Sections 1601 and 1602 to replace Section 1600 effective for years beginning on or after January 1, 2011, with early adoption permitted.	May be significant for consolidated financial statements of some entities. Differences will be eliminated by work in process but will result in a significant change from present requirements and practices.
Section 1625, Comprehensive Revaluation of Assets and Liabilities	There is no corresponding IFRS .	None.	Could be significant for entities undertaking reorganizations and some business acquisitions.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 1651, Foreign Currency Translation EIC-130, Translation Method When the Reporting Currency Differs from the Measurement Currency or There is a Change in the Reporting Currency <i>IAS 21, The Effects of Changes in Foreign Exchange Rates</i> <i>IAS 29, Financial Reporting in Hyperinflationary Economies</i>	Section 1651 and EIC-130 and IAS 21 are converged, except that IAS 21 requires that non-monetary items measured at fair value be translated at the date when the fair value was determined rather than the balance sheet date. For accounting in highly inflationary environments, IAS 29 is more comprehensive than Section 1651, including providing requirements for restating financial statements to an inflation-adjusted basis before translation.	None.	Differences could be significant depending on an entity's foreign denominated assets. Significant for entities operating in a highly inflationary environment.
Section 1701, Segment Disclosures <i>IFRS 8, Operating Segments</i>	Section 1701 and IFRS 8 are converged, except that: (i) IFRS 8 only applies to listed entities and those in the process of filing; (ii) IFRS 8 requires the disclosure of segment liabilities; and (iii) IFRSs do not recognize extraordinary items.	None.	Slight — no significant conflicts.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 1751, Interim Financial Statements <i>IAS 34, Interim Financial Reporting</i>	Section 1751 and IAS 34 are converged, except that: (i) IAS 34 contemplates providing a condensed set of financial statements; (ii) IAS 34 does not require the presentation of a cash flow statement for the current interim period, only for the cumulative period; (iii) IAS 34 precludes the deferral, in interim periods, of manufacturing cost variances that are expected to be absorbed by year end; and (iv) IAS 34 treats the initial recognition of a previously unrecognized income tax asset as an adjustment to the estimated average annual effective income tax rate used in determining interim period tax expense, rather than as a separate item of the income tax expense.	None.	Slight — no significant conflicts.
Section 1800, Unincorporated Businesses	There is no corresponding IFRS .	IASB issued an Exposure Draft on accounting standards for private entities, which may develop guidance applicable to some such entities.	Significant impact for unincorporated businesses. ³
Section 3000, Cash <i>IAS 1, Presentation of Financial Statements</i>	Section 3000 and the corresponding requirements of IAS 1 are converged .	None.	Slight — no significant conflicts.
Section 3020, Accounts and Notes Receivable <i>IAS 1, Presentation of Financial Statements</i>	Section 3020 and the corresponding requirements of IAS 1 are converged .	None.	Slight — no significant conflicts.
Section 3025, Impaired Loans <i>IAS 39, Financial Instruments: Recognition and Measurement</i>	Section 3025 and related requirements in IAS 39 are converged, except that IAS 39 is more stringent regarding general loan loss allowances.	None.	Significant for entities with large loan portfolios.

³ The AcSB is developing “made in Canada” financial reporting standards for private enterprises. However, private enterprises are not precluded from adopting IFRSs.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3031, Inventories <i>IAS 2, Inventories</i>	<p>Section 3031 and IAS 2 are converged, except that Section 3031</p> <ul style="list-style-type: none"> (i) has different scope exemptions than IAS 2 because of the guidance in IAS 11, Construction Contracts, and IAS 41, Agriculture, that are not addressed in Canadian GAAP; and (ii) requires disclosure of the carrying amount of the inventories of producers of agricultural and forest products, of agricultural produce after harvest, and of minerals and mineral products, to the extent that they are measured at net realizable value in accordance with well-established practices in those industries. <p><i>(See also IAS 41 under “IASB standards that have no Canadian counterpart” below.)</i></p>	None.	Possibly significant for enterprises with inventories of agricultural products or involved with construction contracts.
Section 3040, Prepaid Expenses <i>IAS 1, Presentation of Financial Statements</i>	Section 3040 and the corresponding requirements of IAS 1 are converged .	None.	Slight — no significant conflicts.
Section 3051, Investments <i>IAS 28, Investments in Associates</i> <i>IAS 36, Impairment of Assets</i>	<p>Section 3051 and the corresponding requirements in IAS 28 and IAS 36 are converged, except that IFRSs:</p> <ul style="list-style-type: none"> (i) require an impairment to be recognized when the recoverable amount of an asset is less than the carrying amount, rather than when there is a significant or prolonged decline in value below the carrying amount; (ii) determine the impairment loss as being the excess of the carrying amount above the recoverable amount (the higher of fair value less costs to sell and value in use, calculated as the present value of future cash flows from the asset), rather than the excess of the carrying amount above the undiscounted future cash flows of the asset; and (iii) require the reversal of an impairment loss when the recoverable amount changes. <p><i>(See also AcG-18 below.)</i></p>	Convergence of impairment requirement identified as a possible convergence project. The work on this project is not anticipated to be complete by Canada’s changeover to IFRSs.	Significant difference in impairment requirements.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3055, Interests in Joint Ventures <i>IAS 31, Investments in Joint Ventures</i>	Section 3055 differs from IAS 31 as IAS 31: (i) permits the use of either the proportionate consolidation method or the equity method to account for joint ventures; and (ii) excludes a venturer's interest in a joint venture held by a venture capital organization, mutual fund, unit trust or similar entity.	IASB is undertaking a project to remove the option for accounting for interests in jointly controlled entities using the proportionate consolidation method. AcSB will adopt the revised standard, effective at changeover, with early adoption permitted.	Slight — no significant conflicts, because IFRS provides the option to use proportionate consolidation. However, may be conflicts for venture capital organizations, mutual funds, unit trusts and similar entities. Work in process likely to reduce differences in accounting methods, but also to result in significant change from present requirements if IASB eliminates the proportionate consolidation method.
Section 3061, Property, Plant and Equipment EIC-126, Accounting By Mining Enterprises For Exploration Costs Accounting Guideline AcG-16, Oil and Gas Accounting — Full Cost <i>IAS 16, Property, Plant and Equipment</i> <i>IAS 36, Impairment of Assets</i> <i>IAS 40, Investment Property</i> <i>IFRS 6, Exploration for and Evaluation of Mineral Resources</i>	Section 3061 and IAS 16, IAS 36 and IAS 40 are converged, except that: (i) IAS 16 permits the revaluation of property, plant and equipment to fair value; (ii) IAS 16 requires the depreciable amount to be the asset cost less its residual value, rather than using the greater of the asset cost less its residual value or asset cost less its salvage value; (iii) IAS 36 requires discounting in determining the net recoverable amount of property, plant and equipment; (iv) IAS 40 allows investment property to be accounted for using a fair value or a cost-based model; and (v) IFRS 6 provides limited guidance on the financial reporting for exploration for, and evaluation of, mineral resources.	IASB is undertaking a research project on extractive industries. The work on this project is not anticipated to be complete by Canada's changeover to IFRSs Convergence of impairment requirements identified as possible convergence project. The work on this project is not anticipated to be complete by Canada's changeover to IFRSs.	Significant difference for impairment. Slight for other aspects of cost-based accounting model — no significant conflicts. Extractive industries expected to be addressed by work in process but also to result in significant change from present requirements and practices.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
	<p>Some portions of Section 3061 and all of AcG-16 and EIC-126 are more comprehensive than IAS 16 with respect to mineral resources. Section 3061 does not contain an exemption from applying the GAAP hierarchy to develop accounting policies for exploration and evaluation activities.</p> <p>Some portions of Section 3061 and all of AcG-16 and EIC-126 are more comprehensive than IFRS 6, as IFRS 6 only provides guidance during the exploration and the evaluation of mineral resources up to the point that technical feasibility and commercial viability of extracting is demonstrated. IFRS 6 would permit a form of full cost accounting only during the exploration and evaluation phases, but the full cost accounting model cannot be extended to development and production phases. Accounting during these phases will generally be by analogy to IAS 16 and IAS 36.</p> <p><i>(See also AcG-16 and EIC-126 below.)</i></p>		
<p>Section 3063, Impairment of Long-lived Assets <i>IAS 36, Impairment of Assets</i></p>	<p>Section 3063 differs from IAS 36 as IAS 36:</p> <ul style="list-style-type: none"> (i) does not include a separate “trigger” for recognizing impairment losses based on an assessment of undiscounted cash flows; (ii) determines an impairment loss as the excess of the carrying amount of an asset or group of assets above the recoverable amount (the higher of fair value less costs to sell and value in use), rather than the difference between carrying amount and fair value; and (iii) requires the reversal of an impairment loss when there has been a change in estimates used to determine the recoverable amount. <p><i>(See also Section 3051 above and Section 3064 below.)</i></p>	<p>Convergence of impairment requirements identified as possible convergence project. The work on this project is not anticipated to be complete by Canada’s changeover to IFRSs.</p>	<p>Significant for most entities.</p>

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3064, Goodwill and Intangible Assets <i>IAS 36, Impairment of Assets</i> <i>IAS 38, Intangible Assets</i>	Section 3064 is converged with IAS 38 for the initial recognition and measurement of intangible assets. Also, IAS 38 permits revaluation at fair value for intangible assets that have an active market. Section 3064 and IAS 38 requirements on accounting for goodwill are converged . Section 3064 uses a different model from IAS 36 and IAS 38 for testing impairment. IAS 36: (i) includes identifiable indefinite life intangible assets in the cash-generating unit to which it relates; (ii) might require goodwill impairment assessments to be made below the level of the reporting unit, at the cash generating unit; and (iii) determines an impairment loss as the excess of the carrying amount above the recoverable amount of the cash generating unit to which the goodwill is allocated to, rather than the difference between carrying amount and fair value of the reporting unit's goodwill. <i>(See also Sections 3051 and 3063 above.)</i>	Convergence of impairment requirements identified as possible convergence project. IASB and FASB have identified intangible assets as a possible convergence project. The work on these projects is not anticipated to be complete by Canada's changeover to IFRSs.	Significant for entities with large amount of intangible assets.
Section 3065, Leases <i>IAS 17, Leases</i>	Section 3065 and IAS 17 are converged, except that : (i) IAS 17 uses the term "finance lease" in the same manner as Section 3065 uses "capital lease"; (ii) IAS 17 does not subdivide finance leases into sales-type leases and direct financing leases; and (iii) disclosure requirements differ.	IASB and FASB are undertaking a project on lessee accounting, likely to result in a significantly different accounting model. The AcSB will adopt any changes at changeover to IFRSs, with the same mandatory effective date as the IASB.	Slight — no significant conflicts but work in process likely to result in significant change from present requirements and practices.
Section 3110, Asset Retirement Obligations EIC-159, Conditional Asset Retirement Obligations <i>IAS 37, Provisions, Contingent Liabilities and Contingent Assets</i>	Section 3110 is more comprehensive than the corresponding requirements of IAS 37. Also, IAS 37 requires the use of management's best estimate of the enterprise's cash outflows, rather than fair value measurement on initial recognition, and requires the use of current interest rates in each estimate.	IASB has issued an Exposure Draft proposing amendments to IAS 37. However, the differences noted remain. The AcSB will adopt any changes at changeover to IFRSs.	Significant for entities with large asset retirement obligations.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3210, Long-Term Debt <i>IAS 1, Presentation of Financial Statements</i>	Section 3210 and the corresponding requirements of IAS 1 are converged .	None.	Slight — no significant conflicts.
Section 3240, Share Capital <i>IAS 1, Presentation of Financial Statements</i>	Section 3240 and the corresponding requirements of IAS 1 are converged .	None.	Slight — no significant conflicts.
Section 3251, Equity <i>IAS 1, Presentation of Financial Statements</i>	Section 3251 and the corresponding requirements of IAS 1 are converged .	See Section 1520 above.	Slight — no significant conflicts.
Section 3260, Reserves <i>IAS 1, Presentation of Financial Statements</i>	Section 3260 and the corresponding requirements of IAS 1 are converged .	None.	Slight — no significant conflicts.
Section 3280, Contractual Obligations <i>IAS 1, Presentation of Financial Statements</i> <i>IAS 16, Property, Plant and Equipment</i>	Section 3280 and the corresponding requirements of IAS 1 and IAS 16 are converged .	None.	Slight — no significant conflicts.
Section 3290, Contingencies <i>IAS 37, Provisions, Contingent Liabilities and Contingent Assets</i>	Section 3290 and IAS 37 are converged, except that when a contingency under IAS 37 meets recognition criteria it is treated as a provision, or if it is a debit balance it is recognized as an asset when realization of income is virtually certain. <i>(See also AcG-14 below.)</i>	IASB has issued an Exposure Draft proposing amendments to IAS 37. The AcSB will adopt any changes at changeover to IFRSs.	Slight difference for recognition of assets when income is virtually certain. If the IASB Exposure Draft is adopted, differences could be significant for those affected. Maybe significant for the recording of legal liabilities for both existing GAAP and the proposed amendments.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3400, Revenue EIC-141, Revenue Recognition <i>IAS 11, Construction Contracts</i> <i>IAS 18, Revenue</i> <i>SIC-31, Revenue — Barter Transactions Involving Advertising Services</i> <i>IFRIC-12, Service Concession Arrangements</i>	Recognition criteria in Section 3400 and EIC 141 and IAS 11, IAS 18, SIC-31 and IFRIC-12 are converged , except that: (i) IAS 11 does not allow the completed contract method; (ii) IAS 11 provides more guidance on work in process; (iii) IAS 18 includes measurement standards requiring fair value for consideration received or receivable; (iv) SIC-31 deals with barter transactions involving advertising services specifically; (v) IFRIC-12 provides guidance on recognition and measurement of the obligations and related rights in service concession arrangements; (vi) IFRSs do not provide specific guidance regarding goods with right of return, like EIC 141; and (vii) both sets of standards have application guidance in various other related standards. <i>(See also AcG-2 and AcG-4 below.)</i>	IASB and FASB are undertaking a project on revenue recognition, likely to result in a significantly different accounting model. The AcSB will adopt the converged standard at changeover to IFRSs, with the same mandatory effective date as the IASB.	May be significant for some entities until work in process eliminates differences, but work in process likely to result in significant change from present requirements and practices.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3461, Employee Future Benefits <i>IAS 19, Employee Benefits</i>	Section 3461 and IAS 19 are converged, except that IAS 19: (i) requires plan assets to be measured at fair value for all purposes at all reporting dates; (ii) requires past service costs to be recognized on a straight-line basis over the average period until the amended benefits become vested; (iii) requires multi-employer plans with defined benefit characteristics to be accounted for as defined benefit plans; and (iv) permits a choice of recognizing actuarial gains and losses directly in equity in the period in which they occur, without subsequent recycling to net income.	The IASB has issued a Discussion Paper proposing amendments to pension accounting including proposals to eliminate deferred recognition and smoothing. The AcSB will adopt any changes at changeover to IFRSs, with the same mandatory effective date as the IASB. IASB has issued an Exposure Draft proposing amendments to IAS 37, with complementary adjustments to the termination benefits requirements of IAS 19. The proposals include greater specificity regarding accounting for special involuntary termination benefits. Employee benefits is also identified as a longer-term convergence project.	Significant for enterprises with pension plans.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
<p>Section 3465, Income Taxes <i>IAS 12, Income Taxes</i> <i>SIC-25, Income Taxes — Changes in the Tax Status of an Enterprise or Its Shareholders</i></p>	<p>Section 3465 and IAS 12 are converged on the principle for the recognition and measurement of taxes, but have different exceptions to the principle. Section 3465 differs from IAS 12 as IAS 12:</p> <ul style="list-style-type: none"> (i) continues to allocate to equity any current-year deferred taxes on items that are related to an item charged to equity in a prior year (“backward tracing”); (ii) prohibits recognition of a deferred tax liability if it arises from the initial recognition of specified assets or liabilities in a transaction that is not a business combination and does not affect accounting or taxable income at the time; (iii) requires recognition of a deferred tax liability or asset for temporary differences that arise on translation of non-monetary assets that are remeasured from the local currency to the functional currency using historical rates and result from changes in exchange rates and indexing for tax purposes; (iv) requires recognition of an income tax asset or liability when there is a temporary difference on intercompany transfers of assets; (v) addresses the consequences of a change in tax status of the entity. SIC-25 requires that the effects of such a change be allocated based on its origin; and (vi) requires an estimate of the tax deduction authorities will permit on share-based payment transactions in future years, 	<p>IASB and FASB have commenced a project to converge their standards. The AcSB will adopt the converged standard at changeover to IFRSs.</p>	<p>Significant impact in particular tax situations. Most differences expected to be eliminated by work in process.</p>
<p>Section 3475, Long-Lived Assets and Discontinued Operations <i>IFRS 5, Non-current Assets Held for Sale and Discontinued Operations</i></p>	<p>Section 3475 and IFRS 5 are converged, except that IFRS 5 contains a more restrictive definition of a discontinued operation.</p>	<p>The IASB and FASB have issued an Exposure Draft to converge the definition of discontinued operations. The AcSB will adopt the converged definition on changeover to IFRSs.</p>	<p>May be significant for discontinued operations that would not qualify under the more restrictive definition in IFRS 5.</p>

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3480, Extraordinary Items <i>IAS 1, Presentation of Financial Statements</i>	Section 3480 differs from IAS 1 as IAS 1 does not allow separate presentation of extraordinary items.	IASB and FASB are undertaking a project on Financial Statement Presentation to improve the presentation of information in and among the individual financial statements. The AcSB will adopt the converged standard at changeover to IFRSs, with the same mandatory effective date as the IASB.	Significant in limited circumstances — could affect net income, but not likely to require new information to be determined.
Section 3500, Earnings per Share <i>IAS 33, Earnings per Share</i>	Section 3500 and IAS 33 are converged, except that IAS 33: (i) does not require presentation of earnings per share for income or loss before discontinued operations and extraordinary items; and (ii) does not allow rebuttal of the presumption of share settlement treatment on contracts that may be settled in shares or cash, based on past experience of contract settlements.	IASB issued an Exposure Draft proposing to amend IAS 33. The AcSB will adopt the amendments proposed to be effective at the same time as required by the IASB.	Slight — conflict only in limited fact situations. Difference causing conflict expected to be eliminated by work in process but work in process likely to result in change from present requirements and practices.
Section 3610, Capital Transactions	There is no corresponding IFRS .	None.	Slight — no significant conflicts.
Section 3800, Government Assistance <i>IAS 20, Accounting for Government Grants and Disclosure of Government Assistance</i> <i>SIC-10, Government Assistance — No Specific Relation to Operating Activities</i>	Section 3800, IAS 20 and SIC-10 are converged, except that IAS 20: (i) permits, and provides guidance on, the recognition of non-monetary government grants at zero; and (ii) provides guidance on biological assets.	IASB has deferred consideration of changes to IAS 20 to address accounting for government grants using a fair value model until further work is completed on IAS 37 and IAS 41.	Significant for entities with particular types of government grants.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3805, Investment Tax Credits	There is no corresponding IFRS . IAS 12, <i>Income Taxes</i> , and IAS 20, <i>Accounting for Government Grants and Disclosures of Government Assistance</i> , specifically scope out investment tax credits.	None.	May be significant for enterprises with certain types of investment tax credits.
Section 3820, Subsequent Events <i>IAS 10, Events After the Reporting Date</i>	Section 3820 and IAS 10 are converged, except that IAS 10: (i) requires reporting of subsequent events to the date of authorization for issue of financial statements; and (ii) requires disclosure of the date of authorization for issue and who gave that authorization.	None.	Slight — no significant conflicts, but additional work may be necessary, resulting from longer reporting period.
Section 3831, Non-Monetary Transactions <i>IAS 16, Property, Plant and Equipment</i> <i>IAS 38, Intangible Assets</i> <i>IAS 40, Investment Property</i> <i>SIC-31, Revenue — Barter Transactions Involving Advertising Services</i>	Section 3831 is more comprehensive than IAS 16, IAS 38 and IAS 40 as Section 3831 applies to a broader range of non-monetary transactions. Sections 3400 and 3831 provide less comprehensive guidance than SIC-31 on barter transactions involving advertising services.	None.	Significant for certain non-monetary transactions. Barter transaction difference could be significant for entities that barter advertising services.
Section 3840, Related Party Transactions <i>IAS 24, Related Party Transactions</i>	Section 3840 differs from IAS 24 as IAS 24 does not contain requirements for measuring related party transactions or guidance on the resulting treatment of any gains and losses. Also, IAS 24 does not exclude from its scope management compensation arrangements, expense allowances and similar payments to individuals in the normal course of operations. Section 3840 and IAS 24 disclosure requirements are converged .	The IASB issued a Re-exposure Draft that amends IAS 24 to address disclosure of transactions by state-controlled entities and transactions between a subsidiary of a significant investor of an associate and the associate. The AcSB will adopt the revised standard at changeover to IFRSs.	Slight — no significant conflicts, except in specific circumstances. Additional disclosures by non-public companies ⁴ for management compensation arrangements and similar matters could be significant.

⁴ Securities regulations presently require this information for public companies.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3841, Economic Dependence	There is no corresponding IFRS .	None.	Slight — no significant conflicts.
Section 3850, Interest Capitalized — Disclosure Considerations <i>IAS 23, Borrowing Costs</i>	Section 3850 differs from IAS 23 as IAS 23 does not allow the expensing of borrowing costs, to the extent they are directly attributable to acquisition, production and construction of a qualifying asset. IAS 23 also includes guidance on how to determine the amount of borrowing costs eligible for capitalization.	None.	Significant for entities whose accounting policy is to expense borrowing costs.
Section 3855, Financial Instruments — Recognition and Measurement <i>IAS 39, Financial Instruments: Recognition and Measurement</i>	Section 3855 and IAS 39 are converged, except that IAS 39: (i) restricts the circumstances in which the option to measure a financial instrument at fair value through profit or loss is available; (ii) requires quoted loans to be measured at fair value through profit or loss, whereas Section 3855 classifies these as loans and receivables and accounts for them at amortized cost (other than debt securities, which may be classified as held for trading, held to maturity or available for sale); (iii) requires all available-for-sale financial assets to be measured at fair value unless fair value is not reliably determinable, whereas Section 3855 requires non-quoted equity instruments classified as available for sale to be measured at cost; (iv) requires foreign exchange gains and losses on available-for-sale financial assets to be recognized immediately in net income; (v) does not allow a choice of accounting policy for transaction costs; (vi) does not address financial instruments exchanged or issued in related party transactions; (vii) requires reversal of impairment losses in some circumstances; and (viii) has no scope exceptions for non-publicly accountable enterprises and not-for-profit organizations.	In the long term, IASB and FASB are considering improvements to their standards on financial instruments. The AcSB will adopt any improvements on changeover to IFRSs, or at such later date as the IASB might make changes.	Significant for some entities with particular fact situations.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
<p>Section 3861, Financial Instruments — Disclosure and Presentation</p> <p><i>IAS 32, Financial Instruments: Presentation</i></p> <p><i>IFRS 7, Financial Instruments: Disclosures</i></p> <p>Section 3861 can be applied only to insurance contracts by entities choosing not to apply the disclosures required in Section 3862.</p>	<p>The presentation requirements of Section 3861 and IAS 32 are converged, except that IAS 32:</p> <ul style="list-style-type: none"> (i) does not apply to insurance contracts (however, IFRS 4 requires disclosures similar to those specified in IAS 32); (ii) addresses the presentation of derivatives on an entity's own equity; (iii) does not allow for initial measurement of a compound financial instrument using the relative fair value method; and (iv) has no scope exceptions for non-publicly accountable enterprises and not-for-profit organizations. <p>The disclosure requirements of IFRS 7 are generally more comprehensive than Section 3861 as IFRS 7:</p> <ul style="list-style-type: none"> (i) requires only that entities disclose information that enables users of their financial statements to evaluate the significance of financial instruments, rather than specific contractual terms and conditions of financial instruments; (ii) requires disclosures about financial instruments classified into (as well as out of) a fair value classification; (iii) requires more specific disclosures about collateral; (iv) requires disclosure of the existence of multiple embedded derivatives whose values are interdependent, when these are contained in an instrument having both a liability and an equity component; (v) does not encourage (or require) disclosures about average aggregate carrying amounts during the year, average aggregate principal during the year, or aggregate fair value during the year; (vi) requires disclosure of the disposition of any inception profit that might result from the use of a valuation technique used to measure a financial instrument that has no active market price; (vii) requires extensive disclosures about exposures to liquidity, currency and other price risks; and (viii) requires an analysis of the sensitivity of net income to possible changes in market risk factors. 	<p>The IASB has approved a project on liabilities and equity.. The AcSB will adopt any revisions to the standard at changeover to IFRSs, with the same mandatory effective date as the IASB.</p>	<p>Significant effect on presentation and disclosure of certain financial instruments for entities choosing not to apply the disclosures required in Section 3862 to insurance contracts.</p> <p><i>(See also Section 3862.)</i></p>

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3862, Financial Instruments — Disclosure <i>IFRS 7, Financial Instruments: Disclosures</i>	The disclosure requirements of Section 3862 and IFRS 7 are converged, except that IFRS 7: (i) does not apply to insurance contracts, however IFRS 4 requires the disclosure as specified in IFRS 7; (ii) does apply to partially derecognized assets; (iii) requires disclosure of any remedy or renegotiation on the terms of a loan in default obtained prior to the financial statements being “authorized for issue” versus “completed”; and (iv) requires less specific disclosures about hedging transactions.	IASB and AcSB have issued corresponding Exposure Drafts proposing to improve disclosures about fair value measurements and liquidity risks.	Slight — no significant conflicts
Section 3863, Financial Instruments — Presentation <i>IAS 32, Financial Instruments: Presentation</i>	The presentation requirements of Section 3863 and IAS 32 are converged, except that IAS 32: (i) does not apply to insurance contracts; (ii) addresses the presentation of derivatives on an entity’s own equity; and (iii) does not allow for initial measurement of a compound financial instrument using the relative fair value method.	The IASB and FASB are undertaking a project on liabilities and equity. The AcSB will adopt any revisions to the standard at changeover to IFRSs, with the same mandatory effective date as the IASB.	Slight — no significant conflicts. Differences (i) and (iii) are expected to be eliminated by work in process, but work in process likely to result in change from present requirements and practices.
Section 3865, Hedges <i>IAS 39, Financial Instruments: Recognition and Measurement</i>	Section 3865 and IAS 39 are converged, except that IAS 39 permits fair value hedge accounting for a portfolio hedge of interest rate risk.	In the long term, IASB and FASB are considering improvements to their standards on financial instruments. The AcSB will adopt any improvements at changeover to IFRSs, or at such later date as the IASB might make changes.	Slight — no significant conflicts (hedge accounting is optional).

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 3870, Stock-based Compensation and Other Stock-based Payments <i>IFRS 2, Share-based Payments</i>	Section 3870 and IFRS 2 are converged, except that IFRS 2: <ul style="list-style-type: none"> (i) does not provide an exemption for the recognition of an expense when an employee share purchase plan provides a discount to employees that does not exceed the per-share amount of share issuance costs that would have been incurred to raise a significant amount of capital by a public offering and is not extended to other holders of the same class of shares; (ii) defaults to using the fair value of the non-tradeable equity instruments granted if the value of received goods or non-employee service is not reliably measurable; (iii) requires that share-based payments to non-employees be measured at the date the entity obtains the goods or the counterparty renders service; (iv) requires cash-settled share-based payments are measured at the fair value of the liability not intrinsic value; (v) requires the transaction to be accounted for as a cash-settled transaction if the entity has incurred a liability to settle in cash or other assets, or as an equity-settled transaction if no such liability has been incurred; and (vi) is more detailed about how to deal with a modification of an award. 	IASB has issued an Exposure Draft clarifying that when an entity receives goods and services from its suppliers it must apply IFRS 2 even though it has no obligation to make the required stock-based payment. The AcSB will adopt any revisions to the standard at changeover to IFRSs.	Significant impact for certain share-based payment arrangements.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 4100, Pension Plans <i>IAS 26, Accounting and Reporting by Retirement Benefit Plans</i>	Section 4100 differs from IAS 26 as IAS 26: (i) does not require a statement of changes in net assets available for benefits; (ii) does not require information on pension obligations be included in the statements of a defined contribution plan; and (iii) permits the actuarial valuation with or without salary projection and without prorating the effect.	The AcSB agreed that on adoption of IFRSs, GAAP financial statements for pension plans should continue to be prepared in accordance with Section 4100, rather than IAS 26. The AcSB plans to review Section 4100 as well as the two EIC Abstracts with issues related to pension plans (i.e., EIC-116, Pension Plans — Disclosure Requirements for Income from Investments in Segregated Funds, and EIC-168, Accounting by Pension Plans for Transaction Costs), to determine if any modifications will be required as a result of adopting IFRSs.	Slight — no significant conflicts.
Section 4211, Life Insurance Enterprises — Specific Items <i>IFRS 4, Insurance Contracts</i> <i>IAS 36, Impairment of Assets</i> <i>IAS 40, Investment Property</i>	Section 4211 differs from IFRS 4, IAS 36 and IAS 40 as IFRSs: (i) provide limited guidance; (ii) do not address actuarial liabilities, reinsurance and retrocession, segregated accounts and income and distributions; (iii) do not permit presentation of discretionary participation features separately from liabilities and equity; and (iv) permit investment property to be measured at fair value versus the moving average market value method. <i>(See also Section 3051 above for differences regarding impairment testing and AcG-3, AcG-8 and AcG-9 below.)</i>	IASB is undertaking a project to introduce new requirements for insurance contracts. FASB has joined the project. The AcSB will adopt any revisions to the standard at changeover to IFRSs, with the same mandatory effective date as the IASB.	Significant for life insurance enterprises in limited areas. Differences expected to be eliminated by work in process but work in process likely to result in change from present requirements and practices.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Section 4250, Future-Oriented Financial Information	There is no corresponding IFRS .	None.	Slight — no significant conflicts.
Sections 4400-4460, Not-for-Profit Organizations	There are no corresponding IFRSs .	AcSB Not-for-Profit Advisory Committee will issue an Invitation to Comment regarding the strategy for not-for-profit organizations.	Significant in certain circumstances. ⁵
Accounting Guideline AcG-2, Franchise Fee Revenue <i>IAS 18, Revenue</i>	AcG-2 is more comprehensive than IAS 18.	See Section 3400 above.	Slight — no significant conflicts.
Accounting Guideline AcG-3, Financial Reporting by Property and Casualty Companies <i>IFRS 4, Insurance Contracts</i>	AcG-3 differs from IFRS 4 as IFRS 4 contains only limited requirements.	See Section 4211 above.	Significant for property and casualty companies in limited areas. Differences expected to be eliminated by work in process but work in process likely to result in change from present requirements and practices.
Accounting Guideline AcG-4, Fees and Costs Associated with Lending Activities <i>IAS 18, Revenue</i>	AcG-4 is more comprehensive than IAS 18.	See Section 3400 above.	Slight — no significant conflicts.
Accounting Guideline AcG-7, The Management Report	There is no corresponding IFRS .	None.	Slight — no significant conflicts.

⁵ The AcSB's Strategic Plan proposes that not-for-profit organizations (NFPOs) continue to apply those elements of GAAP for profit-oriented enterprises that are applicable to them. In adopting IFRSs, however, further decisions are required to determine if this should apply to all NFPOs.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Accounting Guideline AcG-8, Actuarial Liabilities of Life Insurance Enterprises — Disclosure <i>IAS 32, Financial Instruments: Presentation</i> <i>IFRS 4, Insurance Contracts</i>	AcG-8 is more comprehensive than IAS 32 and IFRS 4 as AcG-8 provides additional guidance as to how the requirements of Sections 1508 and 3861 are to be applied to actuarial liabilities.	See Section 4211 above.	Significant for life insurance enterprises in limited areas. Differences expected to be eliminated by work in process but work in process likely to result in change from present requirements and practices.
Accounting Guideline AcG-9, Financial Reporting by Life Insurance Enterprises <i>IFRS 4, Insurance Contracts</i>	AcG-9 differs from IFRS 4 as IFRS 4 contains only limited requirements.	See Section 4211 above.	Significant for life insurance enterprises in limited areas. Differences expected to be eliminated by work in process but work in process likely to result in change from present requirements and practices.
Accounting Guideline AcG-11, Enterprises in the Development Stage <i>IAS 38, Intangible Assets</i>	AcG-11 is converged with IAS 38	None.	No conflicts
Accounting Guideline AcG-12, Transfers of Receivables <i>IAS 39, Financial Instruments: Recognition and Measurement</i>	AcG-12 differs from IAS 39 as IAS 39: (i) addresses the derecognition of other financial instruments, such as securities lending transactions or sale and repurchase agreements; and (ii) does not focus on legal isolation, but on risks and rewards of ownership.	IASB is undertaking a project to consider improvements to their standards on derecognition. The AcSB will adopt any revised standards at changeover to IFRSs.	Significant for entities undertaking securitization and similar transactions.
Accounting Guideline AcG-14, Disclosure of Guarantees <i>IAS 37, Provisions, Contingent Liabilities and Contingent Assets</i> <i>IAS 39, Financial Instruments: Recognition and Measurement</i>	AcG-14 differs from IAS 37 as: (i) IAS 37 addresses recognition and measurement requirements for non-financial guarantees, as well as disclosure; and (ii) IAS 37 addresses subsequent measurement more extensively than Section 3290.	IASB has issued an Exposure Draft amending aspects of IAS 37 (see Section 3290 above). The proposed changes will not eliminate the differences with AcG-14.	Significant for subsequent measurement of guarantees.

Canadian standards <i>IASB equivalents</i>	Comparison of accounting treatments	Work in process	Significance of differences ¹
Accounting Guideline AcG-15, Variable Interest Entities <i>SIC-12, Consolidation — Special Purpose Entities</i>	AcG-15 differs from SIC-12 as SIC-12: (i) does not deal with variable interest entities (VIEs) in the same manner, and relies on the general principles of consolidation; and (ii) is less detailed. However, both rely on similar underlying principles.	IASB and FASB have commenced a joint project on consolidation, which is considering accounting for VIEs. The AcSB will adopt the converged standard at changeover to IFRSs	Significant for some interests in VIEs.
Accounting Guideline AcG-16, Oil and Gas Accounting — Full Cost EIC-126, Accounting By Mining Enterprises For Exploration Costs <i>IAS 16, Property, Plant and Equipment</i> <i>IAS 36, Impairment of Assets</i> <i>IFRS 6, Exploration for and Evaluation of Mineral Resources</i>	All of AcG-16, EIC-126 and certain portions of Section 3061 are more comprehensive than IFRS 6 as IFRS 6 only provides guidance during the exploration and the evaluation of mineral resources up to the point that technical feasibility and commercial viability of extracting is demonstrated. IFRS 6 would permit a form of full cost accounting only during the exploration and evaluation phases, but the full cost accounting model cannot be extended to the development and production phases. Accounting during these phases will generally be by analogy to IAS 16 and IAS 36.	IASB is undertaking a research project on extractive industries. . The work on this project is not anticipated to be complete by Canada's changeover to IFRSs.	Might be significant conflict for enterprises currently using full cost accounting in the development and production phases. Differences expected to be eliminated by work in process, but work in process likely to result in change from present requirements and practices.
Accounting Guideline AcG-18, Investment Companies <i>IAS 27, Consolidated and Separate Financial Statements</i> <i>IAS 28, Investments in Associate</i> <i>IAS 39, Financial Instruments and Measurement</i>	AcG-18 differs from IFRSs as IFRSs do not contain any special treatments for accounting for investments by investment companies and for investment companies by its parent or equity method investor. The fair value treatment under AcG-18 differs from the consolidation method required by IAS 27 for subsidiaries and the equity method required by IAS 28 for associates subject to significant influence.	IASB and FASB are undertaking a project on consolidation. The AcSB will adopt the converged standard at changeover to IFRSs.	Significant for investments of an investment company. Differences on how to consolidate expected to be eliminated by work in process.
Accounting Guideline AcG-19, Disclosures by Entities Subject to Rate Regulation	There is no corresponding IFRS .	None.	Slight for affected entities, as disclosure only.

IASB standards that have no Canadian counterpart

IASB Standard	Differences	Work in Process	Significance of differences ⁶
IFRS 1, First-time Adoption of International Financial Reporting Standards	There is no Canadian standard providing exceptions to the normal basis of application when a new basis of accounting is applied for the first time. The usual requirements for changes in accounting policies would apply (see Section 1100 and Section 1506 above).	IASB has issued an Exposure Draft proposing amendments to IFRS 1 to assist enterprises recording oil and gas assets using full cost accounting and operations subject to rate regulation. The AcSB will adopt any changes at changeover to IFRSs.	Significant on first-time adoption of IFRSs.
IAS 37, Provisions, Contingent Liabilities and Contingent Assets	IAS 37 requires a best estimate of the obligation or when there is a large population of items an expected value method should be applied in measuring liability provisions. If the time value of money is material, then discounting should be applied. Canadian standards dealing with “provisions” are limited to the application of the definition of a liability in Section 1000.	IASB has issued an Exposure Draft proposing amendments to IAS 37. The AcSB will adopt any changes at changeover to IFRSs.	Slight — no significant conflicts.
IAS 41, Agriculture	IAS 41 provides specific guidance in dealing with agriculture. For example, IAS 41 requires that biological assets, as defined, be measured at fair value less estimated point-of-sale costs.		Significant differences for entities with agricultural operations.

⁶ The assessment of significance or differences is a judgment made by AcSB staff in general terms. A difference may be significant to a particular transaction or entity depending on its materiality or nature. The assessment takes into account the expected results of work in process.

The following table of concordance relates each International Financial Reporting Standard and Interpretation issued as of July 31, 2008 to corresponding material in the CICA Handbook – Accounting. Material no longer effective as of July 31, 2008, and hence to be withdrawn, is not included,
