

Accounting Alert

Quarterly update – For-profit entities

Connect to what's new in financial reporting for September 2022

This quarterly update includes a high-level overview of new and revised financial reporting requirements that need to be considered by for-profit entities for annual and interim financial reporting periods ending on 30 September 2022. Information is also included for June 2022 year-ends for entities who are still finalising their financial statements. [➤](#)

Financial reporting standards update

Two new financial reporting amendments are effective for financial years ending 30 September 2022 including the extension of the Covid-19 rent concessions, and **phase 2 of the Interest Rate Benchmark Reform (IBOR)**. All entities will need to assess the impact of the new amendments and ensure that relevant policies and functionalities are in place to implement the changes. There are also several new financial reporting amendments that will apply to interim periods ending 30 September 2022, including a clarification on the measurement of onerous contracts and the 2018-2020 Annual Improvements to IFRS Standards, which are outlined at [Appendix B](#).

NZ IFRS 17 Insurance Contracts which applies to insurance contracts issued is a new standard on the horizon, which entities may wish to consider for early adoption.

All Tier 1 entities (applying full NZ IFRS) who are yet to adopt standards and amendments that are approved but not yet effective need to consider appropriate disclosure in their annual financial statements.

Importance of disclosures

Judgement will be required to determine what additional disclosure is appropriate to explain the impact of changes the new standards and amendments introduce to the financial statements.

Our model financial statements for Tier 1 and Tier 2 for-profit New Zealand reporting entities identify areas that could be affected by Covid-19 or by emerging risks such as climate change by adding symbols to indicate where disclosures might need to be adapted to explain **how the entity's financial performance or financial position**

has been impacted by Covid-19 or climate change. The model financial statements can be found [here](#).

Climate disclosures

Financial statement preparers must consider the accounting implications of climate change as well as the appropriate disclosures to include in the entity's financial statements. See [Page 13](#) for information about reflecting climate risk in financial statements.

The IFRS Interpretations Committee (IFRIC®) has published two agenda decisions clarifying how arrangements in respect of a specific part of cloud technology, **Software-as-a-Service** should be accounted for by the customers. Refer to our accounting alert [here](#) for a detailed discussion on these agenda decisions. Entities should ensure that proper

processes are in place to capture the information required to appropriately account for any new SaaS arrangements. The IFRS

Interpretations Committee has also recently issued an [agenda decision](#) to assist software resellers in determining whether they are a principal or an agent in the transaction for the purposes of applying IFRS 15 *Revenue from Contracts with Customers*.

The New Zealand Accounting Standards Framework

The Accounting Standards Framework is a two sector (for-profit and public benefit entities (PBE)), multi-tiered Framework. This approach has been adopted to meet the differing information needs of each sector's users of financial statements. The for-profit entity framework is based on International Financial Reporting Standards (IFRS).

XRB A1 *Application of the Accounting Standards Framework* (XRB A1) sets out the tiers for reporting, the standards that apply to each tier and the requirements for transitioning between tiers. Each reporting period, entities should consider whether there have been any changes to the business that would result in a change in reporting or audit requirements. These could include:

- Changes in ownership (such as an increase in the number of shareholders or proportion of overseas ownership)
- Increases in revenue or assets through growth, business combinations or capital raises.

You may find our framework publication, **'The New Zealand financial reporting landscape'** useful. This publication provides a summary of the legislative and accounting standards requirements for New Zealand entities and is available: [here](#).

Covid-19 disclosures

Entities should consider relevant disclosures in relation to the impact of the Government's responses to the delta and omicron variant outbreaks on their respective businesses. Refer to [page 12](#) of this publication for Covid-19 related resources.

For-profit entities: What are the new and revised accounting pronouncements for September 2022?

As occurs so often with changes in accounting standards and financial reporting requirements, some of the new or revised pronouncements may have a substantial impact on particular entities. Therefore, it is important that the pronouncements listed below are carefully reviewed for any potential impacts or opportunities.

The tables below and overleaf outline the new and revised pronouncements that are either to be applied for the first time for a 30 September 2022 annual or interim reporting period, or which may be early adopted at that date¹. The footnotes distinguish between mandatory initial application, and pronouncements which were also mandatory in a previous period. We have also included links to relevant Deloitte publications which provide further detail, where appropriate.

In the majority of cases, the disclosure requirements of the individual pronouncements listed in the tables below would not be applicable to half-year financial reports; however, the recognition and measurement requirements would be applied where those pronouncements have been adopted by the entity.

In addition, disclosure of the application of new and revised accounting pronouncements needs to be carefully considered, along with the impact of those that are approved but not yet effective. We have outlined some considerations in respect of these in [Appendix A](#).

The information below was updated on 12 September 2022 for developments to that date. Further information on each pronouncement can be found in the next section.

Impact of each new and revised pronouncement

The following tables set out information on the impact of the recent new pronouncements (see key on pages 3 and 4).

New pronouncement	Effective date*	Year ending		Interim ending
		Jun 2022	Sept 2022	Sept 2022
Interest Rate Benchmark Reform – Phase 2 (Amendments to NZ IFRS 9, NZ IAS 39, NZ IFRS 7, NZ IFRS 4 and NZ IFRS 16)	1 Jan 2021	M	M	M ²
This is the second part of the two-phase project on interest rate benchmark reform undertaken by the IASB. These amendments enable entities to reflect the effects of transitioning from benchmark interest rates, such as interbank offer rates (IBORs) to alternative benchmark interest rates without giving rise to accounting impacts that would not provide useful information to users of financial statements. The amendments affect many entities and in particular those with financial assets, financial liabilities or lease liabilities that are subject to interest rate benchmark reform and those that apply the hedge accounting requirements in NZ IFRS 9 or NZ IAS 39 to hedging relationships that are affected by the reform. The amendments apply to all entities and are not optional. Entities should apply the amendments retrospectively and reinstate the hedge relationships that were discontinued solely due to changes directly required by the reform. Early application is permitted.	 IFRS in Focus Newsletter			
Covid-19-Related Rent Concessions beyond 30 June 2021 (Amendment to NZ IFRS 16)	1 Apr 2021	M	M	M ²
In June 2020 the NZASB issued an amendment to NZ IFRS 16 providing lessees with an exemption from assessing whether a Covid-19 related rent concession is a lease modification if all the following conditions were met: - the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change; - any reduction in lease payments affects only payments originally due on or before 30 June 2021; and - there is no substantive change to other terms and conditions of the lease. Due to the ongoing nature of the pandemic, the NZASB has extended the practical expedient to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2022 (rather than only payments due on or before 30 June 2021). Lessees that elect to apply the practical expedient are required to account for Covid-19 related rent concessions as if they are not lease modifications and to apply the expedient retrospectively, recognising the cumulative effect of applying the amendment as an adjustment to the opening retained earnings (or other component of equity, as appropriate) at the beginning of the annual reporting period in which the lessee first applies the amendment. In addition, disclosures are also required as to whether the practical expedient has been applied to all eligible contracts, or, if not, information about the nature of the contracts to which the practical expedient has been applied. The amount recognised in profit or loss arising from the concessions to which the practical expedient has been applied must also be disclosed	 IFRS in Focus Newsletter			

New pronouncement	Effective date*	Year ending		Interim ending
		Jun 2022	Sept 2022	Sept 2022
<i>Property, Plant and Equipment – Proceeds before Intended Use (Amendments to NZ IAS 16)</i>	1 Jan 2022	O	O	M
The amendments prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced before that asset is available for use, i.e. proceeds while bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Consequently, the sales proceeds and related costs should be recognised in the profit or loss. Disclosures are required for the amounts of the proceeds and cost included in the profit or loss that relate to items produced that are not outputs of an entity's ordinary activities (if not presented separately), including which line item(s) in the statement of comprehensive income include such proceeds and cost. The amendments also clarify that 'testing whether an asset is functioning properly' means assessing whether the technical and physical performance of the asset is such that it is capable of being used in the production or supply of goods or services, for rental to others, or for administrative purposes. Entities should apply the amendments retrospectively but only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the beginning of the earliest period presented in the financial statements. Early application is permitted.	 IFRS in Focus Newsletter			
<i>Annual Improvements to NZ IFRS Standards 2018-2020</i>	1 Jan 2022	O	O	M
These amendments include the following: • Subsidiary as a first-time adopter (Amendment to NZ IFRS 1) • Fees in the '10 per cent' test for derecognition of financial liabilities (NZ IFRS 9) • Lease incentives (Amendment to NZ IFRS 16) • Taxation in fair value measurements (NZ IAS 41 <i>Agriculture</i>) The amendments are discussed in detail in Appendix B.	 IFRS in Focus Newsletter			
<i>Reference to the Conceptual Framework (Amendments to NZ IFRS 3)</i>	1 Jan 2022	O	O	M
These amendments include: • Updating NZ IFRS 3 <i>Business Combinations</i> so that it refers to the 2018 Conceptual Framework instead of the 1989 Framework; • Adding a requirement that, for transactions and other events within the scope of NZ IAS 37 <i>Provisions, Contingent Liabilities and Contingent Assets</i> or NZ IFRIC 21 <i>Leases</i>, an acquirer applies NZ IAS 37 or NZ IFRIC 21 (instead of the Conceptual Framework) to identify the liabilities it has assumed in a business combination; and • Adding an explicit statement that an acquirer does not recognise contingent assets acquired in a business combination. Early application is permitted if the entity also applies all other updated references at the same time or earlier.	 IFRS in Focus Newsletter			

New pronouncement	Effective date*	Year ending		Interim ending
		Jun 2022	Sept 2022	Sept 2022
<i>Onerous Contracts – Cost of Fulfilling a Contract (Amendments to NZ IAS 37)</i>	1 Jan 2022	O	O	M
The amendments have clarified that the cost of fulfilling a contract comprises the ‘costs that relate directly to the contract’ which are both: - incremental costs of fulfilling the contract (e.g. direct materials and labour); and - an allocation of other costs that relate directly to fulfilling contracts (e.g. overheads such as allocation of depreciation expense on an item of property, plant and equipment used in fulfilling the contract). Entities should apply the amendments to contracts for which the entity has not yet fulfilled all its obligation at the beginning of the annual reporting period in which the entity applies the amendments. Restatement of comparatives is not allowed. Early application is permitted.	 IFRS in Focus Newsletter			
<i>Classification of Liabilities as Current or Non-current (Amendments to NZ IAS 1)</i>	1 Jan 2023	O	O	O
The amendments to NZ IAS 1: - clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period. - specify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability. - explain that rights are in existence if covenants are complied with at the end of the reporting period. - introduce a definition of ‘settlement’ to make clear that settlement refers to the transfer to the counterparty of cash, equity instruments, other assets or services. The amendments issued affect only the presentation of liabilities as current or non-current in the statement of financial position. These are to be applied retrospectively. On 13 August 2020, the NZASB approved the deferral of the effective date by one year from 1 January 2022 to 1 January 2023. Earlier application is permitted. In November 2021, the IASB published exposure draft ‘Non-current Liabilities with Covenants (Proposed amendments to IAS 1)’ to clarify how conditions with which an entity must comply within twelve months after the reporting period affect the classification of a liability. The exposure draft also proposes to defer the effective date of the above amendments to no earlier than 1 January 2024.	 IFRS in Focus Newsletter			

New pronouncement	Effective date*	Year ending		Interim ending
		Jun 2022	Sept 2022	Sept 2022
NZ IFRS 17 Insurance Contracts	1 Jan 2023	0	0	0
NZ IFRS 17 Insurance Contracts has been issued to replace NZ IFRS 4. The scope of NZ IFRS 17 differs from NZ IFRS 4 because it introduces: - a requirement that in order to apply the insurance standard to investment contracts with discretionary participation features, an entity has to also issue insurance contracts; and - an option to apply NZ IFRS 15 <i>Revenue from Contracts with Customers</i> to fixed-fee contracts, provided certain criteria are met. NZ IFRS 17 requires entities to identify portfolios of insurance contracts which are subject to similar risks and managed together. Each portfolio shall be divided into a minimum of three groups: - a group of contracts that are onerous at initial recognition, if any; - a group of contracts that at initial recognition have no significant possibility of becoming onerous subsequently, if any; and - a group of the remaining contracts in the portfolio, if any. An entity is not permitted to include contracts issued more than one year apart in the same group. Furthermore, if a portfolio would fall into different groups only because law or regulation constrains the entity's practical ability to set a different price or level of benefits for policyholders with different characteristics, the entity may include those contracts in the same group. The standard measures insurance contracts either under the general model or a simplified version of this called the <i>Premium Allocation Approach</i>. The general model is defined such that at initial recognition an entity shall measure a group of contracts at the total of: - the amount of fulfilment cash flows ("FCF"), which comprise probability-weighted estimates of future cash flows, an adjustment to reflect the time value of money ("TVM") and the financial risks associated with those future cash flows and a risk adjustment for non-financial risk; and - the contractual service margin ("CSM"). On subsequent measurement, the carrying amount shall be the sum of the liability for remaining coverage and the liability for incurred claims. The liability for remaining coverage comprises the FCF related to future services and the CSM of the group at that date. The liability for incurred claims is measured as the FCF related to past services allocated to the group at that date. An entity may simplify the measurement of the liability for remaining coverage of a group of insurance contracts using the <i>premium allocation approach</i> on the condition that, at initial recognition, the entity reasonably expects that doing so would produce a reasonable approximation of the general model, or the coverage period of each contract in the group is one year or less. The new Standard may also result in changes to presentation in the statement of financial performance.		IFRS in Focus Newsletter  IAS Plus – Transition Resource Group for IFRS 17 IFRS in Focus Newsletter – Amendments to IFRS 17		

New pronouncement	Effective date*	Year ending		Interim ending
		Jun 2022	Sept 2022	Sept 2022
On 13 August 2020, the NZASB issued the <i>Amendments to NZ IFRS 17</i>, which includes deferral of NZ IFRS 17's effective date to annual reporting periods beginning on or after 1 January 2023. Earlier application is permitted if NZ IFRS 9 has also been applied. Other amendments to NZ IFRS 17 are discussed below. An entity shall apply the standard retrospectively unless impracticable, in which case entities have the option of using either the modified retrospective approach or the fair value approach. At the date of initial application of the standard, those entities already applying NZ IFRS 9 may retrospectively re-designate and reclassify financial assets held in respect of activities connected with contracts within the scope of the standard.				
Amendments to NZ IFRS 17	1 Jan 2023	O	O	O
The other amendments to NZ IFRS 17 include the following: • Scope exclusion for credit card contracts and similar contracts and optional scope exclusion for loan contracts with insurance coverage limited to the loan amount; • Recognition of insurance acquisition cash flows relating to expected contract renewals, including guidance for insurance acquisition cash flows recognised in a business combination; • Application of NZ IFRS 17 in interim financial statements; • Allocation of CSM attributable to investment-return service and investment-related service; • Risk mitigation option using instruments other than derivatives; • Recovery of losses from underlying insurance contracts through reinsurance contracts held; • Presentation in the statement of financial position; • Transition issues: classification of contracts acquired in their settlement period and guidance on the restatement of the risk mitigation option applied in prior periods; and • Minor application issues. • Entities should apply the amendments retrospectively in accordance with NZ IAS 8. Earlier application is permitted.	 IFRS in Focus Newsletter			
Initial Application of NZ IFRS 17 and NZ IFRS 9 – Comparative Information	1 Jan 2023	O	O	O
The amendments will help insurers avoid temporary accounting mismatches due to different transition requirements in NZ IFRS 17 and NZ IFRS 9 <i>Financial Instruments</i>.	 IFRS in Focus Newsletter			

New pronouncement	Effective date*	Year ending		Interim ending
		Jun 2022	Sept 2022	Sept 2022
Applying NZ IFRS 9 Financial Instruments with NZ IFRS 4 Insurance Contracts (Amendments to NZ IFRS 4) For insurers (other than those entities that apply Appendix C <i>Life Insurance Entities</i> or Appendix D <i>Financial Reporting of Insurance Activities</i> of NZ IFRS 4 <i>Insurance Contracts</i>), these amendments provide two voluntary approaches to mitigate the issues arising from the fact that NZ IFRS 9 will become effective before the effective date of the new insurance contracts standard. The two approaches are: • a temporary exemption from applying NZ IFRS 9 (i.e. the deferral approach); or • an overlay approach. The temporary exemption from applying NZ IFRS 9 expires on the effective date of NZ IFRS 17. <i>Because the amendments are not available to entities using Appendix C or Appendix D, application is not expected to be widespread in New Zealand.</i>	Effective date depends on when NZ IFRS 9 is first applied.			
Disclosure of Accounting Policies (Amendments to NZ IAS 1 and IFRS Practice Statement 2) The amendments are issued by the NZASB as part of the IASB's overall disclosure initiative project which aims to help preparers in deciding which accounting policies to disclose in their financial statements. Entities are now required to disclose their 'material' accounting policies instead of 'significant' accounting policies. Further amendments to NZ IAS 1 are made to explain how an entity can identify a material accounting policy. Examples of when an accounting policy is likely to be material have been added. The amendments clarify that accounting policy information is material if users of an entity's financial statements would need it to understand other material information in the financial statements, and that accounting policy information may be material because of its nature, even if the related amounts are immaterial. To support the amendments, the IASB has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in IFRS Practice Statement 2. The amendments are applied prospectively with earlier application permitted.	1 Jan 2023	O	O	O
Definition of Accounting Estimates (Amendments to NZ IAS 8) The definition of "change in accounting estimates" is replaced with a definition of "accounting estimates". Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty".	1 Jan 2023	O	O	O

IFRS in Focus Newsletter

IFRS in Focus Newsletter

New pronouncement	Effective date*	Year ending		Interim ending
		Jun 2022	Sept 2022	Sept 2022
The NZASB also clarified that a change in accounting estimate that results from new information or new developments is not the correction of an error. In addition, the effects of a change in an input or a measurement technique used to develop an accounting estimate are changes in accounting estimates if they do not result from the correction of prior period errors. The amendments are effective to changes in accounting policies and changes in accounting estimates that occur on or after the start of 1 January 2023. Earlier application is permitted.				
Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to NZ IAS 12)	1 Jan 2023	O	O	O
The amendments introduce an exception to the initial recognition exemption in NZ IAS 12. Applying this exception, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences. The amendments apply to taxable and deductible temporary differences associated with right-of-use assets and lease liabilities, and decommissioning obligations and corresponding amounts recognised as assets. Any resulting adjustment is recognised at the beginning of the earliest comparative period presented. The amendments also apply to other transactions that occur on or after the beginning of the earliest comparative period presented. Early application of the amendments is permitted.	 IFRS in Focus Newsletter			
Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to NZ IFRS 10 and NZ IAS 28)	1 Jan 2025	O	O	O
The amendments clarify that in a transaction involving an associate or joint venture, the extent of the gain or loss recognised is dependent upon whether the assets sold or contributed constitute a business, as defined in NZ IFRS 3. A gain or loss is recognised in full where an entity: • sells or contributes assets constituting a business to a joint venture or associate; or • loses control of a subsidiary that contains a business but retains joint control or significant influence. Where the sold or contributed assets do not constitute a business, or where the subsidiary over which control was lost does not contain a business then the gain or loss is recognised only to the extent of the unrelated investors' interests in the joint venture or associate, i.e. the entity's share of the gain or loss is eliminated. Originally the amendments were to apply prospectively to annual periods beginning on or after 1 January 2016. However, the IASB has decided to postpone the effective date indefinitely in order to complete its research project on equity accounting (which may include further clarifications to these amendments). Since the Financial Reporting Act 2013 requires all accounting standards issued in New Zealand to have an effective date, the NZASB has decided on an effective date which is now deferred to 1 January 2025 (which will be reassessed in accordance with the IASB's decision on the matter). Early application of the amendments is still permitted.	 IFRS in Focus Newsletter IFRS in Focus Newsletter – deferral of effective date			

Deloitte Covid-19 resources

Global Accounting Considerations related to COVID-19

Deloitte Global has a dedicated web page which includes news items and resources in connection with COVID-19 developments that highlights some of the key accounting and disclosure issues to be considered by entities that may arise as a result of COVID-19 in preparing their financial statements.

Covid-19 video series

A series of webcasts (5 to 10 minutes long) is also available which presents certain key IFRS accounting considerations related to conditions that may result from the Covid-19 pandemic.

To review in more detail the accounting considerations related to the Covid-19 pandemic that may impact the financial statements, please refer to Deloitte's IFRS in Focus Newsletter 'Accounting Considerations related to the Coronavirus 2019 Disease' [here](#). The related IFRS in Focus Newsletter addressed to high level executives and audit committees is available [here](#).

Other Covid-19 guidance

Several organisations have issued guidance for entities and their directors in preparing their financial statements and reminders on their responsibilities during the current economic environment.

Financial Markets Authority (FMA)

The FMA has released key findings from its review of financial reporting on areas of interest including significant accounting judgements and sources of estimation uncertainty, impact of new accounting standards and non-GAAP financial information. The document published also provides guidance for entities and directors in light of Covid-19 and reiterates FMA's focus on ensuring that entities provide meaningful disclosures around Covid-19. Find the document [here](#).

Chartered Accountants Australia + New Zealand (CAANZ)

CAANZ has released a guide to highlight some of the biggest Covid-19 impacts on reporting and assurance which will be useful for preparers and directors. This guide covers topics including going concern, accounting estimates, leases and rent concessions, and subsequent events as well as links to additional resources and Q&As. Download the guide [here](#).

International Accounting Standards Board (IASB)

The IASB has released three items of educational material as follows:

IFRS 9 and COVID-19: This document highlights requirements within IFRS 9 *Financial Instruments* that are relevant to entities in relation to the impact of the pandemic on the entities' accounting for expected credit losses. It does not change, remove nor add to, the requirements of IFRS 9.

IFRS 16 and COVID-19: This document highlights requirements within IFRS 16 and other IFRSs that are relevant to entities in relation to their accounting for rent concessions granted as a result of the Covid-19 pandemic. It does not change, remove nor add to, the requirements of IFRS 16.

Going concern – a focus on disclosure: This document brings together the requirements in IFRS Standards relevant for going concern assessments. It echoes the specific going concern disclosure requirements issued by the NZASB which were effective from annual periods ending 30 September 2020. It does not change, remove nor add to, the requirements of existing IFRS Standards.

External Reporting Board (XRB)

The XRB has issued four alerts to date as a response to the impact of Covid-19. Refer to the XRB COVID-19 Reporting information page [here](#).

The first alert covers the likely impact of Covid-19 on audit reports including explanation of the types of audit reports (e.g. modified audit reports) which may be issued by auditors during the current economic environment.

The second alert highlights the importance of going concern disclosures in response to the impact of Covid-19 and the nature and extent of the disclosures depending on the entity's specific facts and circumstances. The XRB has also issued a third alert that is relevant for not-for-profit entities such as registered charities (Tier 1 and 2) in their assessment of going concern in the current economic environment. In addition, a series of FAQs was issued for not-for-profit Tier 3 entities which may be helpful in their assessment and reporting on their ability to continue operating.

The XRB's fourth alert explains in detail the auditors' reporting of key audit matters and use of emphasis of matter paragraphs in their audit reports in the current Covid-19 environment. Refer to the XRB's dedicated page on "**COVID-19 Reporting information**" for other implications on financial reporting and auditing.

Reflecting climate risk in financial statements

Climate change is an urgent risk that entities around the world are already facing. With growing pressure from investors and other stakeholders, as well as increased government activity, entities must take action to consider and provide meaningful and useful disclosure about climate-related risks that could impact the entity and how management are responding to these risks.

The IFRS Foundation has issued educational materials on the [Effects of climate-related matters on financial statements](#). The International Public Sector Accounting Standards Board (IPSASB) staff have also issued a [Q&A publication on climate change](#).

As New Zealand financial reporting standards are based on IASB and IPSASB developed standards, the guidance is also relevant for financial statements prepared in accordance with NZ Generally Accepted Accounting Practice (NZ GAAP).

Preparers of financial statements must consider the **accounting implications of climate change** as well as the appropriate **disclosures** to include in the entity's financial statements, including the **consistency of that disclosure** with other information in the annual report.

Impacts to measurement and recognition

The risks and uncertainties arising from climate change are likely to have some impact on the financial statements of all entities, whether directly, or indirectly (through the supply / value chain).

For example, climate change could result in:

- changes to assumptions in forecasts when considering asset impairment, including for goodwill,
- effects on impairment calculations because of increased costs or reduced demand,
- changes in the useful life of assets,
- changes in the fair values of assets,
- changing availability of future tax profits when assessing recoverability of deferred tax assets,
- changes in provisions for onerous contracts because of increased costs or reduced demand,
- changes in provisions and contingent liabilities arising from fines and penalties,
- changes in expected credit losses for loans and other financial assets, and
- new financing arrangements and terms to be considered.

Forecasts used to assess going concern over a period of at least 12 months from the date of signing the financial statements may also be significantly affected in some cases. The likelihood and extent of impact will require judgement because there is significant uncertainty as to how much the global temperature will increase, what the impact of different climate change scenarios on an entity's business might be, and how these factors may result in changes to cash flow

projections or to the level of risk associated with achieving those cash flows.

Assumptions made will need to be consistent with:

- risk management, strategy, and business model disclosure,
- commitments made by the company to investors and other stakeholders,
- commitments made by governments of jurisdictions in which the company operates, e.g., the NZ Government's commitment to 'net zero by 2050' and a carbon neutral public sector by 2025, and
- other disclosures made by the entity (such as the new proposed climate-related disclosures or other ESG reporting).

If your organisation has made climate commitments, the financial impact of these commitments should be reflected in any related accounting estimates and disclosures.

Increased Disclosure

Investors, regulators, and other stakeholders are also increasingly demanding better disclosures on climate change matters and challenging entities who are not factoring the effects of climate change into their critical accounting judgements.

Accounting standards note *that "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that primary users of general purpose financial statements make on the basis of those financial statements"* (NZ IAS 1).

If investors could reasonably expect that climate-related risks (or other emerging risks) will have a significant impact on the entity and this would qualitatively influence investors' decisions, then information on the climate or other assumptions made should be disclosed (if not disclosed elsewhere), including information about the sensitivity of those assumptions. Such disclosure may be necessary, even if the effects of climate change on the entity are not expected in the short term.

[IFRS Practice Statement 2: Making Materiality Judgements](#) provides guidance and examples that help preparers in making materiality judgements.

Climate disclosures in the financial statements should be consistent with information provided elsewhere, for example in management discussions in the annual report and information on the organisation's website.

Reflecting climate risk in financial statements (continued)

Observations

Some entities may consider that climate change is a long-term issue and not relevant to current decision making. However, investors globally are making it clear that climate risk information, along with other ESG risks, are important to their decision making and allocation of capital resources. Government actions to incentivise market action on climate change or penalise high carbon activities also bring forward the financial impacts of climate change for many entities.

Directors are also being increasingly held accountable for the entity's climate impacts and actions as noted in the May 2019 [Climate Change and the Law](#) report issued by Hon Chief Justice Helen Winkelmann, Hon Justice Susan Glazebrook and Hon Justice Ellen France of the Supreme Court of New Zealand to the Asia Pacific Judicial Colloquium where they stated that "Climate change is no longer an ethical issue. As a material financial risk, directors are accountable under care and diligence duties to take account of the financial consequences of climate change..."

Entities that are not well advanced in considering climate risks will need time to debate and pinpoint the risks that have a material impact on the financial statements, but action needs to be taken now.

Entities should consider both quantitative and qualitative impacts that could influence investor or other stakeholder decisions and start discussing where they are in their journey with those parties.

Consider:

- What would your future cash flow projections look like? (customer demand, increasing costs, changes to cost of capital etc.)
- How and when will your existing assets be replaced?
- Do you need to provide now for the cost of future action arising from climate-related risks?
- Can your debtors pay? Make a forward-looking assessment.

Climate scenario analysis, ESG risk evaluations, stress testing, sensitivity analysis or credit risk assessments may be needed to assess the business implications of climate risks and opportunities. How this is disclosed in a way that highlights the important information for investors without overwhelming them with too much data will be important.

Standard setting in New Zealand

In New Zealand, the XRB is developing standards that will apply to entities that have to prepare climate-related disclosures under legislation (large listed companies with a market capitalisation of more than \$60 million, large licensed insurers, registered banks, credit unions, building societies and managers of investment schemes with more than \$1 billion in assets, and potentially some Crown financial institutions).

The first climate standard is expected to be issued in December 2022. Disclosures are likely to be required as early as financial reporting periods beginning on or after 1 January 2023. Refer to consultation documents and feedback submission forms [here](#). You can find out more information about the project timeline on the XRB's website [here](#).

Russia-Ukraine War

The Russia-Ukraine war is increasingly affecting economic and global financial markets and exacerbating ongoing economic challenges, including issues such as rising inflation and global supply-chain disruption. Entities may need to consider the effect of the war on certain accounting and financial reporting matters. Deloitte's [IFRS in Focus](#) publication outlines key considerations, including:

- recoverability and impairment of assets;
- disposal of non-financial assets (including goodwill);
- restructuring plans;
- loss of control, the ability to exercise significant influence, or cessation of operations;
- foreign currency matters; and
- other material judgements and estimates

Appendix A – Shedding light on the disclosures required

NZ IFRS requires disclosures in relation to all the new or revised Standards and Interpretations that have had or may have a material impact on the annual financial report of the entity, whether they have been adopted or not. The requirements for interim financial reports are less onerous but must still be considered.

The disclosure requirements surrounding new or revised accounting pronouncements are specified by:

- for annual reporting periods – NZ IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*
- for interim reporting periods – NZ IAS 34 *Interim Financial Reporting*.

Entities reporting under NZ IFRS RDR (Tier 2 entities) are permitted exemptions from certain disclosures as noted below.

What disclosures are required?

Applicability of new or revised pronouncement	Summary of disclosures required	
	Annual financial statements	Interim financial statements
Initial mandatory or voluntary application of a new or revised pronouncement	The relevant pronouncement, the nature of the change in accounting policy, details of any transitional provisions, line-by-line analysis of the effect of the change in policy on the financial statements and the impacts on earnings per share. <i>Tier 2 entities would not need to disclose details of transitional provisions.</i> (NZ IAS 8.28) In addition, each standard may have specific transitional provisions with which the entity needs to comply. When initial application has not had a material impact on the financial statements (and is also not expected to have a material impact in future periods), an entity may wish to include a generic disclosure such as: <i>“All mandatory Standards, Amendments and Interpretations have been adopted in the current year. None had a material impact on these financial statements.”</i>	The nature and effect of any change in accounting policy compared with the most recent annual financial report. (NZ IAS 34.16A(a)) NZ IAS 34 does not specify the level of detail of the disclosures required, and accordingly the level of detail may be less than is presented in an annual financial report in accordance with NZ IAS 8. However, best practice might suggest that the requirements of NZ IAS 8 be used as a guide. An IFRS in Focus Newsletter with more details can be found here.
Pronouncement on issue but not adopted	The financial report must disclose which pronouncements have been issued but not adopted in the financial report, when the pronouncements have mandatory application, when those pronouncements are going to be applied by the entity and the possible impact on the entity's financial report (where known or reasonably estimable). The tables within the body of this update could be reviewed to identify such pronouncements for periods ending 30 June 2022 or 30 September 2022 (updated to 12 September 2022). When initial application is genuinely not expected to have a material impact on the financial statements, an entity may wish to include a generic disclosure such as: <i>“There are a number of Standards, Amendments and Interpretations which have been approved but are not yet effective. The Company expects to adopt these when they become mandatory. None are expected to result in a material impact on the Company's financial statements.”</i> Tier 2 entities are exempt from these disclosures. (NZ IAS 8.30-31)	

Deciding on the early adoption of Interpretations

Interpretations that merely interpret the requirements of existing Standards are often considered best practice and so would ordinarily be adopted at an entity's next reporting date or at the mandatory adoption date.

Other interpretations that effectively introduce new recognition and measurement requirements not explicitly covered under existing Standards might not ordinarily be early adopted, particularly where they change established industry practice and/or require substantial effort to implement.

Accordingly, where an Interpretation is on issue but is not yet mandatory, entities should carefully consider the requirements of each Interpretation and its potential impacts when deciding whether early adoption is appropriate.

Do the annual disclosures extend to pronouncements issued by the IASB/IFRIC where an equivalent New Zealand pronouncement has not been approved at the date of signing the financial report?

Yes. *2019 Omnibus Amendments to NZ IFRS* has amended FRS 44 to require for-profit entities to disclose the information required by paragraphs 30 and 31 of NZ IAS 8 in relation to a Standard or Interpretation issued by the IASB/IFRIC where an equivalent New Zealand Standard or Interpretation has not been approved at the date of signing the financial report. This approach ensures that the entity can make an unreserved statement of compliance with IFRS as required by paragraph 16 of NZ IAS 1 *Presentation of Financial Statements*.

As at 12 September 2022, there were no amendments or interpretations that were approved by the IASB but not yet approved in New Zealand.

Appendix B – Annual Improvements

The IASB undertakes an annual project to pass necessary but non-urgent amendments to Standards and Interpretations. This appendix includes a list of the Standards affected and subject matters of the amendments passed in the IASB's annual improvement projects as follows:

2018-2020 cycle

NZ IFRS	Subject of amendment
NZ IFRS 1 <i>First-time Adoption of International Financial Reporting Standards</i>	Subsidiary as first-time adopter. The amendment permits a subsidiary that becomes a first-time adopter later than its parent and elects to measure its assets and liabilities at the carrying amounts that would be included in the parent's consolidated financial statements in accordance with paragraph D16(a) of NZ IFRS 1 to extend the relief to cumulative translation differences for all foreign operations. The subsidiary can now elect to measure cumulative translation differences for all foreign operations at the carrying amount that would be included in the parent's consolidated financial statements, based on the parent's date of transition to NZ IFRS.
NZ IFRS 9 <i>Financial Instruments</i>	Fees in the '10 per cent' test for derecognition of financial liabilities. The amendment clarifies that the fees to be included when an entity applies the '10 per cent' test in assessing whether to derecognise a financial liability are only those fees paid or received between the entity (borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf. This amendment is applied prospectively to modifications and exchanges that occur on or after the date the entity first applies the amendment.
NZ IFRS 16 <i>Leases</i>	Lease incentives. The amendment removes from Illustrative Example 13 the illustration of the reimbursement relating to leasehold improvements to resolve any potential confusion regarding the treatment of lease incentives.
NZ IAS 41 <i>Agriculture</i>	Taxation in fair value measurements. The amendment removes the requirement to exclude taxation cash flows when measuring the fair value of a biological asset using a present value technique following the amendment in 2008 removing the requirement to use pre-tax discount rates, which ensures consistency with the requirements of NZ IFRS 13 to use internally consistent cash flows and discount rates (pre-tax or post-tax). This amendment should be applied prospectively.

The amendments to NZ IFRS 1, NZ IFRS 9 and NZ IAS 41 are all effective for annual periods beginning on or after 1 January 2022. Early application is permitted. As the amendment to NZ IFRS 16 pertains to an illustrative example, no effective date is stated.
